POROČILO VARUHA ČLOVEKOVIH PRAVIC REPUBLIKE SLOVENIJE O IZVAJANJU NALOG IN POOBLASTIL DRŽAVNEGA PREVENTIVNEGA MEHANIZMA ZA LETO 2011

Uvod

Po Zakonu o ratifikaciji Opcijskega protokola h Konvenciji proti mučenju in drugim krutim, nečloveškim ali poniževalnim kaznim ali ravnjanju (Uradni list RS, št. 114/06 – Mednarodne pogodbe, št. 20/06 – opcijski protokol) Varuh clovekovih pravic RS (Varuh) izvaja tudi naloge in pooblastila državnega preventivnega mehanizma (DPM), v dogovoru z njim pa tudi izbrane nevladne organizacije, registrirane v Republiki Sloveniji, ter organizacije, ki so pridobile status humanitarne organizacije v Republiki Sloveniji in se ukvarjajo z varstvom clovekovih pravic ali temeljnih svoboščin. Na podlagi javnega razpisa, objavljenega v Uradnem listu RS, št. 107/2008 z dne 14. 11. 2008, so bile za sodelovanje v letu 2009 in 2010 (z možnostjo podaljšanja sodelovanja še za eno leto) izbrane organizacije: Pravnoinformacijski center nevladnih organizacij – PIC, Rdeči križ Slovenije in Inštitut Primus. Na podlagi Aneksov k Pogodbi o sodelovanju pri izvajanju nalog in pooblastil državnega preventivnega mehanizma je bilo sodelovanje teh izbranih organizacij podaljšano še za eno leto, to je za leto 2011.

V letu 2011 smo opravili 46 obiskov in s tem v celoti uresničili vse načrtovane obiske iz vnaprej pripravljenega programa. Tako smo obiskali deset ustanov, kjer so nastanjene osebe, ki so na prestajaju kazni zapora oziroma priporniki, 19 policijskih postaj, Azilni dom v Ljubljani in Center za tujce v Postojni, dve psihiatrični ustanovi, tri posebne socialnovarstvene zavode, pet domov za starejše, en kombinirani zavod in štiri vzgojne zavode. Pri obiskih smo sodelovali s štirimi predstavnicami PIC, s tremi predstavniki Rdečega križa Slovenije in tremi predstavnicami Inštituta Primus.

Na podlagi posebnih pogodb o sodelovanju smo še naprej uporabljali tudi znanje in izkušnje (za zdaj) dveh zunanjih strokovnjakinj, ki poleg svojega strokovnega področja presojata razmere v zavodih tudi z vidika preprečevanja mučenja in drugih oblik okrutnega, nečloveškega ali poniževalnega ravnjanja ali kaznovanja. Prva je strokovnjakinja za pedagoško in psihološko področje. Z nami sodeluje pri vseh obiskih vzgojnih zavodov, v katerih so nastanjeni mladostniki in po vsakem obisku v pisni obliki podaja svoje ugotovitve o ustreznosti izvajanja vzgojno-izobraževalne dejavnosti, ki jih opravljajo vzgojni zavodi, ter tudi o ustreznosti socialnega varstva z namenitvijo otrok in mladostnikov v teh ustanovah. Druga pa je strokovnjakinja s področja medicine, in sicer specialistka psihiatrije. Sodeluje pri načrtovanih obiskih prostorov odvzema prostosti (zlasti v večjih zavodih za prestajanje kazni zapora in v Azilnem domu ter Centru za tujce) ter v pisni obliki podaja svoje ugotovitve zlasti z vidika o ustreznosti zdravstvenega varstva in glede ravnanja z ljudmi, ki jim je odvzeta prostost.

Izbrane druge organizacije naloge in pooblastila opravljajo s svojimi osebami, ki so usposobljene za posamezna področja nadzora. Vedno so člani skupine, ki jo vsakokrat določi Varuh za opravljanje obiska na kraju odvzema prostosti ter preverjanja ravnanja z osebami, ki jim je bila odvzeta prostost. Kraj in čas obiska ter število članov skupine za opravljanje obiska na posameznem kraju nadzora določi Varuh. Pri tem upošteva program obiskov, ki je bil sprejet v sodelovanju z izbranimi organizacijami, po potrebi pa pri tem upošteva tudi druge okoliščine, ki bi terjale takojšen obisk.

O vsakem obisku smo pripravili izčrpano poročilo o svojih ugotovitvah. Poročilo vsebuje tudi predloge in priporočila za odpravo ugotovljenih nepravilnosti ter za izboljšanje stanja, vključno z ukrepi za zmanjšanje možnosti nepravilnega ravnanja v prihodnje. Pri pripravi

IMPLEMENTATION OF THE DUTIES AND POWERS OF THE NATIONAL PREVENTIVE MECHANISM IN 2011

Introduction

According to the Act ratifying the Optional Protocol to the Convention against Torture and other Cruel, Inhuman and Degrading Treatment or Punishment (Official Gazette of the Republic of Slovenia, no. 114/06, International Treaties, no. 20/06, Optional Protocol), the Human Rights Ombudsman of the Republic of Slovenia (the Ombudsman) and, in agreement with the Ombudsman, selected non-governmental organisations registered in the Republic in Slovenia and organisations with the status of a humanitarian organisation in the Republic of Slovenia concerned with the protection of human rights or fundamental freedoms also perform duties and have powers under the National Preventive Mechanism (DPM). On the basis of a public tender published in the Official Gazette of the Republic of Slovenia, no. 107/2008 of 14 November 2008, the following organisations were selected for cooperation in 2009 and 2010 (with the option of renewal for another year): the Legal Information Centre of NGOs – PIC, Slovenian Red Cross and the Primus Institute. On the basis of annexes to the Contract on cooperation in performing the duties and powers of the National Preventive Mechanism, the cooperation of the selected organisations was renewed for another year, i.e. for 2011.

In 2011, 46 visits were performed, thereby fully realising all the visits planned in the programme. We visited ten institutions where persons serving a prison sentence or prisoners on remand are accommodated, 19 police stations, the Asylum Centre in Ljubljana and the Aliens Centre in Postojna, two psychiatric institutions, three special social care institutions, five nursing homes, one combined institution and four juvenile facilities. Four representatives of PIC, three representatives of the Slovenian Red Cross and three representatives of the Primus Institute participated in the visits.

On the basis of special cooperation contracts, we also made use of the expertise of (for the time being) two external experts who, in addition to their area of expertise, also assess conditions in the institutions from the perspective of torture and other forms of cruel, inhuman or degrading treatment or punishment. The first one is an expert in education and psychology. She participates in all visits to juvenile facilities; after each visit, she submits her findings on the adequacy of educational activities provided by these institutions and the adequacy of social care for children and adolescents in them. The other person is an expert on medicine, specialising in psychiatry. She participates in planned visits to places of incarceration (particularly larger prisons, the Asylum Centre and the Aliens Centre) and submits her findings, particularly on the adequacy of health care and treatment of persons deprived of liberty.

Other selected organisations perform their work with their own staff, who are trained for particular areas of supervision. They are always part of the group specified each time by the Ombudsman to visit a place of incarceration and to monitor the treatment of persons deprived of liberty. The time and place of the visit and the number of people involved in visiting a particular place of surveillance is specified by the Ombudsman. The programme of visits adopted in cooperation with the organisations in question, and, if necessary, other circumstances requiring a prompt visit, are taken into account.

An exhaustive report on our findings was prepared after each visit. The report also covers proposals and recommendations for the elimination of irregularities and for the improvement of the situation, including measures to reduce the potential for improper treatment in the future. All members of the visiting group participate in preparing the report and make a brief written

poročila o opravljenem obisku sodelujejo vsi člani skupine in pripravijo krajše besedilo z lastnimi ugotovitvami in predlogi, ki so del končnega poročila o opravljenem nadzoru. Za izdelavo končnega poročila praviloma skrbi predstavnik Varuha, lahko pa tudi nekdo iz izbrane nevladne organizacije.

Uresničevanje priporočil DPM je zaveza (obveznost) države pogodbenice Opcijskega protokola. Po določbi 22. člena Opcijskega protokola morajo namreč pristojni organi države pogodbenice obravnavati priporočila DPM in z njim vzpostaviti dialog o mogočih ukrepih za izvedbo priporočil. Pripominjamo tudi, da na nujnost uresničevanja priporočil DPM opozarjata tudi sodbi Evropskega sodišča za človekove pravice v zadevi Štrucl Jakob in drugi proti Sloveniji ter v zadevi Mandić in Jović proti Sloveniji.

Na podlagi dosedanjih izkušenj in nekaterih predlogov izbranih organizacij smo pripravili tudi spremembe in dopolnitve Pravilnika o povračilu stroškov in o nagradah osebam iz organizacij, ki opravljajo naloge oziroma izvajajo pooblastila po določbah Opcijskega protokola h Konvenciji proti mučenju in drugim krutim, nečloveškim ali poniževalnim kaznim ali ravnanju (Uradni list RS, št. 20/2011). Pripravili smo tudi vprašalnik, ki nam bo v pomoč pri obiskih socialnovarstvenih zavodih (domov starejših) in s katerim želimo že pred našim obiskom zbrati nekatere osnovne podatke o delovanju zavoda. Vnaprej pripravljeni odgovori nam bodo omogočali, da bodo obiski potekali hitreje in učinkoviteje, predvsem pa se bomo laže usmerili v vsebinska vprašanja.

contribution with their findings and proposals, which form part of the final inspection report. The Ombudsman's representative usually provides for the final report, or a participating person from a selected non-governmental organisation.

Implementing DPM recommendations is a commitment (obligation) of the State Party to the Optional Protocol. According to Article 22 of the Optional Protocol, the competent authorities of the State Party must address the recommendations of the DPM and establish a dialogue with it on potential measures to realise their recommendations. It should be noted that judgements by the European Court of Human Rights in the case of Štrucl Jakob and others v Slovenia and the case of Mandić and Jović v Slovenia also indicate that the implementation of DPM recommendations is necessary.

Based on experience and on certain proposals by the selected organisations, we have prepared amendments to the Rules on the reimbursement of costs and rewards to persons from organisations that perform tasks or exercise authorities under the provisions of the Optional Protocol to the Convention against Torture and other Cruel, Inhuman or Degrading Treatment of Punishment (Official Gazette of the Republic of Slovenia, no. 20/2011). We also prepared a questionnaire to help us in visits to social care institutions (nursing homes), which will be used before the visits to collect some basic information on the institution's operation. Answers prepared in advance will allow us to perform visits faster and more efficiently and focus on substantive issues.

Obiski v zavodih za prestajanje kazni zapora, mladoletniškega zapora in prevzgojnega doma

V letu 2011 smo v okviru izvajanja nalog in pooblastil DPM obiskali deset od skupno štirinajstih lokacij, na katerih delujejo dislocirane notranje organizacijske enote Uprave za izvrševanje kazenskih sankcij (v nadaljevanju: UIKS). To so zavodi za prestajanje kazni zapora (v nadaljevanju: ZPKZ) oziroma njihovi oddelki in prevzgojni dom: ZPKZ Koper, Odprt oddelek Ig ZPKZ Ljubljana, Oddelek Nova Gorica ZPKZ Koper, Prevzgojni dom Radeče, ZPKZ Ljubljana, Zavod za prestajanje mladoletniškega zapora in kazni zapora Celje (v nadaljevanju: ZPMZ in KZ Celje), ZPKZ Ig, Oddelek Murska Sobota ZPKZ Maribor, Odprt oddelek Rogoza ZPKZ Maribor in Polodprt oddelek Slovenska vas ZPKZ Dob pri Mirni.

DPM je Polodprt oddelek Slovenska vas ZPKZ Dob pri Mirni obiskal prvič, pet od omenjenih lokacij smo obiskali že leto prej (Odprt oddelek Ig ZPKZ Ljubljana, ZPKZ Ljubljana, ZPMZ in KZ Celje, Oddelek Murska Sobota ZPKZ Maribor in Odprt oddelek Rogoza ZPKZ Maribor), v štirih pa smo bili nazadnje pred dvema letoma (ZPKZ Koper, Oddelek Nova Gorica ZPKZ Koper, Prevzgojni dom Radeče, ZPKZ Ig).

Pri štirih od navedenih obiskov je sodeloval po en predstavnik pogodbenih nevladnih organizacij, pri preostalih šestih pa po dva. Pogodbena izvedenka za področje zdravstvenega varstva je sodelovala pri šestih obiskih, in sicer v ZPKZ Koper, Prevzgojnega doma Radeče, ZPKZ Ljubljana, ZPMZ in KZ Celje, ZPKZ Ig in Polodprtega oddelka Slovenska vas ZPKZ Dob pri Mirni.

V polovici primerov smo obisk prej napovedali. Vsi obiski navedenih lokacij so bili opravljeni v enem dnevu, z izjemo dvodnevnega obiska ZPKZ Koper. Obsegali so uvodni pogovor z vodstvom zavoda, ogled prostorov in pogovore z zaprtimi osebami.

DPM je v letu 2011 obiskom te vrste krajev odvezema prostosti namenil skupno 11 dni. V seštevku je bilo tam takrat 713 zaprtih oseb, od tega 429 obsojencev oziroma obsojenk (priščeti so tudi mladoletniki oziroma mladoletnice z vzgojnim ukrepom oddaje v prevzgojni dom), 270 pripornek oziroma priponic in 14 oseb, zoper katere se je izvajal uklonilni zapor. Poročila o posameznih obiskih (v skrajšani obliki) in ugotovitve DPM v zvezi z njimi so dostopna na spletni strani Varuha www.varuh-rs.si, v nadaljevanju pa izpostavljamo nekatere najbolj pomembne ugotovitve.

Šest zavodov je bilo prezasedenih, ZPKZ Ig, ZPMZ in KZ Celje in Oddelek Nova Gorica ZPKZ Koper v priponiškem delu, Odprt oddelek Rogoza ZPKZ Maribor in ZPKZ Koper pri obsojencih, ZPKZ Ljubljana pa tako pri obsojencih kot tudi pri priponikih. Pri zadnjih velja kot posebej kritično omeniti predvsem kar 160-odstotno prezasedenost glede na uradno zmogljivost za priponike v tem zavodu.

Spodbudno je, da smo lahko razmere ali prakso v zavodih oziroma njihovih oddelkih posebej pohvalili v 46 primerih. Posebej želimo izpostaviti prakso v. d. direktorce v ZPKZ Koper, ki opravi obhod po zavodu vsaj dvakrat tedensko (enkrat tedensko ob obisku predsednika sodišča), saj ima dovolj pogost neposreden stik z zaprtimi osebami po naši presoji pozitiven učinek. V zavodu so zaposlili pravnika, ki daje pravno pomoč zaprtim osebam, vodi disciplinske postopke, sodeluje pri pogojnih odpustih, na strokovnih skupinah ipd., kar nedvomno vpliva na pravno varnost zaprtih oseb. Z namestitvijo telefonske govorilnice na sprehajališču v ZPMZ in KZ Celje je tam tudi priponikom zagotovljeno praktično neomejeno telefoniranje med bivanjem na prostem.

Visit to prisons, a juvenile prison and a youth detention centre

In exercising the duties and powers of the DPM, ten out of fourteen locations where dislocated internal organisational units of the Prison Administration (hereinafter referred to as UIKS) were visited in 2011. These are prisons (hereinafter referred to as ZPKZ) or their sections and a youth detention centre: ZPKZ Koper, Ig Open Prison Section of ZPKZ Ljubljana, Nova Gorica Section of ZPKZ Koper, Radeče Youth Detention Centre, ZPKZ Ljubljana, Celje Prison and Juvenile Prison (hereinafter referred to as ZPMZ and KZ Celje), ZPKZ Ig, Murska Sobota Section of ZPKZ Maribor, Rogoza Open Prison Section of ZPKZ Maribor and Slovenska vas Semi-open Prison Section of ZPKZ Dob pri Mirni.

The DPM visited the Slovenska vas Semi-open Prison Section of ZPKZ Dob pri Mirni for the first time; five of the above locations had been visited a year before (Ig Open Prison Section of ZPKZ Ljubljana, ZPKZ Ljubljana, ZPMZ and KZ Celje, Murska Sobota Section of ZPKZ Maribor and Rogoza Open Prison Section of ZPKZ Maribor), and four two years ago (ZPKZ Koper, Nova Gorica Section of ZPKZ Koper, Radeče Youth Detention Centre, ZPKZ Ig).

One representative of each contractual non-governmental organisation participated in four of the above visits, and two in the remaining six. The contractual expert for the field of health care participated in six visits, namely to ZPKZ Koper, Radeče Youth Detention Centre, ZPKZ Ljubljana, ZPMZ and KZ Celje, ZPKZ Ig and Slovenska vas Semi-open Prison Section of ZPKZ Dob pri Mirni.

In half of the cases, the visits were announced beforehand. All visits to the above locations lasted one day, except for the visit to ZPKZ Koper, which lasted two days. The visits comprised an introductory interview with the prison management, an inspection of rooms and interviews with prisoners.

In 2011, the DPM spent 11 days on visits to these places of incarceration. In total, these places accommodated 713 imprisoned persons, of whom 429 were convicted (including adolescents in youth detention centre), 270 detained and 14 in compliance detention. Reports on each visit (in abbreviated form) and the related findings of the DPM are available on the Ombudsman's web site www.varuh-rs.si; the most important findings are emphasised below.

Six institutions were overcrowded: ZPKZ Ig, ZPMZ and KZ Celje, and the Nova Gorica Section of ZPKZ Koper in the part for detention, the Rogoza Open Prison Section of ZPKZ Maribor and ZPKZ Koper in the area where convicted persons were, and ZPKZ Ljubljana in the areas for convicted and detained persons. It should be particularly mentioned that the latter prison was overcrowded by 160 per cent with regard to the official capacity for detained persons.

It is encouraging that the situation or practice in the institutions or their sections could be especially commended in 45 cases. We would like to point out the practice of the Acting Director of ZPKZ Koper, who makes a round at least twice per week (one per week when the president of court visits), since we believe sufficiently frequent direct contact with imprisoned persons has a positive effect. The institution employed a lawyer who provides legal aid to the imprisoned persons, leads disciplinary proceedings, participates in release on parole, and in expert groups etc., which definitely influences the legal security of the imprisoned persons. The installation of a telephone booth in the recreational yard in ZPMZ and KZ Celje has enabled detained persons to have practically unlimited telephone contact during their period outdoors.

Na več krajih smo tudi od zaprtih oseb slišali pohvale na račun osebja, predvsem na Polodprtrem oddelku Slovenska vas ZPKZ Dob pri Mirni, ZPMZ in KZ Celje in Odprtem oddelku Rogoza ZPKZ Maribor. To nas je utrdilo v prepričanju, da je tudi v ZKPZ mogoče opravljati delo v spoštljivem odnosu do zaprtih oseb. Le v PD Radeče in ZPKZ Koper smo prejeli nekaj pritožb nad odnosom pravosodnih policistov do zaprtih oseb, pri čemer je šlo za nepravilnosti, kot so tikanje in podobno, tako da resnih kršitev človekovega dostenjanstva nismo ugotovili nikjer.

Prav tako smo večkrat z zadovoljstvom ugotovili, da je bilo realiziranih več prejšnjih priporočil DPM, na primer: na Oddelku Murska Sobota ZPKZ Maribor so popravili slabo tesnjenje oken in vdrtine v steni zaradi zamenjave instalacije; na Odprtem oddelku Ig ZPKZ Ljubljana so prepleskali prostor za prhanje in iz bivalnih prostorov so odstranili odvečno embalažo; v Odprtem oddelku Rogoza ZPKZ Maribor so prepleskali bivalne prostore v novem objektu in prostore jedilnice, sobe za obiske in knjižnice, prostori so bili v času obiska tokrat dobro ogrevani. V PD Radeče so bile v prostorih za izločitev odstranjene lesene palice; v ZPKZ Ig so bili oštevilčeni vsi bivalni prostori; za prestajanje uklonilnega zapora so zagotovili ločene prostore; prebeljene so bile sobe vseh oddelkov, podobno tudi drugje. Vse to kaže na to, da se vendarle začenjajo upoštevati predlogi DPM za izboljšanje bivanjskih razmer na obiskanih krajih prostosti, kar je seveda spodbudno in hkrati potrjuje namen našega delovanja.

Po drugi strani pa smo večkrat ugotavljali, da so materialne razmere za zaprte osebe pretežno slabe (predvsem v Oddelku Nova Gorica ZPKZ Koper in ZPKZ Ljubljana). Zavodi bi lahko več pomanjkljivosti odpravili že z nekaj večjo samoiniciativnostjo. Tako smo v nekaj primerih predlagali, naj se pleskanje izvaja po potrebi, tj. tudi zunaj rednega načrta (Oddelek Nova Gorica ZPKZ Koper, ZPKZ Koper, Oddelek Murska Sobota ZPKZ Maribor ...); naj se bolj sproti skrbi za popravljanje poškodovanega inventarja (npr. ZPKZ Koper, ZPKZ Ljubljana, PD Radeče, Odpri oddelek Rogoza ZPKZ Maribor, Odpri oddelek Ig ZPKZ Ljubljana, Polodprt oddelek Slovenska vas ZPKZ Dob pri Mirni ...). V dveh primerih (Oddelek Murska Sobota ZPKZ Maribor in Oddelek Nova Gorica ZPKZ Koper) pa bi bilo mogoče razmere izboljšati že z odstranitvijo odvečnega pohištva, s čimer bi pridobili več uporabnega prostora v posameznih sobah in zmanjšali občutek utesnjenosti.

Kot že tolkokrat doslej, smo tudi v tem letu večkrat ugotovili neustrezno opremljenost prostorov za izločitev (Oddelek Nova Gorica ZPKZ Koper, ZPKZ Ljubljana, PD Radeče, Oddelek Murska Sobota ZPKZ Maribor, ZPKZ Ig). V tej zvezi smo žal predvsem prejemali pojasnila GUURSIKS, da tega niso uredili zaradi pomanjkanja denarja. Menimo, da se s takimi izboljšavami ne bi smelo odlašati.

Tudi glede bivanja na prostem in siceršnjih možnosti za telesne dejavnosti zaprtih oseb smo ugotovili nekatere pomanjkljivosti. V Oddelku Murska Sobota ZPKZ Maribor smo tako ugotovili, da še vedno nimajo prostora, v katerem bi jim bila omogočena rekreacija ne glede na vremenske razmere, zato smo predlagali, naj se poskuša urediti vsaj manjši fitness. V ZPKZ Ljubljana še vedno niso zgradili nadstreška na notranjem sprehajališču, kar bi omogočilo zadrževanje priponikov na svežem zraku ob slabem vremenu. V zvezi s tem smo morali zavodom še predlagati, naj se prouči možnost za nabavo dodatne opreme za fitness, ki ga uporabljajo priponiki, saj je bil tudi ta v slabem stanju, oprema pa pomanjkljiva. Oddelek Nova Gorica ZPKZ Koper pa smo lahko pohvalili za prizadevanje, da se priponikom omogoči več bivanja zunaj bivalnih prostorov.

In several locations, we heard praise for the personnel, particularly in the Slovenska vas Semi-open Prison Section of ZPKZ Dob pri Mirni, ZPMZ and KZ Celje and the Rogoza Open Prison Section of ZPKZ Maribor. This assured us that a respectful attitude to imprisoned persons is possible also when working in ZKPZ. Complaints were received only from PD Radeče and ZPKZ Koper concerning the attitude of judiciary police officers towards imprisoned persons, which included irregularities such as informal address and similar, but serious violations of human dignity were not found anywhere.

We were pleased to learn that several DPM recommendations had been implemented, such as: in the Murska Sobota Section of ZPKZ Maribor, badly sealed windows and dents in the walls caused by installation replacement had been repaired; in the Ig Open Prison Section of ZPKZ Ljubljana, the showers had been repainted and excess packaging removed from accommodation rooms; in the Rogoza Open Prison Section of ZPKZ Maribor, accommodation rooms in the new facility and the dining room, the rooms for visits and the library had been repainted, and the rooms were well-heated at the time of the visit. In PD Radeče, wooden sticks had been removed from the isolation rooms; in ZPKZ Ig, all accommodation rooms have been numbered, separate rooms provided for compliance detention and the rooms of all units repainted; a similar situation was found elsewhere. All of the above indicates that the proposals of the DPM to improve living conditions at the places of detention visited are being considered, which is encouraging and at the same time justifies the purpose of our operation.

On the other hand, it was established several times that the material conditions for imprisoned persons were mostly poor (primarily in the Nova Gorica Section of ZPKZ Koper and in ZPKZ Ljubljana). The institutions could eliminate more irregularities only by showing more self-initiative. In several cases, we proposed that painting be done whenever necessary, i.e. outside the regular plan (Nova Gorica Section of ZPKZ Koper, ZPKZ Koper, Murska Sobota Section of ZPKZ Maribor ...), and damaged inventory be repaired more promptly (e.g. ZPKZ Koper, ZPKZ Ljubljana, PD Radeče, Rogoza Open Prison Section of ZPKZ Maribor, Ig Open Prison Section of ZPKZ Ljubljana, Slovenska vas Semi-open Prison Section of ZPKZ Dob pri Mirni ...). In two cases (Murska Sobota Section of ZPKZ Maribor and Nova Gorica Section of ZPKZ Koper), conditions could be improved simply by removing excess furniture, creating more useful space in each room and reducing the feeling of confinement.

As happened many times before, this year we also frequently established that isolation rooms were inadequately fitted (Nova Gorica Section of ZPKZ Koper, ZPKZ Ljubljana, PD Radeče, Murska Sobota Section of ZPKZ Maribor, ZPKZ Ig). Unfortunately, in this regard, we have mostly received explanations from GUURSIKS saying that a lack of funds prevented them from correcting the problem. We believe that such improvements should not be postponed.

Some deficiencies were also established concerning stays outdoor and the possibilities imprisoned person to engage in physical activities. The Murska Sobota Section of ZPKZ Maribor still has no place for recreation that does not depend on weather conditions; therefore, we suggested they organise at least a smaller fitness facility. ZPKZ Ljubljana has still not constructed a projecting roof above the internal promenade, which would allow detained persons to be outside when the weather is bad. In this regard, we suggested the institutions consider the purchase of additional fitness equipment used by the detained persons, as the fitness centre was in a poor condition and the equipment was deficient. We commended the Nova Gorica Section of ZPKZ Koper for their efforts to offer detained persons a prolonged stay outside the accommodation rooms.

V zvezi z zagotavljanjem pravice do dela zaprtim osebam je treba tokrat kot svetla primera izpostaviti predvsem Odprt oddelek Rogoza ZPKZ Maribor, ki je tudi tokrat zagotavljal delo vsem zaprtim osebam, ki so to želele, in Polodprt oddelek Slovenska vas ZPKZ Dob pri Mirni, ki je zagotavljal delo večini obsojencev. Precej spodbudno je na tem področju kazalo tudi v ZPKZ Ljubljana, ki je delo zagotavljal večini obsojencev, žal pa ne vsem, ki bi to želeli. V ZPKZ Ig se je stanje od prejšnjega našega obiska precej izboljšalo, sprejemljivo pa je bilo tudi v Oddelku Nova Gorica ZPKZ Koper. V Oddelku Murska Sobota ZPKZ Maribor in ZPKZ Ljubljana smo morali sicer predlagati, da se še več dejavnosti za zaposlitve zaprtih oseb usmeri v priporne.

Glede omogočanja izobraževanja zaprtim osebam smo lahko pohvalili predvsem prizadevanje Oddelka Nova Gorica ZPKZ Koper, čeprav smo morali v matičnem zavodu (ZPKZ Koper) predlagati, da v izobraževanje poskušajo pritegniti več zaprtih oseb. Podobno smo na Odprtem oddelku Rogoza ZPKZ Maribor in Oddelku Murska Sobota ZPKZ Maribor predlagali, naj poskušajo organizirati še več vsaj krajsih oblik izobraževanja za zaprte osebe.

Glede knjižničnih storitev za zaprte osebe smo posebej pohvalili ZPKZ Koper, v katerem ima obsojenec, ki skrbi za knjižnico, nalogu, da izdela povzetke vsebine knjig, ki bodo prav priše predvsem zaprtim osebam, ki iz takega ali drugačnega razloga same ne morejo v knjižnico. Takšen pristop bi bil dobrodošel tudi v drugih zavodih, delo v knjižnici pa bi bilo tudi vsebinsko bogatejše.

Kot vselej smo tudi v letu 2011 občasno naleteli na pritožbe zaprtih oseb glede (pre)hrane (na primer ZPKZ Ig, Oddelek Nova Gorica ZPKZ Koper), vendar nismo ugotovili nobenih nedopustnosti. V ZPKZ Ljubljana so se pritoževali nad visokimi cenami v zavodski kantini. Na podlagi našega opozorila je zavod nato potrdil, da je med na novo uvedenim tedenskim pregledom cen ugotovil, da so cene nekaterih izdelkov višje, kot so bile navedene v ponudbenem predračunu.

Zaznali smo tudi več težav v zvezi z zdravstveno oskrbo, izpostavljamo le nekaj najbolj izstopajočih. V ZPKZ Ig smo ugotovili, da se pojavljajo težave glede zdravstvenega zavarovanja otrok, ki se rodijo tujkam in nimajo očeta. V drugem primeru je izvedenka ugotovila, da v ZPKZ Dob pri Mirni sočasno predpisujejo substitucijsko terapijo in benzodiazepine, česar po doktrini ne bi smeli, razen v določenih izjemnih primerih. Zaradi pritoževanja zaprtih oseb v Oddelku Murska Sobota ZPKZ Maribor o dolgorajnosti dostopa do zdravnika pa smo preverili tudi navzočnost zdravstvenega osebja in poudarili, da mora osebje takoj posredovati potrebo po zdravniški pomoči.

Kadrovska zasedba v zavodih po naši presoji vselej ni bila zadovoljiva. Tako smo za Oddelek Murska Sobota ZPKZ Maribor, Oddelek Nova Gorica ZPKZ Koper in PD Radeče predlagali zaposlitev pedagoga, za Odprt oddelek Rogoza ZPKZ Maribor in ZPKZ Koper pa psihologa.

Ugotavljali smo tudi, da v vseh zavodih oziroma na oddelkih še vedno ne izpeljujejo disciplinskih postopkov, čeprav pri zaprtih osebah še vedno prihaja do disciplinskih kršitev (na primer ZPKZ Ljubljana, Oddelek Murska Sobota ZPKZ Maribor). Kakor smo že poudarili v preteklosti, je prav, da se izpelje ustrezni disciplinski postopek, v katerem se ugotavlja očitana kršitev. Tako bo manj možnosti za arbitrarno odločanje in zagotovljenih več možnosti za objektivni nadzor sprejetih odločitev.

As an exception related to providing rights to work for imprisoned persons, the Rogoza Open Prison Section of ZPKZ Maribor should be emphasised, which has once again provided work for all imprisoned persons who wanted to work, and the Slovenska vas Semi-open Prison Section of ZPKZ Dob pri Mirni, which provided work for the majority of convicts. In this area, the situation was rather encouraging also in ZPKZ Ljubljana, which provided work for the majority of convicts, but not for all who wanted it. The situation in ZPKZ Ig has improved considerably since our last visit, and the situation in the Nova Gorica Section of ZPKZ Koper was also acceptable. We had to suggest to the Murska Sobota Section of ZPKZ Maribor and to ZPKZ Ljubljana that they offer more working activites to detained persons.

In respect of providing education to imprisoned persons, we could commend the efforts of the Nova Gorica Section of ZPKZ Koper, although we had to suggest to the main institution (ZPKZ Koper) that it attract more imprisoned persons to education. We made a similar proposal to the Rogoza Open Section of ZPKZ Maribor and Murska Sobota Section of ZPKZ Maribor, suggesting they organise more, at least short forms of education for imprisoned persons.

With respect to library services for imprisoned persons, we particulary commended ZPKZ Koper, in which the convict taking care of the library must prepare summaries of the books which would be useful for imprisoned persons who, for some reason or other, cannot come to the library. Such an approach would also be welcome in other institutions, thereby enriching the work in the library.

As always, in 2011 we occasionally encountered complaints regarding food (e.g. ZPKZ Ig, the Nova Gorica Section of ZPKZ Koper); however, we did not find any unacceptable conditions. In ZPKZ Ljubljana, complaints were made regarding high prices in the institution's canteen. Based on our warning, the institution confirmed that the newly introduced weekly inspection showed that the prices of some products were higher than listed in the estimate in the offer.

We also detected several problems related to health care; some of the more outstanding are indicated below. In ZPKZ Ig, we found that there were problems related to the health care of children who are born to foreigners and have no known father. In another case, the expert found that in ZPKZ Dob pri Mirni, substitution therapy and benzodiazepines were prescribed simultaneously, which is contrary to medical practice and should not be done except in exceptional cases. Because of complaints from imprisoned persons in the Murska Sobota Section of ZPKZ Maribor concerning long waits to see the doctor, we also inspected the presence of medical staff and emphasised that they should immediately communicate the need for medical attention.

In our view, staffing in the institutions is not always satisfactory. In the Murska Sobota Section of ZPKZ Maribor, Nova Gorica Section of ZPKZ Koper and in PD Radeče, we proposed they employ a teacher, and in the Rogoza Open Prison Section of ZPKZ Maribor and in ZPKZ, they should employ a psychologist.

We also established that not all institutions or sections performed disciplinary proceedings, despite the fact that imprisoned persons still committed disciplinary breaches (for example, in ZPKZ Ljubljana and Murska Sobota Section of ZPKZ Maribor). As emphasised in the past, proper disciplinary proceedings to establish alleged breaches should be conducted. This will reduce arbitrary decision-making and provide more possibilities for an objective oversight of adopted decisions.

Obiski policijskih postaj

V letu 2011 smo obiskali 19 policijskih postaj po Sloveniji (PPIU Kranj, PP Bled, PP Idrija, PP Tolmin, PP Jesenice, PP Kranj, PP Izola, PP Koper, PP Ptuj, PPIU Murska Sobota, PP Lenart, PP Šentilj, PP Cerknica, PP Ilirska Bistrica, PP Škofja Loka, PP Grosuplje, PP Ribnica, PP Gornja Radgona ter PP Ruše). Ob obiskih smo zopet opazili, da so bili policisti dobro seznanjeni z našim nalogami in pooblastili, tako da je naše delo potekalo nemoteno. Vsi obiski so bili nenapovedani. Po vsakem obisku je skupina pripravila poročilo o ugotovitvah s priporočili, ki je bilo poslano Ministrstvu za notranje zadeve (MNZ) in zadevni Policijski postaji (PP), kjer je bil opravljen nadzor.

Poročila so nastala na podlagi pregleda prostorov za pridržanje, pogovora z vodstvom PP, pogovora s pridržanimi osebami ter na podlagi pregleda dokumentacije, povezane s pridržanjem oseb. MNZ se je redno odzivalo na naša poročila in se v večini primerov strnjalo z našimi ugotovitvami ter nam zagotovilo, da so nekatere pomanjkljivosti že odpravili oziroma da so predvidene izboljšave.

Obiski PP so še naprej potekali po ustaljenem zaporedju: najprej je skupina, ki so jo sestavljali predstavniki Varuha in predstavniki ene, dveh ali treh pogodbenih nevladnih organizacij, opravila ogled vseh prostorov za pridržanje, vključno s pomožnimi prostori (prostori za sprejem, za tujce in odvetnika, skladišče, prostor za prehod).

Pri splošnem pregledu PP smo pogledati tudi parkirne prostore za stranke, označenost parkirnih prostorov in ustrezni dostop za invalidne osebe, garderobne prostore za policiste ter morebitno ločenost za moške in ženske.

Nato je sledil ogled intervencijskih vozil, če so bila med našim obiskom na PP, potem je bil na vrsti pogovor z vodstvom PP (največkrat s komandirjem, pomočnikom komandirja ali z dežurnim policistom), ko smo pregledali tudi dokumentacijo pridržanj naključno izbranih primerov (spisov). Ob vsakem obisku smo pridobili tudi statistične podatke o številu pridržanih in zadržanih oseb po Zakonu o nadzoru državne meje na obiskanih PP v letu 2011 (od leta 1. 1. do dneva obiska).

Osnovni podatki o prostorih za pridržanje

Število prostorov za pridržanje se razlikuje po PP, ki imajo od enega do šest prostorov za pridržanje, za krajsa in za daljša pridržanja. Na nekaterih PP imajo prostore za pridržanje, vendar jih zaradi različnih razlogov ne uporabljajo (PP Jesenice, PP Bled in PP Koper). V takih primerih uporabljajo prostore za pridržanje na drugih PP.

Dostop do prostorov za pridržanje je v nekaterih primerih mogoč neposredno čez dvorišče (z intervencijskim vozilom). Le na eni PP (PP Koper), kjer so prostori za pridržanje v pritličju, je dostop skozi glavna vrata mimo dežurnega policista.

Ob ogledu prostorov za pridržanje smo se osredotočili na ustrezno opremljenost, označenost in velikost prostorov, ustrezno osvetlitev (dnevna in umetna svetloba), primerno temperaturo in prezračevanje prostorov ter čistočo, sanitarije, dostop do pitne vode, oskrbe s hrano, videonadzor prostorov in klicno možnost, opremljenost prostorov z informacijami in brošurami o pravicah pridržanih oseb, možnost za gibanje na prostem ter možnost kajenja (in bivanja v sobah brez kajenja), urejenost pritožbenih poti in (ne)primerno pokritost sanitarnih prostorov z videonadzornim sistemom.

Visits to police stations

Nineteen police stations in Slovenia were visited in 2011 (PPIU Kranj, PP Bled, PP Idrija, PP Tolmin, PP Jesenice, PP Kranj, PP Izola, PP Koper, PP Ptuj, PPIU Murska Sobota, PP Lenart, PP Šentilj, PP Cerknica, PP Ilirska Bistrica, PP Škofja Loka, PP Grosuplje, PP Ribnica, PP Gornja Radgona and PP Ruše). During the visits, we observed again that police officers were well-informed of our duties and powers, which enabled smooth operations. All visits were unannounced. After each visit, the group prepared a report on the findings, with recommendations sent to the Ministry of the Interior (MNZ) and visited police station (PP) for information.

The reports were prepared on the basis of examinations of detention rooms, an interview with the PP management, an interview with detained persons, and on the basis of reviewing documents related to the detention of persons. MNZ regularly responded to our reports and, in the majority of cases, agreed with our findings and assured that some deficiencies had already been eliminated or that improvements were planned.

Visits to PPs were conducted according to the established order: first, the representatives of the Ombudsman and of one, two or three contractual organisations performed an examination of all detention rooms, including auxiliary rooms (reception area, room for foreigners, for the lawyer, warehouse, recreation yard).

In the general examination of the PP, we also checked parking space for clients, the signage of parking and appropriate access for the disabled, changing rooms for police officers and potential separation of men and women.

An inspection of intervention vehicles, if they were present during our visit to the PP, was carried out first, followed by the review of documentation (files) of randomly selected cases of detention and interview with the PP management (mostly with the commander, assistant commander or duty officer). On each visit, we also obtained statistical data on the number of detained and persons held under the State Border Control Act at the visited PP in 2011 (from 1 January to the date of the visit).

Basic information on detention rooms

Among PPs, the number of detention rooms varies from one to six, for shorter and longer periods of detention. Some PPs have detention rooms, but for different reasons, these are not used (PP Jesenice, PP Bled and PP Koper). Detention rooms at other PPs are used for such cases.

In some cases, access to detention rooms is possible directly across a courtyard (in an intervention vehicle). In one PP (PP Koper), where the detention rooms are located on the ground floor, access is through the main door and past the duty officer.

In examining the detention rooms, our focus was primarily on proper equipment, the labelling and size of rooms, proper lighting of rooms (daylight and artificial light), proper temperature, ventilation and cleanliness of rooms, toilets, access to drinking water, food supply, video-surveillance of rooms and the option to make telephone calls, equipment of rooms with information and brochures on the rights of detained persons, the possibility for outdoor exercise and smoking (and staying in non-smoking rooms), regulation of complaints channels and (im)proper video-surveillance of toilets.

Opremljenost prostorov

Prostori za pridržanje so večinoma ustrezeno opremljeni (WC). Ležišča so praviloma lesena in opremljena s PVC-žimnicami in posteljnino, ki jo oseba dobi ob prihodu (odeje ali posteljnina za enkratno uporabo). Posteljnina je običajno shranjena v posebnem prostoru oziroma skladišču.

Kot primer dobre prakse je DPM izpostavil:

- Namestitev varnejše vodovodne pipe, ki je povsem ravna s steno in deluje na pritisk (PP Kranj). Dober način shranjevanja zaseženih primerov na PP Kranj, kjer imajo za vsak prostor za pridržanje tudi pripravljeno večjo plastično posodo, v kateri se hranijo zaseženi predmeti pridržane osebe. V omari na označeni polici pa imajo večjo vrečo s pripravljeno posteljnino, odejo in vzglavnikom. Primer dobre prakse hranjenja zaseženih predmetov je tudi na PP Ptuj, kjer imajo šest manjših omar, označenih s številkami od ena do šest (na PP imajo šest prostorov za pridržanje).
- Treba je pohvaliti, da je bilo na PP Ilirska Bistrica upoštevano priporočilo DPM od zadnjega obiska, saj sta bili v prostor za krajše pridržanje nameščeni žimnici.

DPM je ob obiskih opozoril tudi na nekatere pomanjkljivosti:

- Umazane stene v prostorih za pridržanje (PP Ptuj) in v prostorih za pogovore oziroma za zaslišanje (PP Jesenice, PP Ribnica). Velja pa pohvaliti, da so bili prostori za pridržanje na PP Cerknica v nasprotju z zadnjim obiskom čisti.
- Pritisk vode v umivalniku je prevelik, saj je ob pritisku na gumb voda pritekla tako močno, da je škropila zunaj umivalnika, tudi po leseni postelji, ki je v neposredni bližini (PP Kranj).
- Kot pomanjkljivost štejemo tudi, da nekateri prostori za pridržanje nimajo dostopa do tekoče vode (PP Idrija, PP Ptuj in PP Škofja Loka), zato jo policisti dostavljajo v plastičnih kozarcih. Predlagali smo, naj se to v čim krajšem času spremeni in pridržanim osebam omogoči stalen dostop do pitne vode v prostoru za pridržanje.
- Tri PP (Idrija, Tolmin in Lenart) kot ene redkih nimajo rjuh in vzglavnikov. Na PP Koper so jih imeli, vendar jih pridržanim osebam niso izročili, če so bile pridržane za krajši čas. DPM je predlagal, da se na PP rjuhe in vzglavniki dostavijo čim prej ter da se pridržanim osebam izroči vzglavnik, predvsem če so pridržane čez noč.

Osvetljenost prostorov za pridržanje

Pri pregledu vseh 19 PP smo samo na PP Kranj ugotovili, da v prostorih za pridržanje ni ustrezne dnevne svetlobe. Prostori za pridržanje imajo zgolj manjšo režo (širine približno 15 centimetrov in dolžine 1,5 metra) za dostop dnevne svetlobe.

Na petih PP (PP Koper, PP Ptuj, PP Škofja Loka, PP Lenart ter PP Ruše) je bilo ugotovljeno, da umetne svetlobe ni mogoče uravnavati (zmanjšati oziroma zvišati jakost svetlobe). Ker je prižgana umetna luč lahko moteča pri pridržanjih v nočnem času, je DPM predlagal, da se prouči možnost namestitve stikal za uravnavanje jakosti svetlobe. MNZ se je v odzivnih poročilih zavezal, da bo proučil možnost namestitev takšnih stikal.

Equipment in rooms

The detention rooms are generally adequately equipped (toilets). Beds are typically wooden and equipped with PVC mattresses and bedding which the person receives upon arrival (blankets or disposable bedding). The bedding is usually stored in a special room or warehouse.

As a good practice example, the DPM pointed out:

- Installation of a safer tap which is flush with the wall and operated by pressure (PP Kranj). A good method of keeping items confiscated from the detained person is used in PP Kranj, where each detention room has a large plastic container holding these items. There is a larger bag containing bedding, a blanket and a pillow prepared on the labelled shelf in the cabinet. PP Ptuj also has a good practice example for keeping confiscated items in six smaller cabinets numbered from one to six (the PP has six detention rooms).
- It is commendable that PP Ilirska Bistrica implemented the DPM recommendation from the previous visit and installed mattresses in the room for shorter detention.

During its visits, the DPM also warned of several deficiencies:

- Dirty walls in detention rooms (PP Ptuj) and in rooms for discussions or interrogation (PP Jesenice, PP Ribnica). It is commendable that, unlike on the previous visit, the detention rooms in PP Cerknica were clean.
- Water pressure in the sink is too high, as the current upon pressing the button was so strong that the water splashed outside the sink, even onto the wooden bed located in the vicinity (PP Kranj).
- It is also considered a deficiency that some detention rooms have no access to running water (PP Idrija, PP Ptuj in PP Škofja Loka), so police officers provide it in plastic glasses. We proposed they change this as soon as possible and provide detained persons in detention rooms with constant access to drinking water.
- Three PPs (Idrija, Tolmin and Lenart) were among the rare ones not having sheets and pillows. PP Koper had them, but detained persons did not receive them if they were detained for a shorter period only. The DPM proposed that sheets and pillows be delivered to PPs as soon as possible, and that detained persons should receive a pillow, in particular when detained overnight.

Lighting in detention rooms

In examining all 19 of the PPs, only PP Kranj was established to have no proper daylight in detention rooms. The detention rooms have only a smaller slot (approximately 15 centimetres wide and 1.5 metre long) which admits daylight.

In five PPs (PP Koper, PP Ptuj, PP Škofja Loka, PP Lenart and PP Ruše), we established that artificial light cannot be adjusted (the intensitiy of light cannot be reduced or enhanced). Because artificial light might be disturbing for night detentions, the DPM suggested considering the option of installing switches for light intensity regulation. In its response reports, MNZ committed to considering the option of installing such switches.

Čistost prostorov

Policjske postaje imajo zaposleno čistilko oziroma sklenjeno pogodbo s čistilnim servisom. Razen umazanih sten v prostorih za pridržanje (PP Ptuj) in v prostorih za pogovore oziroma za zaslišanje (PP Jesenice, PP Ribnica) so prostori bili čisti. Pohvaliti je treba, da so bili prostori za pridržanje na PP Cerknica v nasprotju z zadnjim obiskom čisti in da so na PP Ribnica prostor za pridržanje številka 1 prepleskali.

Sanitarije

Sanitarije so bile ustrezeno urejene: WC-školjka v prostorih za daljše pridržanje in WC-počepnik z izplakovanjem v prostorih, ki so namenjeni krajsemu pridržanju.

Video- in zvočni nadzor

Pravilnik o policijskih pooblastilih določa, da mora policist, ki izvaja pridržanje, poskrbeti za varnost pridržane osebe, od njene namestitve v prostor za pridržanje do izpustitve. Za nadzorovanje pridržanih oseb lahko policist po tem Pravilniku uporablja naprave za prenos zvočnih in slikovnih znakov. Uporaba teh naprav mora biti v prostoru vidno označena. Pravilnik pri tem jasno določa, da nadzor s tehničnimi sredstvi ne izključuje neposrednega fizičnega nadzora.

Zgolj na eni PP (PP Koper) je bilo ugotovljeno, da zorni kot videonadzornega sistema v prostorih za pridržanje obsega tudi toaletni del prostora za pridržanje, kar je v nasprotju z Normativi o gradnji, adaptaciji in opremi prostorov za pridržanje. Na to smo opozorili in predlagali, da se zaradi pravice do zasebnosti napake odpravijo. V odzivnem poročilu je MNZ zagotovilo, da so na kamери takoj pokrili del, ki nadzira predel s sanitarijami, z ustreznim posegom pa bodo navedeno uredili tako, kot je določeno v Normativih za gradnjo, adaptacijo in opreme prostorov za pridržanje.

Na eni PP (PP Idrija) je bil med obiskom DPM pokvarjen videonadzorni sistem v prostorih za pridržanje. Sogovornik je pojasnil, da je odprava napake že naročena. DPM je že med obiskom predlagal, da zato dežurni policist ob pridržanjih opravi pogosteji nadzor pridržane osebe in da pričakuje, da bodo napake na videonadzornem sistemu odpravili čim prej.

Večina PP ima v svojih prostorih za pridržanje videonadzor in klicni zvonec, vendar opozorilo (nalepka) o govorni napravi ponekod ni bilo označeno (PP Ptuj, PP Šentilj in PP Jesenice). Naš predlog, da naj PP zagotovijo opozorilo (nalepko) tudi v prostorih za pridržanje, je MNZ sprejelo in zagotovilo, da bo to uredilo oziroma je že uredilo.

Pohvaliti velja PP Škofja Loka, ki je upoštevala priporočilo DPM od zadnjega obiska, da je treba v prostor za krajsa pridržanja namestiti ustrezeno obvestilo za govorno napravo.

Prehrana in voda

Večina PP zagotavlja pridržanim osebam hrano v obliki t. i. »lunch paketov«, ki jih je več vrst, med njimi tudi posebni za vegetarijance, katerih rok uporabnosti je ustrezen. Večina PP (ki izvaja daljša pridržanja) ima sklenjene pogodbe o dostavi hrane iz bližnjih gostiln (zlasti v primeru pridržanja do 48 ur).

DPM pozdravlja, da je PP Ribnica upoštevala predlog in priskrbela plastenke za vodo. Predlagali smo, naj se tudi to čim prej spremeni in pridržanim osebam omogoči stalen dostop do pitne vode v prostoru za pridržanje.

Cleanliness of rooms

Police stations employ a cleaner or have contracts with a cleaning service. Except for the dirty walls in detention rooms (PP Ptuj) and in rooms for discussions or interrogation (PP Jesenice, PP Ribnica), the rooms were clean. It is commendable that the detention rooms in PP Cerknica were clean, unlike on the previous visit, and that detention room no. 1 in PP Ribnica had been repainted.

Toilets

The toilets were adequately arranged: the toilet bowl in the rooms for longer detention, and squat toilet with flushing in the rooms for shorter detention.

Video- and audio-surveillance

The Rules on police powers specify that police officers conducting detention must provide for the security of the detained person from the time they are placed in the detention room until they are released. According to these Rules, the police officer may use devices for audio and video signal transmission to supervise detained persons. Use of these devices must be clearly indicated in the room. The Rules clearly specify that surveillance using technical means does not exclude direct physical surveillance.

Only in one PP (PP Koper) was it established that the viewing angle of the video surveillance system in detention rooms also includes the toilet, which is in violation of the Standards on the Construction, Adaptation and Equipment of Detention Rooms. We pointed this out and proposed the deficiencies be eliminated to allow the right to privacy. In its response report, MNZ assured us they had immediately covered the part of the camera surveilling the toilet area, and would take further measures to arrange the situation as specified in the Standards on the Construction, Adaptation and Equipment of Detention Rooms.

In one PP (PP Idrija), the video surveillance system in detention rooms was out of order at the time of the DPM visit. Our discussion partner explained that they had already ordered the repair. The DPM suggested during the visit that the duty officer perform more frequent supervision of the detained person during detention and expected that the deficiency of the video-surveillance system would be eliminated as soon as possible.

The detention rooms of the majority of PPs are equipped with video-surveillance and a bell, but in some places there was no warning (notice) about the audio device (PP Ptuj, PP Šentilj and PP Jesenice). Our proposal for the PP to provide a warning (a notice) also in detention rooms was accepted by MNZ, who also assured us they would or had already done so.

PP Škofja Loka, which implemented the DPM recommendation from the previous visit and fitted the room for shorter detentions with a relevant notice of the audio device, should be commended.

Food and water

The majority of PPs provide detained persons with food in the form of different types of lunch packages, including those for vegetarians; the expiry date was acceptable. The majority of PPs (conducting longer detentions) have contracts for food supply with nearby restaurants (particularly for detentions up to 48 hours).

The DPM welcomes the fact that PP Ribnica considered the proposal and provided water bottles. We proposed they also change this as soon as possible and provide detained persons in detention rooms with constant access to drinking water.

Zdravstvena oskrba pridržanih oseb

PP zdravniško pomoč zagotavljajo tako, da pridržano osebo odpeljejo v bližnji zdravstveni dom, ki ima zagotovljeno 24-urno dežurstvo, oziroma da pride zdravnik na PP.

Intervencijska vozila

Pri pregledu dveh PP (Kranj in Izola) smo ugotovili, da je prostor za prevoz pridržanih oseb umazan. Drugače so bili prostori čisti. DPM je predlagal, da je treba prostor očistiti in v prihodnje bolj redno skrbeti za čistočo. Vsa vozila so imela za sedalnim delom režo, ki omogoča, da se lahko pridržana oseba med prevozom prime tudi, ko ima roke spete z lisicami.

Pri ogledu intervencijskega vozila na PP Izola smo opazili na lesenem sedalnem delu vozila rjav madež (pri čiščenju tega z mokrim papirjem je bilo ugotovljeno, da gre za kri). Policišti so še pred časom opravili intervencijo, v kateri je bilo odrejeno pridržanje osebe, ki je bila poškodovana po rokah. To kaže na to, da so bili ostanki krvi očitno v intervencijskem vozilu kar nekaj časa. DPM je opozoril, da mora biti prostor, kjer se prevažajo pridržane osebe, čist in da se mora v prihodnje redno preverjati čistost prostora, še posebej ko se v prostorih za prevoz oseb prevaža oseba, ki je poškodovana (ki krvavi).

Sprehajališča

Ta so namenjena sprehajjanju pridržanih oseb in kajenju. Večina PP nima posebnega sprehajališča, kar ni ustrezno predvsem na PP, kjer imajo tudi prostore za daljše pridržanje. Zato uporabljajo dvorišča PP in zagotovijo tudi spremstvo oziroma osebni nadzor.

Sprehajališča so večinoma primerno velika, razlikujejo pa se v pokritosti (večinoma so nepokrita) in ograjenosti (ograjena z ograjo, neograjena). DPM pozdravlja sprehajališče na PP Ilirska Bistrica, kjer je sprehajališče tudi delno pokrito, kar zagotavlja pridržanim osebam sprehajanje tudi ob slabem vremenu.

Opremljena so z videonadzorom in v večini primerov so čista.

Prostor za odvetnike

Policiske postaje imajo ali poseben prostor za odvetnike ali pa za to uporabljajo druge prostore (prostor za sprejem pridržane osebe, za zaslisanje, delovne sobe za policiste). V nekaterih PP je oprema v teh prostorih pomanjkljiva (ni mize, stola), zato smo predlagali namestitev potrebne opreme za pogovor med odvetnikom in stranko.

Poleg seznama odvetnikov, ki je objavljen na spletni strani policije, imajo vse PP, razen PP Grosuplje, seznam odvetnikov tudi v tiskani obliki. Na PP (Lenart in Bled), kjer je bil seznam odvetnikov starejšega datuma, je DPM predlagal, da se natisne nove in da se ta redno obnavlja. Na PP Gornja Radgona, kjer seznam odvetnikov ni bil datumsko označen, pa je DPM predlagal, da se namesti nov seznam z datumom in da se tudi ta v prihodnje redno obnavlja.

Pohvalno je upoštevanje priporočila DPM z zadnjega obiska o namestitvi natisnjenega seznama odvetnikov, ki se po pojasnilu sogovornika redno obnavlja (PP Škofja Loka). Na drugi strani pa nekatere PP niso upoštevale priporočila DPM z zadnjega obiska. Tako ni bilo na primer upoštevano priporočilo, da se seznam odvetnikov namesti tudi v prostor za sprejem in pogovor s pridržano osebo (PP Ribnica). DPM v tovrstnih primerih znova predlaga, da se priporočilo upošteva (da se v prostor za sprejem in pogovor s pridržano osebo namesti seznam odvetnikov).

Health care of detained persons

Medical attention is provided by taking the detained person to the nearby 24-hour health care centre, or a doctor comes to the PP.

Vehicles for transporting detainees

While examining two PPs (Kranj and Izola), we observed that the place where detained persons were transported was dirty. Otherwise, rooms were clean. The DPM proposed that the place be cleaned and kept clean in the future. Behind the cab, all vehicles were equipped with a slot allowing the detained person to hold on even in handcuffs.

When examining the intervention vehicle in PP Izola, we observed a brown stain on the wooden seating part (after cleaning it with wet paper, it was established to be blood). Some time ago, police officers had intervened in a case when the detention of a person with hand injuries was ordered. This indicates that blood stains had remained in the intervention vehicle for quite some time. The DPM pointed out that the space where detained persons are transported must be clean and that it should be regularly inspected in future, particularly when an injured (bleeding) person is being transported.

Recreation areas

These are intended for the walks of detained persons and smoking. The majority of PPs do not have a special walking area, which is particularly inadequate for PPs with rooms for longer detention. For this purpose, they use the PP courtyard and provide an escort or personal surveillance.

The walking areas are mostly of suitable size, but they vary in terms of coverage with roofing (mostly uncovered) and enclosure (enclosed with a fence, unenclosed). The DPM welcomes the walking area in PP Ilirska Bistrica, which is also partially covered, allowing detained persons to walk around even in bad weather.

The recreation areas are equipped with video-surveillance and mostly clean.

Room for lawyers

Police stations have either a special room for lawyers, or other rooms are used for this purpose (reception room for detained persons, interrogation room, studies for police officers). In some PPs, equipment in these rooms is insufficient (no table, no chair); therefore, we suggested the installation of adequate equipment intended for discussions between lawyers and clients.

In addition to the list of lawyers published on the police website, all PPs except PP Grosuplje have the list of lawyers in printed form. In PPs (Lenart and Bled) where the list of lawyers was out of date, the DPM proposed they print a new one and keep it updated. In PP Gornja Radgona, where the date was missing on the list of lawyers, the DPM suggested they place a new list of lawyers marked with a date and update it regularly.

The implementation of the DPM recommendation from the previous visit to place a printed list of lawyers, which according to the discussion partners is regularly updated, is commendable (PP Škofja Loka). On the other hand, some PPs failed to observe the DPM recommendation from the previous visit. For example, the recommendation to place the list of lawyers in the reception and interrogation rooms was not observed (PP Ribnica). In such cases, the DPM again suggests that the recommendation be observed (that the list of lawyers be placed in the reception and interrogation rooms).

Prostor za tujce

Večinoma so bili prostori primerno čisti in opremljeni, vključno s plakatom o pravicah pridržanih oseb v več jezikih, z brošuro o pravicah oseb, ki jim je bila odvzeta prostost, v več jezikih in raznimi zloženkami (UNHCR, PIC). Postajam, na katerih tega nismo zasledili (PP Koper), smo predlagali, da zagotovijo plakate in brošure.

Seznanjenost pridržanih oseb z njihovimi pravicami

Policija je pred leti izdala brošuro z obvestilom o pravicah osebe, ki ji je bila odvzeta prostost, v več jezikih in jih imajo v vseh PP. Na nekaterih PP pa žal niso na mestu, kjer bi bila najbolj potrebna (prostori in predprostori za pridržanje, prostori za tujce), in zato je minilo nekaj časa, da so policisti brošuro sploh našli. Tako smo jo na PP Koper pogrešali v prostoru za tujce in tudi predlagali, da jo zagotovijo čim prej. Podobno je bilo na PP Grosuplje.

Seznanjenost s pravicami se zagotavlja tudi s plakati z obvestilom o prijetju zaradi odvzema prostosti, kar je pohvalno, vendar bi jih bilo treba v večini primerov zamenjati z novejšo različico, ker zdajšnja ne vsebuje pravice do zdravnika po lastni izbiri. Kot primer dobre prakse je PP Škofja Loka, ki je zadevo rešila z dodatnim pripisom pravice do proste izbire zdravnika na plakat. DPM je tako rešitev informiranja pridržanih oseb z odobravanjem sprejel in hkrati predlagal, da se to prenese tudi na druge PP.

Prav tako bi bili lahko plakati nameščeni v prostorih, kjer se pridržane osebe zadržujejo največ časa. Če so samo na hodnikih, dvomimo, da se pridržanim omogoča, da se seznanijo z vsebinou.

Varuh človekovih pravic RS je kot izvajalec DPM v letu 2011 razposlal na vse PP tudi brošure in plakate o DPM. Na večini PP brošur nismo zasledili, izpostavljamo pa PP Gornje Radgono, ki je imela brošure DPM v prostoru za pogovor s strankami in PP Grosuplje, ki je imela v sobi za pogovore nalepljen plakat o DPM.

Dokumentacija

Pregled dokumentacije je pokazal, da je ta večinoma skrbno urejena, smo pa klub temu opazili nekatere nedoslednosti, netočnosti in nepravilnosti pri izpolnjevanju podatkov v dokumentaciji:

- Na potrdilu o zaseženih predmetih ni podatka o uri zasega predmetov (PP Tolmin).
- Na potrdilu o zaseženih predmetih je bilo ugotovljenih več nepravilnosti: potrdilo je oseba podpisala, kot opombo pa je policist napisal, da je pridržana oseba podpis odklonila brez razloga; na potrdilu ni bila zapisana ura vrnitve predmetov; v delu potrdila »zaključeno pod zaporedno številko« je številka 9, čeprav je bilo zaseženih 10 predmetov (kje?).
- Pri izpolnjevanju uradnega zaznamka o pridržanju je bilo ugotovljeno, da so bili podatki na obrazcu uradnega zaznamka o pridržanju popravljeni s »korektorjem«. Ker gre za uradni dokument, je DPM menil, da je taka praksa neprimerna. DPM je predlagal, da se v takšnih primerih morebitni popravki zapišejo tako, da bo viden prejšnji podatek. Podatek pa naj s podpisom potrdi policist, ki je podatek popravil (PP Idrija). Podobno je bilo na PP Koper, kjer so bili na potrdilu o zaseženih predmetih opravljeni popravki brez podpisa policista, ki jih je popravil. Tudi tu je DPM predlagal, da se morebitni popravki označijo tako, da bo viden prejšnji podatek.

Room for foreigners

The rooms were mostly appropriately clean and equipped, including a poster and brochure in several languages on the rights of persons deprived of liberty, and various leaflets (UNHCR, PIC). We proposed that stations (PP Koper) where such things were not observed provide posters and brochures.

Information for detained persons on their rights

Some years ago, the Police issued a Letter of Rights of a Person Deprived of Liberty in several languages, which was found in every PP. Unfortunately, in some PPs, it is not in the place (detention rooms and lobbies, rooms for foreigners) where it is most useful, and it sometimes took some time for police officers to find the brochure. In PP Koper, we thought it was missing in the room for foreigners and proposed to provide it as soon as possible. A similar situation was found in PP Grosuplje.

Information on rights is also provided by means of posters informing about arrest, which is commendable, but these should, in most cases, be replaced by a more recent version, since the old one does not include the right to a doctor of one's own choice. PP Škofja Loka is a good practice example, as they resolved the issue by adding the notice on the right to a free choice of doctor to the poster. The DPM approved of such a method of informing detained persons and suggested that other PPs do likewise.

Additionally, the posters could be placed in rooms where detained persons spend most time. If they are placed only in the corridors, we doubt that detained persons learn about the content.

In the capacity of the DPM, the Human Rights Ombudsman of the Republic of Slovenia sent brochures and posters on the DPM to all PPs in 2011. In the majority of PPs, they were not to be found, but we should highlight PP Gornja Radgona, which had DPM brochures in the room for interviews with clients, and PP Grosuplje, which had a poster on the DPM in the room for interviews.

Documentation

The inspection of documentation showed it to be carefully arranged; however, some inconsistencies, inaccuracies and irregularities were observed in the completion of data in the documentation:

- The receipt of confiscated items does not include the time of confiscation (PP Tolmin).
- Several irregularities were found on the receipt of confiscated items: the person signed the receipt, but the police officer recorded as a comment that the detained person refused to sign it without reason; the receipt did not include the time when the items were returned; in the part of the receipt under 'completed under serial no.', the number 9 was entered, although there were 10 confiscated items (where?).
- It was established that when completing the official note on detention, the information in the official note form on detention had been corrected with correcting fluid. According to the DPM, this practice is inappropriate, since this is an official document. The DPM suggested that any corrections in such cases be recorded in such a way that the previous entry can be seen. The information should be confirmed by the signature of the police officer who made the correction (PP Idrija). A similar situation was observed in PP Koper, where the receipt on confiscated items included corrections, but lacked the signature of the police officer who had made them. The DPM also suggested that any corrections be recorded in such a way that the previous entry can be seen.

- Neusklenjenost ure končanja pridržanja z uro izročitve osebe v postopek preiskovalnemu sodniku (PP Idrija).
- Netočno evidentiranje začetka in konca pridržanja (PP IU Kranj).
- Netočni časovni okvirji postopka s pridržano osebo (PP Bled).
- S pregledom dokumentacije je bilo na več PP ugotovljeno, da so policisti izpolnili tudi rubriko o obveščanju diplomatskega predstavnštva, čeprav ni šlo za tujca oziroma tujko (PP Škofja Loka, PP Gornja Radgona, PP Ruše). V teh primerih je DPM predlagal, da naj policiste opozorijo, da na obrazcih o pridržanju v prihodnje izpolnijo le rubrike, ki jih je treba izpolniti.
- Pri obveščanju svojcev je bilo iz uradnega zaznamka o pridržanju in sklepa o pridržanju razvidno le, da je bil o tem obveščen svojec, ni pa bilo razvidno, na katero tel. številko se je klical (PP Ruše). DPM je v tovrstnih primerih predlagal, da se ob telefonskem obveščanju svojcev zapisuje tudi podatek, na katero telefonsko številko so bili obveščeni.
- Pomanjkljivo evidentiranje okoliščin pridržanj. Na PP Piran je bilo v rubriki »nadzor pridržane osebe« evidentirano samo »videonadzor«, kar je po mnenju DPM pomanjkljivo. DPM je predlagal, da se v uradni zaznamek o pridržanju zapišejo tudi druge okoliščine pridržanja, kot so osebni pregled, izročitev copat, odeje, vode, prehrane in podobno (PP Izola in PP Koper).
- Pokrivanje ure vročitve sklepa o pridržanju z uro začetka pridržanja, kar je po mnenju DPM nerealno (PP Izola).
- Netočno naveden datum izdaje odločbe o pridržanju. Pridržanje je bilo od 8. 3. do 10. 3. 2011, na odločbi o pridržanju pa je bil naveden datum izdaje odločbe 31. 12. 2010 (PP Izola).

Pri pregledu dokumentacije mladoletne osebe na PPIU Kranj je iz nje izhajalo, da je bila pridržana oseba seznanjena s pravicami v albanskem jeziku. Ker iz uradnega zaznamka ni bilo mogoče ugotoviti, kdo in kako je to osebo s pravicami seznanil v albanskem jeziku (po besedah sogovornika je to razvidno iz preostale dokumentacije, kjer se hrani stroškovnik, ki se izda prevajalcu), je DPM predlagal, da se morebitna navzočnost prevajalca z imenom in priimkom ter časovnim okvirjem (prihodom in odhodom) zapiše tudi v uradnih zaznamkih o zadržanju (pridržanju) pod rubriko »druge ugotovitve in opombe«.

Ker je šlo v tem istem primeru za mladoletno osebo, je bilo potrebno tudi obveščanje pristojnega centra za socialno delo. DPM je ugotovil, da tudi navedeni podatek, da je bil center za socialno delo obveščen o zadržanju, iz arhivske dokumentacije ni bil razviden. DPM je tudi v takšnih primerih, predlagal, da se obveščanje centra za socialno delo dodatno zapiše tudi v uradne zaznamke o zadržanju (pridržanju) pod rubriko »druge ugotovitve in opombe«.

Nadalje smo ob pregledu dokumentacije ugotovili več nepravilnosti, ko je bila pridržani osebi ponujena zdravstvena pomoč. Tako je bilo na PP Jesenice v rubriki »zdravstveno stanje pridržane osebe« zapisano samo, da so policisti pridržani osebi oskrbeli rano na nosu. Nadalje je bilo iz dokumentacije na PP Ruše ugotovljeno, da je bila oseba med policijskim postopkom odpeljana na pregled k zdravniku, vendar pa iz uradnega zaznamka ni razvidno h kateremu. DPM je predlagal, da se v prihodnje v primerih, ko je potrebna zdravstvena oskrba pridržane osebe, to zapiše v uradni zaznamek oziroma da se dosledno izpolnijo vse rubrike uradnega zaznamka.

- The time when the detention concluded was not consistent with the time when the person was taken before the investigating judge (PP Idrija).
- Inaccurate recording of the start and end of detention (PP IU Kranj).
- Inaccurate timeframes of procedure involving the detained person (PP Bled).
- Inspection of documentation showed that in several PPs, police officers also completed the section on the notification of diplomatic representation, although no foreigner was involved (PP Škofja Loka, PP Gornja Radgona, PP Ruše). In such cases, the DPM suggested that police officers be taught to complete only the sections that need be completed.
- As far as information for relatives is concerned, the official note on detention and detention warrant indicated only that a relative had been informed, but did not state the telephone number called (PP Ruše). In such cases, the DPM proposed that the telephone number of the notified relative also be recorded.
- Insufficient information in the records of detention circumstances. In PP Piran, the section 'Surveillance of the detained person' included only 'video-surveillance', which, in the DPM's view, is insufficient. The DPM proposed the inclusion of other circumstances in the official note on detention, such as personal inspection, provision of slippers, blanket, water, food and similar (PP Izola and PP Koper).
- The overlap of the time when the detention warrant was served with the time when the detention started, which is unrealistic, in the opinion of the DPM (PP Izola).
- Inaccurately stated date of issue of the detention warrant. Detention lasted from 8 March to 10 March 2011, but the date of issue stated in the detention warrant was 31 December 2010 (PP Izola).

An inspection of the documentation of a minor held in PPIU Kranj showed that the detained person was informed of their rights in Albanian. Since the official note failed to include information on who informed the person of their rights in Albanian, and how (according to the discussion partner, this is indicated in the remaining documentation where the record of expenses issued to the translator is kept), the DPM proposed that the potential presence of a translator be recorded in official notes on detention (apprehension) under the section 'Other findings and notes'.

As the person in this case was a minor, the competent social work centre should have been notified. The DPM established that the fact that the social work centre had been informed of the detention was not seen in the archives. In such cases, the DPM also suggested that the notification of the social work centre be recorded in the official notes on detention (apprehension) under the section 'Other findings and notes'.

Furthermore, the inspection of documentation revealed several irregularities concerning medical attention offered to the detained person. In PP Jesenice, the section 'Health condition of the detained person' stated only that police officers had taken care of the detained person's nose injury. Documentation in PP Ruše further showed that the person had been taken to a doctor during the police procedure, but the official note did not indicate to which doctor. The DPM proposed that when a detained person requires medical attention in future, this is entered in the official note, or that all sections of the official note are consistently completed.

Nadalje smo na PP Izola pri pregledu uradnega zaznamka ugotovili, da je imela oseba pri odreditvi pridržanja poškodbe oziroma odrgnine na desni pesti in odrgnine desnega kolena. Navedeno je bilo tudi, da ima depresijo. DPM je pogrešal podatek, da policisti, ki so odredili pridržanje, niso zapisali, ali je bila osebi, ki je bila očitno poškodovana, ponujena zdravniška pomoč. DPM je menil, da je v primerih, ko gre za vidno poškodbo, vedno treba obvestiti zdravnika oziroma peljati pridržano osebo na pregled in oskrbo poškodb k zdravniku.

DPM je o vseh nedoslednostih, nepravilnostih in netočnostih obvestil Ministrstvo za notranje zadeve in dal priporočilo, da se v prihodnje točneje in dosledneje evidentirajo vsi podatki v dokumentaciji in da na to dodatno opozori vse policiste.

Na nekaterih PP smo opazili primere dobre prakse, in sicer:

- Dosledno izpolnjevanje rubrik uradnega zaznamka o pridržanju na PP Škofja Loka, v delu »nadzor pridržane osebe in ugotovitve« ter »druge ugotovitve in pripombe«, saj je iz njih mogoče razbrati vse dejavnosti policistov glede pridržane osebe (ponujena hrana, voda, nadzor ...).
- Za privedene osebe na PP Tolmin vodijo posebno ročno evidenco privedenih in vabljenih oseb na PP. Za vsako privedbo se izdela posebna mapa, v kateri je shranjena vsa dokumentacija, ki se nanaša na konkreten primer.

Pritožbene poti

Policjske postaje imajo različno urejene pritožbene poti. Skoraj vse PP imajo knjigo pohval in pritožb (razen PP Kranj), ki je pri dežurnem policistu. Večina PP (razen PP Idrija, Jesenice, Kranj, Izola, Tolmin, Koper, Lenart) pa ima tudi nabiralnike, kar daje možnost pridržanim osebam anonimno podajo pritožbe/pohvale, prav tako lahko to izkoristijo tujci, ki sicer niso seznanjeni s slovenskimi predpisi o možnosti pritožb zoper delo uradnih oseb (ob predpostavki, da je nabiralnik tudi ustrezno označen v tujem jeziku). PP Škofja Loka prav tako nima nabiralnika, vendar so po pojasnilu sogovornika v postopku pridobitve nabiralnika. PP Ilirska Bistrica sicer nabiralnik ima, vendar na njem ni bil označen namen. DPM je predlagal, da se na nabiralnik namesti ustrezni napis.

Dostop do PP invalidom in parkirni prostori za stranke, tudi invalidne osebe

Razen na treh (Idrija, Grosuplje in Ruše) imajo vse druge PP ustrezni in urejen dostop za invalide. Na teh treh PP je dostop do dežurnega policista mogoč le po več stopnicah. Pred stopnicami ni niti zvonca, s katerim bi invalidni obiskovalec lahko poklical dežurnega policista. Dostop invalidne stranke je tako odvisen od tega, ali jo dežurni policist opazi na kamери ali če v PP po naključju pride še kakšna druga stranka in dežurnega policista obvesti o prihodu invalidne osebe. V vseh primerih mora dežurni policist zapustiti svoje delovno mesto, da se lahko pogovori z njo. DPM kot pozitivno ocenjuje urejen dostop za invalide in rezervirani dve parkirni mesti za invalide (PP Ptuj).

Delovne razmere za zaposlene

DPM je ugotovil, da policisti opravljajo delo v slabih delovnih razmerah na dveh PP (Izola in Jesenice), kjer jim niso zagotovljeni ustrezni garderobni prostori, na PP Jesenice pa policisti in policistke tudi nimajo ločenih garderobnih prostorov ter možnosti prhanja. Na PP Jesenice so garderobni prostori v garaži, ki je bila sicer za ta namen pregrajena, na PP Izola pa so majhne garderobne omare kar v sobi za policiste. V isti sobi se opravijo tudi pogovori s strankami, kajti PP nima posebne sobe za sprejem strank. DPM je ugotovil, da sta PP Izola in PP Jesenice med redkimi, ki nimata ustreznih delovnih razmer za policiste, in zato predlagal, da se na navedenih PP proučijo možnosti za čimprejšnje izboljšanje delovnih razmer.

Furthermore, inspection of an official note in PP Izola showed that the person had injuries or abrasions on the right fist and abrasions on the right knee at the time the detention had been ordered. It was also stated that the person suffered from depression. The DPM could not locate the information that should have been recorded by police officers as to whether the person, who was obviously injured, had been offered medical assistance. The DPM stated that, in cases of obvious injury, a doctor must be notified, or the detained person taken to a doctor for examination and treatment of injuries.

The DPM notified the Ministry of the Interior of all inconsistencies, irregularities and inaccuracies, and recommended that all information in the documentation be recorded more accurately and consistently in future and that police officers be additionally cautioned thereof.

Good practice examples were observed in some PPs:

- Consistently completing all sections of the official note on detention in PP Škofja Loka, in the sections 'Surveillance of detained person and findings' and 'Other findings and notes', as they indicate all the activities of police officers concerning the detained person (food and water offered, surveillance etc.)
- At PP Tolmin, they keep hard-copy records of persons apprehended and persons invited to the PP. A file is prepared for each apprehension containing all documentation related to the case.

Complaints procedures

The complaints procedures of police stations (PPs) vary. Almost all PPs keep a comments and complaints book (except PP Kranj) stored with the duty officer. Most PPs (except PP Idrija, Jesenice, Kranj, Izola, Tolmin, Koper, Lenart) also have boxes in which detained persons can file a comment/complaint anonymously; they may also be used by foreigners who do not know the Slovenian regulations on making complaints about the behaviour of public officials (assuming the collection box is appropriately labelled in other languages). PP Škofja Loka does not have a complaints box, but according to the discussion partner's explanation, they are in the process of obtaining one. PP Ilirska Bistrica has a box, but there was no label indicating its purpose. The DPM proposed that an appropriate label be put on the box.

Access to PPs for the disabled, and parking for clients, including the disabled

Except in three PPs (Idrija, Grosuplje and Ruše), all PPs have suitable and arranged access for the disabled. At these three PPs, there are several steps to cross to access the duty officer. There is no bell in front of the steps for disabled visitors to call the duty officer. Access for disabled clients thus depends on whether the duty officer sees the person on the CCTV camera, or if another client incidentally comes to the PP and notifies the duty officer that a disabled person is at the PP. In each case, the duty officer must leave his or her workplace to deal with the disabled person. Arranged access for the disabled and two parking spaces reserved for the disabled (PP Ptuj) is considered positive by the DPM.

Working conditions for employees

The DPM established that police officers work in poor working conditions in two PPs (Izola and Jesenice), where police officers do not have suitable changing room, and in PP Jesenice, where female and male police officers do not have separate changing rooms and showers. In PP Jesenice, the changing room is situated in the garage, which is divided by a wall for this purpose; in PP Izola, there are small lockers in the room for police officers. The same room is used for interviews with clients, since there is no separate room for this purpose in the PP. The DPM established that PP Izola and PP Jesenice are among the rare PPs which do not provide suitable working conditions for police officers, and therefore suggested that possibilities for prompt improvements to working conditions in them be considered.

Obiski psihiatričnih bolnišnic

Spoštno

V letu 2011 smo obiskali dve psihiatrični bolnišnici, in sicer 27. 1. 2011 Psihiatrično bolnišnico Begunje (PB Begunje) in 18. 4. 2011 Psihiatrično bolnišnico Ormož (PB Ormož). Glavni namen teh obiskov je bil preveriti razmere na oddelkih pod posebnim nadzorom in ravnanje z osebami, nastanjenimi na teh oddelkih, da bi odpravili morebitne pomanjkljivosti, ugotovljene ob samem obisku.

Na poslani poročili smo prejeli odziva obeh bolnišnic, ki pa sta se odzvali le na manjši del pripomemb in priporočil. Zato lahko upamo, da sta druga priporočila upoštevali. To bomo preverili pri naslednjem obisku. S končnim poročilom o obisku smo seznanili tudi Ministrstvo za zdravje in Razširjeni strokovni kolegij za psihiatrijo pri Ministrstvu za zdravje.

Prostorske razmere

PB Begunje ima dva oddelka pod posebnim nadzorom, in sicer moški (C1) in ženski oddelek (D). V sklopu zadnjega je oblikovan polodprtji ženski oddelek (D1). Na vsakega od oddelkov pod posebnim nadzorom je mogoče namestiti po dvoje ležišč, namenjenih začasni namestitvi pacientov.

Ob obisku oddelkov pod posebnim nadzorom v PB Begunje smo ugotovili, da postelje, namenjene začasni namestitvi pacientov na teh oddelkih, sicer niso povsem enakovredne drugim posteljam na oddelku, vendar ustrezajo začasni namestitvi. Bolj nas je (predvsem na moškem oddelku pod posebnim nadzorom), presenetilo, da sta postelji nameščeni tako rekoč na hodniku. Tako ne omogočata nobene zasebnosti, čeprav le začasno nameščenima pacientoma. Kljub vidni prostorski stiski smo predlagali, da PB Begunje poskuša najti primernejšo rešitev za začasno namestitve pacientov. Prekoračitev zmogljivosti oddelka ne pomeni zgolj slabše kakovosti bivanja za druge paciente, ampak je še posebej neprijetna za ravnokar sprejetega pacienta, ki je tako še bolj izpostavljen. Odziva PB Begunje na te ugotovitve nismo prejeli.

Prostori na oddelkih pod posebnim nadzorom PB Begunje so bili čisti, obnovljeni, oprema je v dobrem stanju. Vendar so sobe na moškem oddelku pod posebnim nadzorom delovale pusto, skoraj sterilno, saj ni bilo opaziti nobenih slik ali osebnih predmetov. Osebje je takšno stanje opravičevalo z bojaznijo, da bi bile slike (npr. fotografije, izdelki delovne terapije) lahko nevarne, če so na oddelku psihični pacienti.

Res je, da so pacienti na oddelku pod posebnim nadzorom nameščeni praviloma krajsi čas. Zato je razumljivo, da pacienti sobe, v kateri prebivajo, ne okrasijo z lastnimi osebnimi predmeti. Vendar pa smo poudarili, da bi lahko bolnišnica poskrbela, da bi se skupni prostori in praviloma tudi sobe polepšale z izdelki npr. delovne terapije. Tako okrasitev smo že videli v nekaterih drugih obiskanih bolnišnicah, pa tudi v PB Begunje na ženskem oddelku pod posebnim nadzorom. Do zdaj tudi še nismo bili seznanjeni z morebitnimi težavami, ki bi jih takšna okrasitev povzročala glede na zdravstveno stanje nekaterih pacientov. Tako smo predlagali, da bolnišnica sobe in skupne prostore opremi z izdelki delovne terapije, hkrati pa paciente tudi spodbudi, da prostor ob svoji postelji – če to seveda želijo, opremijo s svojimi osebnimi predmeti (fotografije in podobno). Tudi v tem delu se na ugotovitve oziroma predloge DPM bolnišnica ni odzvala.

Visits to psychiatric hospitals

General

In 2011, we visited two psychiatric hospitals, Begunje Psychiatric Hospital (PB Begunje) on 27 January 2011 and Ormož Psychiatric Hospital (PB Ormož) on 18 April 2011. The main purpose of these visits was to monitor the situation in secure wards and how persons accommodated in these wards were treated, with the aim of eliminating any potential irregularities established during the visit.

Both hospitals responded to the reports we sent to them, but only to a small number of comments and recommendations. We can only hope that they have implemented the other recommendations, which will be monitored during our next visit. The final report on the visit was also submitted to the Ministry of Health and to the Expanded Professional Board of Psychiatry at the Ministry of Health.

Spatial conditions

PB Begunje has two secure wards, a male ward (C1) and a female ward (D). A semi-open female ward (D1) is organised within the latter. Two beds intended for the temporary accommodation of patients can be placed in each secure ward.

During the visit to the secure wards in PB Begunje, we observed that beds intended for the temporary accommodation of patients to these wards are not the same as the other beds in the ward, but that they are suitable for temporary accommodation. We were more surprised by the fact that (particularly in the male secure ward) the beds were placed almost in the hallway. They do not provide any privacy for the patients, regardless of whether they are just temporarily accommodated. Despite the obvious overcrowding, we suggested that PB Begunje try to find a more appropriate solution for the temporary accommodation of patients. Exceeding the capacity of the ward not only leads to poorer living quality for other patients, but is particularly unpleasant for a patient who has just been admitted, and makes the patient even more exposed. PB Begunje has not responded to these findings.

Rooms in the secure wards in PB Begunje were clean and renovated, and the equipment is in good order. Nevertheless, the rooms in the male ward have a bleak, almost sterile atmosphere, as there were no pictures or personal items. The personnel made excuses for the situation, saying that pictures (e.g. photos, items made during occupational therapy) could be dangerous when psychotic patients are present in the ward.

It is true that the time the patients spend in the secure ward is usually short, so it is understandable that they do not use their own personal items to decorate the room in which they are accommodated. However, we pointed out that the hospital could provide for the decoration of common rooms and accommodation rooms with items made, for example, during occupational therapy. We have seen such decoration in some other hospitals, even in the female secure ward of PB Begunje. We have never been informed of any problems associated with the health condition of certain patients caused by such decoration. We therefore proposed that the hospital decorate accommodation rooms and common rooms with items made during occupational therapy, and encourage patients, if they wish, to place some personal items (photos and similar) next to their beds. Again, the hospital did not respond to these findings or the proposals of the DPM.

Oblačila pacientov v dnevnem času

V PB Begunje smo ugotovili, da so pacienti in pacientke na oddelkih pod posebnim nadzorom tudi podnevi v nočnih oblačilih (pižamah). Čeprav tovrstna oblačila zapoveduje tudi hišni red, pa je vodstvo bolnišnice poudarilo, da pacientom vseeno omogočajo vsaj delno uporabo dnevnega oblačila (ogrindalo in podobno). Vodstvo bolnišnice meni, da je to vprašanje sporno in da je bilo o njem (še) premalo razprave. Poudarili so, da tudi stališče Razširjenega strokovnega kolegija za psihiatrijo pri Ministrstvu za zdravje (RSK za psihiatrijo) ni bilo enotno. Bolnišnica meni, da tu ne gre le za bolnike na oddelkih pod posebnim nadzorom. Tudi na drugih oddelkih so nekateri pacienti v pižamah, drugi v oblekah. So pa tudi oddelki, kjer so vsi v svojih oblekah. Vodstvo bolnišnice meni, da bi nekateri pacienti, če bi imeli svojo obleko, lahko hodili iz bolnišnice po alkohol. Sprašujejo se, ali je bolj »človeško« posameznika omejiti znotraj oddelka pod posebnim nadzorom ali pa mu omogočiti večji krog gibanja, a ga vseeno »omejiti« z uporabo pižame.

Ker veliko pacientov pride higienско zanemarjenih, PB Begunje poskrbi za njihova oblačila v pralnici, ki jim to omogoča. Če je treba, jim tudi prisrbi čisto obleko. Vodstvo bolnišnice tako misli, da so pižame boljše za primere, ko se pacient ponečedi, torej tudi s higienškega vidika, še posebej pri akutnih primerih. Ker sta oddelka majhna, si prizadevajo, da bi bili pacienti na njih čim krajši čas. Zato tudi v pižamah praviloma niso dolgo. Velika želja po svoji obleki je praviloma le pri bolnikih, ki še niso sprejeli svojega bolezenskega stanja in zdravljenja. Z nasprotovanjem nošnji pižame poskušajo dokazovati, da so zdravi in da ne potrebujejo zdravljenja. Ko so premeščeni na odprt oddelek, nošnji pižame praviloma ne nasprotujejo več. Bolnišnica je tudi pripomnila, da v splošnih bolnišnicah ni izbire, saj morajo tam bolniki nositi pižamo. Opozarja, da bi tisti, ki bi ne mogli dobiti dnevne obleke oziroma jim iz nekega razloga nošnje dnevnega oblačila ne bi dovolili, to jemali kot krivico, da jo drugi imajo.

Razlogi PB Begunje, zakaj na oddelku pod posebnim nadzorom vztrajajo pri obvezni uporabi nočnega oblačila (pižame) tudi v dnevnem času, so lahko tehtni v posameznem primeru. Vendar pa smo tudi tokrat poudarili, da splošna ureditev, ko je nošnja nočnega oblačila na sprejemnem oddelku obvezna tudi podnevi, po našem prepričanju ni primerna. Znova smo opozorili na strokovno mnenje RSK za psihiatrijo, da je oblačilo, ki ga nosijo hospitalizirani na varovanih oddelkih psihiatričnih bolnišnic, izredno pomembno tudi za njihovo samopodobo in osebno dostojanstvo. Zato RSK tudi na teh oddelkih spodbuja nošnjo osebnih oblačil in jo utemeljuje s strokovnimi in humanističnimi dejavniki, razen v zelo izjemnih primerih, ko to otežujejo ali celo onemogočajo posebnosti telesnega zdravstvenega stanja bolnika oziroma potrebe po medicinskih posegih. RSK je še pojasnil, da spodbuja nošnjo osebnih oblačil tudi pri osebju na psihiatričnih oddelkih. S tem (strokovnim) stališčem se v celoti strinjam. Zato smo predlagali, da o njegovem upoštevanju razmisli tudi PB Begunje. Hkrati smo predlagali, da bolnišnica spremeni hišni red tako, da na oddelkih pod posebnim nadzorom ne bo več splošne zapovedi nošnje bolnišničnih oblačil. To bo PB Begunje omogočilo, da pacientom, pri katerih bi bila nošnja dnevnih oblačil mogoča in smiselna, omogoči nošnjo tovrstnih oblačil (morebiti najprej delno, kot se glede na navedbe ob obisku že dogaja) in jih k temu tudi spodbuja. Bolnišnica se na naše pomisleke oziroma predloge ni odzvala.

V nasprotju s PB Begunje v PB Ormož bolniki, ki bivajo v odprtih oddelkih, lahko nosijo svoja oblačila, tisti v ženskem in moškem oddelku pod posebnim nadzorom pa nosijo bolniško trenirko in majico. V pižamah so le tisti, pri katerih je to medicinsko zapovedano. Po besedah direktorice sicer niso zapazili, da bi bilo zaradi civilne obleke kaj več pobegov iz bolnišnice, kot jih je sprva tudi skrbelo. Kot je DPM že večkrat poudaril, dnevna oblačila po našem prepričanju pripomorejo k kreplitvi človekovega dostojanstva in samospoštovanja, zato pozdravljamo omogočanje oziroma spodbujanje pacientov k nošnji dnevnih oblačil (razen takrat, ko je potrebna stalna nega).

Patients' clothing during daytime

In PB Begunje, we observed that the patients in secure wards spent the day wearing night clothes (pyjamas). Although such clothing is prescribed by the house rules, the hospital management pointed out that the patients were allowed to wear, at least partially, daytime clothes (dressing gowns). The hospital management believe that this issue is disputable and has not been sufficiently discussed. They stressed that even the Expanded Professional Board for Psychiatry at the Ministry of Health (RSK for Psychiatry) are not unanimous on this issue. According to the hospital, the issue does not concern only patients in secure wards. In other wards, some patients wear pyjamas and some wear clothes. And there are wards where all patients wear their own clothes. The hospital management believe that if some patients wear their own clothes, they would go out of the hospital to buy alcohol. They wonder whether it is more 'humane' to limit an individual within a secure ward, or allow them a wider freedom of movement, but 'limit' them by using pyjamas.

Since many patients on admission are hygienically neglected, PB Begunje takes care of their clothing in the laundry. If necessary, clean clothes can be provided as well. According to the hospital management, pyjamas are more appropriate when a patient defecates, i.e. in terms of hygiene, especially in acute cases. Because the wards are small, the hospital makes an effort to reduce the time spent there to a minimum. So patients usually do not spend much time wearing pyjamas. Only patients who have not accepted their medical condition and therapy have a strong desire to wear their own clothes. By refusing to wear pyjamas, they try to prove they are healthy and do not need treatment. When they are transferred to the open ward, they usually stop refusing to wear pyjamas. The hospital also noted that general hospitals do not offer a choice; pyjamas are mandatory. They point out that patients who could not get daytime clothing or would not be permitted to wear them for any reason, while others could, would consider it unjust.

The reasons for PB Begunje making night clothes (pyjamas) mandatory wear during the day might be well-founded in particular cases. However, we emphasised that, in our opinion, the general regulation prescribing the mandatory wearing of night clothes in the reception ward also during the day is not appropriate. Again, we pointed out the opinion of the RSK for Psychiatry stating that clothes worn by hospitalised patients in secure wards of psychiatric hospitals are extremely important for their self-image and personal dignity. The RSK thus encourage the wearing of personal clothes in these wards and support this with professional and humanistic factors, except in rare cases when the particulars of a patient's physical health or need for medical treatment make it more difficult or even prevent it. The RSK also added that they encourage the personnel working at psychiatric wards to wear personal clothing. We fully agree with this (professional) point of view. We therefore proposed that PB Begunje consider implementing it. At the same time, we suggested the hospital amend the house rules to eliminate the general prescription to wear hospital clothes in the secure wards. PB Begunje will thus be able to allow patients for whom the wearing of daytime clothing is possible and reasonable to wear such clothes (perhaps partially at first, as already occurs, according to the indications during the visit) and encourage them to do so. The hospital has not responded to our considerations or proposals.

Unlike PB Begunje, patients in PB Ormož accommodated in open wards are allowed to wear their own clothes, and those in female and male secure wards wear hospital track suits and T-shirts. Pyjamas are worn only due to medical considerations. According to the manager, they have not noted an increased number of runaways due to ordinary clothing, as they had expected. As the DPM has stressed several times, we believe that daily clothes contribute to strengthening human dignity and self-respect; therefore, we are satisfied that patients are offered or encouraged to wear daytime clothing (except when constant care is required).

Vročanje priporočenih pošiljk

Ko poštar prinese sklep sodišča, ga pacientu vroči osebje PB Begunje. Direktor hkrati dobí obvestilo, da je sklep prispeval sodišča. Težava je le takrat, ko prejemnik noče podpisati, da je prejel pošiljko. Vendar ga k podpisu ne silijo. Če pacient pošiljke ni sposoben sprejeti, npr. zaradi demence, mu takšno pisanje sicer dajo, vendar on tega dejansko ne more sprejeti. Osebje bolnišnice se sprašuje, čemu sploh dajati takšnemu pacientu v podpis vročilnico. S pomisliki se strinjam. Ne gre le za to, da pacient zaradi zdravstvenega stanja ni sposoben razumeti pomena vročitve in vsebine dokumenta, ampak z dnem »vročitve« lahko začnejo teči tudi roki, ki imajo zanj ali njegovo premoženje lahko daljnosežne posledice. Zato bi bilo smiselno, da bi se takšnemu pacientu v sodelovanju s pristojnim centrom za socialno delo (CSD) postavil skrbnik (kolikor ga še nima), ki bi ga bolnišnica o vročitvi nemudoma obvestila. Zato smo predlagali, da PB Begunje s pacientom, ki ni sposoben razumeti vsebine in pomena vročene pošiljke, nemudoma seznaní pristojni CSD, ki mu bo postavil skrbnika. Nato lahko s prispevo priporočeno pošiljko seznaní skrbnika, ki mora skrbiti za pravice in interese oskrbovanca.

Obveščanje v primeru pridržanja

Obvestilo sodišču PB Begunje pošle po pošti (z navadno pošto). Sodišče je potrdilo, da je to zanje sprejemljivo, in od takrat tako ravnajo. Rok za obvestilo, kot ga določa ZDZdr, bolnišnica šteje od trenutka pridržanja pacienta. V štirih urah mora zdravnik obvestilo o pridržanju oddati v pisarno bolnišnice, kjer poskrbijo za odpošiljanje obvestila sodišču. Vendar običajno traja več ur ali konec tedna celo več dni, da pošiljko res prevzame pošta. Med delavniki je to zjutraj, ob koncu tedna pa obvestilo čaka na prvi delovni dan. Bolnišnica direktorja o pridržanju obvesti v štirih urah, vendar mu v tem roku zgolj pusti sporočilo o pridržanju na njegovi mizi v pisarni. Tudi v tem primeru lahko traja več ur ali celo dni, ko direktor obvestilo dejansko prejme. Če je bil nekdo pridržan v petek popoldne, prejme direktor obvestilo po navadi šele v ponedeljek zjutraj. PB Begunje je pojasnila, da bodo tudi zastopnike obveščali po pošti, vendar njihovih naslovov še nimajo, le telefonske številke.

PB Begunje je pojasnila, da je način obveščanja, kot ga določa ZDZdr, neustrezen in dejansko neizvedljiv. Zato so se pred časom obrnili na Ministrstvo za zdravje in predlagali, da direktor za obveščanje sodišča pooblasti posamezne zdravnike. Ministrstvo na predlog Bolnišnice ni imelo pripomb. Tudi PB Ormož je opozorila, da so predvsem glede obveščanja v ZDZdr predpisani roki neživljensko kratki. Ob sprejemih proti volji poskušajo vsakemu pacientu razložiti celoten postopek že v sprejemni ambulanti, pozneje pa še na oddelku, ko se pacient sam prepriča, kam je prispeval. Tako naj bi ti pacienti pogosto potem prav na oddelku podpisali privolitev.

Prekoračitev rokov, določenih v ZDZdr, je nedopustna. Člen 58 ZDZdr določa, da mora ob sprejemu na zdravljenje v nujnih primerih sprejemni zdravnik v štirih urah obvestiti direktorja psihiatrične bolnišnice. To seveda pomeni, da mora biti direktor v tem roku o sprejemu tudi dejansko obveščen (puščanje obvestila na mizi po naši presoji nikakor ne zadošča, da bi lahko štel, da je bil direktor obveščen), saj s trenutkom prejema obvestila nastane njegova obveznost, da o sprejemu takoj obvesti pristojno sodišče. V PB Begunje je za obveščanje sodišča direktor pooblastil posamezne zdravnike. Če bi zaradi hitrosti (obveščanja) lahko sprejeli takšno ravnanje, pa to dejansko pomeni, da mora pooblaščeni zdravnik sodišče obvestiti TAKOJ po sprejemu pacienta na zdravljenje brez privolitve. Zato rok štirih ur za obveščanje po prepričanju DPM v tem primeru ne pride v poštev. Še več, zgolj puščanje obvestila v pisarni PB Begunje, kjer čaka, da bo oddano, ko pač bo, je povsem nesprejemljivo in v nasprotju z zakonom. Zato smo predlagali, da se PB Begunje s pristojnim sodiščem dogovori o načinu takojšnjega obveščanja, potem pa se naknadno lahko obvestilo pošlje

Delivery of registered items

When the postman delivers a court decision, the personnel of PB Begunje deliver it to the patient. At the same time, the manager receives a notification that a court order has arrived. A problem may arise if the recipient refuses to sign the receipt for the post. However, the patient is not pressed to sign. If the patient is not able to accept the post, e.g. due to dementia, the letter is given to them, but in fact they are unable to receive it. The hospital personnel wonder why such patients are requested to sign the return receipt. We agree with the considerations. This is not only a matter of the patient's medical condition preventing him or her from understanding the meaning of the delivery and contents of the document; some time limits that may have long-term consequences for the patient and his or her property may begin on the date of delivery. It would thus be reasonable to provide such a patient, in cooperation with the competent social work centre (SWC), with a custodian (if he or she does not have one) to be notified immediately by the hospital of a delivery. We proposed that PB Begunje promptly inform the competent SWC of any patient who is not able to understand the contents and meaning of the delivered post, which should assign a custodian to the patient. The custodian, who has to provide for the rights and interests of the person entrusted to him or her, can later be informed of the arrival of registered post.

Notification in case of detention

The court notifies PB Begunje by regular mail. The court found this acceptable and the hospital has done accordingly since. The hospital counts the notification time limit as specified by ZDZdr from the time of the patient's detention. Within four hours, the doctor must submit the notification on detention to the hospital's office, where delivery to the court is taken care of. However, it usually takes several hours, or even days during weekends, for the item to be posted. During working days, the notification is posted in the morning, and at weekends, it waits for the first working day. The hospital notifies the manager on the detention within four hours, but only a notification on detention is put on the table in his office in this period. Also in this case, it may be several hours or even days before the manager actually receives the notification. If someone has been detained on Friday afternoon, the manager does not usually receive the notification before Monday morning. PB Begunje explained that the representatives would be notified by mail, but the hospital still does not have their addresses, only telephone numbers.

PB Begunje explained that the method of notification as prescribed in ZDZdr is inappropriate and not really practicable. For this reason, they turned to the Ministry of Health some time ago and suggested that the director authorise certain doctors for the notification of the court. The Ministry had no objections to the hospital's proposal. PB Ormož also stressed that the time limits as prescribed in ZDZdr concerning notification are unrealistically short. Upon admissions without consent, they try to explain to each patient the entire procedure in the reception dispensary, and later in the ward when the patient is assured of his or her whereabouts. Such patients then often sign the consent in the ward.

Exceeding the time limits as specified in ZDZdr is inadmissible. Article 58 of ZDZdr sets out that the admitting doctor must inform the manager of the psychiatric hospital within four hours of the admission to urgent treatment. This means that the manager must actually be informed within this period (we believe that leaving a notification on the table does not constitute sufficient notification of the manager), as at the time of receipt of the notification his obligation arises to inform the competent court of the admission immediately. In PB Begunje, the manager authorised certain doctors to notify the court. If such conduct is to be accepted for reasons of speed (notification), it means that the authorised doctor must notify the court of the admission without consent IMMEDIATELY after admission. According to the DPM, in this case, the four-hour time limit for notification should not apply. Furthermore, merely leaving the notification in the office of PB Begunje to wait to be delivered whenever that so happens is completely unacceptable and illegal. We therefore suggested that PB Begunje agree with the competent court on the method of prompt notification; afterwards, the notification may be sent (also) by mail.

(še) po pošti.

Ob tem bi PB Begunje morala upoštevati tudi zahtevo ZDZdr o obveščanju najbližje osebe, zakonitega zastopnika in zastopnika v štirih urah od sprejema pacienta. Zato smo predlagali, da bolnišnica nemudoma pridobi naslove zastopnikov, določenih po ZDZdr, in jih začne o sprejemih tudi takoj obveščati.

PB Begunje je v odgovoru na predhodno poročilo navedla, da ima naslove zastopnikov. Vendar meni, da bi bilo obveščanje zastopnika (brez predhodne odločitve pacienta za enega izmed njih) neprimerno in celo v nasprotju z zakonom. Če si pacient(ka) zastopnika izbere, pa ga obvesti o vseh relevantnih postopkih.

Pomisleki bolnišnice so sicer lahko utemeljeni. Vendar ob tem opozarjam na določilo 7. člena ZDZdr, da lahko pacientu, ki si ne izbere sam zastopnika, tega določi najbližja oseba. Poleg tega menimo, da pri pacientih, ki si zastopnika kljub ponujeni možnosti (ob sprejemu v bolnišnico, lahko pa tudi pozneje) ne izberejo, lahko bolnišnica vseeno o pridržanju obvesti enega izmed zastopnikov. Namen zastopnikov je namreč predvsem skrb za pacienta in njegove pravice. Pacientu da informacije o njegovih pravicah, omejitvah teh pravic in posameznih postopkih. Če se pacient z obveščenim zastopnikom ne bo strinjal, mu ne bo podpisal pisnega pooblastila in se bo lahko za nadaljnjo pomoč obrnil na drugega (izbranega) zastopnika ali pa se pravici do njega celo odpovedal.

O pacientkah, ki jih sprejmejo ali prenestijo na polodprt oddelek (D1), PB Begunje ne obvešča sodišča. Vendar po zagotovilih bolnišnice na oddelek ni mogoče sprejeti nikogar, če še nima odločbe sodišča oziroma če v sprejem ne privoli. Paciente ob tem obvestijo o polodprtih naravi oddelka, poleg tega pa se morajo strinjati z namestitvijo. Čeprav je polodprt oddelek zaklenjen le ponoči, je s tem pacientkam vsaj v tem času omejena svoboda gibanja. Zato ta oddelek ohranja (vsaj delno) naravo oddelka pod posebnim nadzorom. Predlagali smo, da PB Begunje zagotovi, da so na ta oddelek nastanjene le paciente, ki s takšno nastanitvijo pisno soglašajo oziroma o njihovi nastanitvi na oddelek pod posebnim nadzorom določi sodišče. Bolnišnica na ta predlog DPM ni odgovorila.

V PB Ormož oddelek za psihogeriatrijo šteje za odprtega, ker se vhodno-izhodna vrata ne zaklepajo. Vendar pa so nam hkrati pojasnili, da tamkajšnje paciente ustavijo in napoti nazaj vanj, ko ga želijo zapustiti. Zgodilo se je sicer že, da je kakšen pacient neopaženo »odtaval« z oddelka in so ga morali iskat. Zato razmišljajo tudi o uvedbi 'varnostnih zapestnic' in 'preprog' pred posteljami (ki zaznajo premikanje pacientov). Tako želijo vzpostaviti celovit varnostni sistem (kot so ga videli v podobnih ustanovah v tujini), pri katerem bi, ko bi pacient prestopil določeno mejo, zasvetila lučka. Osebje bi bilo tako vselej opozorjeno in bi poskrbelo, da pacientu ne bi uspelo oditi.

DPM vztraja pri že večkrat izraženem razumevanju varovanega oddelka oziroma oddelka pod posebnim nadzorom. Kadar pacient oddelka ne more zapuščati po lastni volji, po našem mnenju ni mogoče več trditi, da mu dejansko ni omejena svoboda gibanja. V konkretnem primeru bi to veljalo tudi ob morebitni uvedbi elektronskih zapestnic. Bistvena okoliščina v omejitvi gibanja je dejanska posledica za stanovalca oziroma pacienta, ne metoda, s katero se ta doseže. Posledično to pomeni, da je treba takšen režim bivanja v bolnišnici urediti v skladu z Zakonom o duševnem zdravju (ZDZdr). Bolnišnica na to stališče DPM ni odgovorila.

Posebni varovalni ukrepi (PVU)

PVU lahko po ZDZdr traja največ štiri ure. Po štirih urah se ukrep ne more nadaljevati, temveč je treba paciente odfiksirati in ga nato, če je treba, znova fiksirati. Takšna ureditev je po mnenju PB Begunje slaba. Odfiksirati je treba namreč tudi bolnika, za katerega je očitno, da je še vedno nemiren. S tem se izpostavlja nevarnosti poškodbe pacient in tudi osebje. Imeli so paciente, ki je bil fiksiran trikrat po štiri ure.

PB Begunje should also observe the requirement of ZDZdr concerning the notification of the person's next of kin, legal representative and representative within four hours of admission. We proposed that the hospital immediately obtain the addresses of the representatives specified according to ZDZdr and begin to notify them promptly on the admission.

In its response to the preliminary report, PB Begunje stated that they had the representatives' addresses. However, they believe that notification of the representative (without the patient first selecting one of the representatives) would be inappropriate and even illegal. If the patient has chosen his or her representative, the latter is notified on all relevant procedures.

The considerations of the hospital might be justified. However, we point out the provision of Article 7 of ZDZdr which states that a patient who does not choose his or her representative may be assigned one by his or her next of kin. Moreover, we believe that for patients who, despite having the opportunity to choose a representative (upon admission to the hospital or later), do not choose one, the hospital may still inform one of the representatives of the detention. The aim of the representatives is to take care of the patient and his or her rights. They provide patients with information on their rights, the limitations of these rights and on particular procedures. If the patient rejects the representative who has been notified, he or she will not sign the written authorisation and will turn to another (chosen) representative or even waive this right.

PB Begunje does not notify the court of female patients admitted or transferred to the semi-open ward (D1). However, according to the hospital's assurances, no one may be admitted to the ward without consent or without a court decision. The female patients are informed of the semi-open nature of the ward, and they must agree to be accommodated there. Although the semi-open ward is locked only at night, the patients' freedom of movement is partially restricted. Therefore, this ward maintains (at least partially) the nature of a secure ward. We suggested that PB Begunje ensure that only patients who agree with such accommodation in writing, or when the court decides on their accommodation to the secure ward, be accommodated there. The hospital has not responded to this proposal of the DPM.

In PB Ormož, the psychogeriatric ward is considered open, as the entrance is not locked. Nevertheless, they explained that female patients from this ward are stopped and returned when they want to leave. Patients have 'wandered off' the ward without being seen, and a search had to be made for them. For this reason, the use of 'safety wristbands' and 'carpets' in front of the beds (which detect the movement of patients) are being considered. This would enable an integral security system (such as seen in similar institutions abroad) to be created, which would indicate by a flashing light when a patient crossed a certain limit. The personnel would always be notified and would prevent the patient from leaving.

The DPM insists on the previously expressed understanding of a secure ward. When patients cannot leave whenever they wish, it is not possible to say that their freedom of movement is not restricted. In this particular case, this would hold true if electronic wristbands were introduced. The key circumstance in the restriction of movement is the actual consequence for the resident or patient, not the method of achieving restriction. In consequence, this means that this accommodation regime in the hospital should be regulated according to the Mental Health Act (ZDZdr). The hospital has not responded to this view of the DPM.

Special protection measures (PVU)

According to ZDZdr, PVU may last up to four hours. After four hours, the measure cannot be prolonged and the patient must be released and, if necessary, later restrained again. According to PB Begunje, this arrangement is bad. Even a patient who is obviously still restless must be released. Both patient and personnel risk injuries. They had a patient who was restrained three times for four hours.

Z opozorili bolnišnice se strinjam. Ustrezen redni pregled fiksiranega (telesno oviranega) pacienta, ki ga izvaja zdravnik vsake štiri ure (ali tudi pogosteje), je nedvomno nujen. Ravno tako je prav, da ta po pregledu pacienta odredi, ali se fiksacija nadaljuje ali prekine. Določbo 29. člena ZDZdr je res mogoče razumeti (zgolj) tako, da je fiksacijo vsake štiri ure treba prekiniti in jo po potrebi ponovno uvesti. Ob tem se postavlja vprašanje, ali je (obvezna) sprostitev telesnega oviranja res vedno najboljša možnost, saj bi lahko pomenila tudi nevarnost za osebje ali za samega pacienta. Pomisleki stroke po prepričanju DPM zahtevajo ponovno presojo zdajšnje zakonske ureditve in morebitno spremembo.

Poudarjamo pozitivno prakso PB Begunje, ki svoje znanje in ravnanje pri fiksaciji pacienta poskuša prenesti tudi na druge bolnišnice. Opažajo, da pridejo pacienti iz drugih (splošnih) bolnišnic k njim z odrgninami, kar je očitno posledica privezovanja z rjuhami. Izobraževanja organizirajo za zaposlene v splošnih bolnišnicah in v domovih za starejše, da bi tudi tam znali pravilno uporabljati fiksacijske metode. Ob tem znova izpostavljamo potrebo, da se uporaba posebnih varovalnih ukrepov zakonsko uredi tudi v primerih, ki jih ne določa ZDZdr, torej zunaj psihiatričnih in socialnih zavodov.

Ob pregledu dokumentacije konkretnega primera fiksacije smo ugotovili, da je ta skupaj trajala 17 ur in pol. Obveščena sta bila direktor PB Begunje in najbližja oseba (obrazec Obvestilo o posebnem varovalnem ukrepu). Ni pa bil obveščen zastopnik po ZDZdr, po pojasnilih bolnišnice zato, ker se pacient ni bil sposoben izreči, katerega zastopnika želi. V drugem primeru so bili o izvedenem PVU obveščeni direktor, najbližja oseba in zastopnik. Predstavniki PB Begunje so pojasnili, da o fiksaciji, ki s prekinjitvami na štiri ure traja dalj časa, obveščajo osebe po ZDZdr vsakih 12 ur. Že ob samem obisku smo opozorili, da bi bilo obveščanje treba izvajati na štiri ure, saj se dejansko ukrep vsake štiri ure izvede na novo. To opozorilo (kljub pomislekom o smiselnosti ponovne uvedbe vsake štiri ure, ki smo jih navedli zgoraj), smo ponovili tudi v poročilu DPM. Odziva bolnišnice nismo prejeli.

V PB Ormož se med posebnimi varovalnimi ukrepi po ZDZdr uporablja telesno oviranje s pasovi segufix. Po zagotovilih direktorice se največkrat uporabi samo trebušni pas, okončine naj bi fiksirali le izjemoma.

V ženskem oddelku pod posebnim nadzorom PB Ormož fiksirano pacientko namestijo v enoposteljno sobo, če je takih pacientk več hkrati, pa se za njihovo namestitev uporabi sedemposteljna soba. Pri tem nadzor nad fiksacijo izvajajo medicinske sestre, ki med gibanjem po oddelku (po)gledajo tudi skozi takrat stalno odprta vrata. Na moškem sprejemnem oddelku se fiksacija izvaja na postelji pacienta, nadzor pa izvaja sobna sestra.

Poudarjamo, da nadzor fiksiranega pacienta ob stalno odprtih vratih ni najboljša rešitev, predvsem zato, ker fiksiranega pacienta lahko gledajo tudi drugi pacienti, kar gotovo vpliva na njegovo dostojanstvo. Boljša rešitev bi bila uvedba video- in avdionadzora, najboljša pa ureditev sobe za fiksacijo poleg sestrske sobe, kjer bi bil mogoč stalni nadzor pacienta skozi stekleno pregrado. Odziva bolnišnice na te navedbe nismo prejeli.

Po pojasnilih PB Ormož se PVU izvajajo le krajsi čas in tako svojcev o tem večinoma niti ne obveščajo. To naj bi storili le, če je fiksacija daljša od 12 ur. V zvezi s tem smo poudarili, da ZDZdr take prakse ne dopušča. PVU-telesnega oviranja s pasovi ne sme trajati več kot štiri ure (po poteku tega časa zdravnik preveri utemeljenost ponovne uvedbe PVU), najpozneje v 12 urah pa mora zdravnik, ki je ukrep odredil, pisno obvestiti direktorja psihiatrične bolnišnice, najbližjo osebo, odvetnika in zastopnika. Rok 12 ur je za obveščanje določen kot (skrajni) rok, v katerem mora biti obveščanje izvedeno. Obveščanje v zakonu navedenih oseb mora biti torej izvedeno vedno, ko se uprabi PVU prišlo, in ne samo takrat, ko ukrep traja 12 ur ali več.

We agree with the hospital's warnings. Adequate regular monitoring of a physically restrained patient performed by a doctor every four hours (or more often) is undoubtedly necessary. It is also correct that, after checking the patient, the doctor orders the restraint to be continued or discontinued. The provision of Article 29 of ZDZdr may be understood (only) as the obligatory discontinuation of restraint every four hours and repeated implementation of it if necessary. This raises the question of whether the (obligatory) discontinuation of physical restraint is the best option, as it can present a danger to the personnel or the patient. According to the DPM, professional considerations require a reassessment of the current regulation and potential amendment.

We emphasise the positive practice in PB Begunje, which tries to transfer its knowledge and conduct in restraining patients to other hospitals. They notice that patients from other (general) hospitals come to them with abrasions, which is obviously a consequence of being tied with sheets. They organise training for employees from general hospitals and nursing homes to teach them how to use restraint methods correctly. Once again, we stress the need to regulate the use of special protection measures in cases not specified in ZDZdr, i.e. outside psychiatric and social institutions.

In reviewing the documentation of a particular case of restraint, we found it had lasted a total of seventeen and a half hours. The manager of PB Begunje and the next of kin were notified (the Notification on a Special Protection Measure form). However, the representative under ZDZdr was not notified; according to the hospital's explanation, the patient was unable to choose a representative. In another case, the manager, the next of kin and the representative were notified. The representatives of PB Begunje explained that persons under ZDZdr are notified every 12 hours of long-lasting restraint, with interruptions every four hours. During the visit, we pointed out that notification should have been performed every four hours, as the measure is implemented anew every four hours. This warning (despite the consideration of the rationality of the repeated implementation every four hours stated above) was repeated again in the DPM report. The hospital has not responded.

In PB Ormož, physical restraint with segufix belts is used among the special protection measures under ZDZdr. According to the manager, the abdominal belt alone is used most commonly, and the extremities are restrained only in extreme cases.

In the female secure ward of PB Ormož, the restrained patient is accommodated in a single-bed room; if there are more patients, a seven-bed room is used to accommodate them. Restraint is monitored by nurses who look through the open door of the room while walking around the ward. In the male reception ward, restraint is carried out on the patient's bed and monitored by a nurse.

We emphasise that monitoring of a restrained patient while the door is constantly open is not the best solution, particularly since the patient is visible to others, which certainly affects their dignity. It would be better to introduce video- and audio-surveillance, or, optimally, to arrange a restraint room next to the nurses' room, which would allow constant monitoring of the patient through a glass dividing wall. The hospital has not responded to these statements.

According to the explanations of PB Ormož, PVUs last only for shorter periods, so relatives are usually not even notified. They would be notified only if the restraint lasted more than 12 hours. In this respect, we underlined that this practice is not permitted under ZDZdr. A PVU of physical restraint with belts may not be imposed for more than four hours (after this period, a doctor verifies the justification for a renewal of a PVU), and the ordering doctor must notify the manager of the psychiatric hospital, the next of kin, a lawyer and a representative in writing. The period of 12 hours is specified as the (extreme) deadline for notification. Notification of persons according to the law must always be carried out when a PVU has been implemented and not only when the measure continues for 12 hours or more.

Pritožbene poti

Na oddelkih v PB Begunje so nameščeni nabiralniki za pritožbe. Za praznjenje skrbi diplomirana medicinska sestra. Opozorili pa smo, da bi bilo prav, da bi bilo na nabiralnikih bolj jasno označeno, čemu so namenjeni. Glede na podobo nabiralnika bi posameznik lahko menil, da je ta namenjen oddaji pošte.

Glede spolnega nasilja v PB Begunje do zdaj niso imeli veliko pritožb. Občasno je prišlo do verbalnega nadlegovanja, telesnega stika ni bilo. Pred kratkim pa je pacient dal pritožbo, da ga je posilila pacientevka. Pacient je poklical policijo, v bolnišnici se je zglašil kriminalist in se z njim pogovoril. Pritožba ni bila realna, šlo je za psihotičnega pacienta. Kljub takšnemu izidu dogodka pa menimo, da bi bilo dobro, da bi za podobne primere imeli izdelano klinično pot, na kar smo bolnišnico opozorili že ob našem obisku. Ker odziva bolnišnice nismo prejeli, ne vemo, ali je upoštevala dana priporočila. To bomo vsekakor preverili ob naslednjem obisku. V PB Ormož smo z zadovoljstvom ugotovili, da so bili na oddelkih nameščeni nabiralniki z napisom »Pritožbe, pohvale in ideje«, ki pacientom omogočajo anonimno podajo pritožb v zvezi z bivanjem v bolnišnici.

Drugo

V PB Begunje so nam glede verske oskrbe pacientov pojasnili, da do zdaj pri pripadnikih drugih veroizpovedi ni bilo želje po verski oskrbi. Če pa bi kdo takšno željo izrazil, ne bi ovirali prihoda predstavnika njegove veroizpovedi. Ob tem smo pozdravili, da je v lični zloženki o PB Begunje, ki jo pacienti prejmejo ob sprejemu, navedena oseba (oddelčna sestra), na katero se lahko obrne pacient glede duhovne oskrbe. Z zadovoljstvom smo tudi ugotovili, da je PB Ormož upoštevala naša priporočila, ki smo jih dali ob obisku leta 2008. Tako je poskrbljeno, da pokojnik ne leži več v bolniški sobi, ampak je premeščen v za to posebej namenjen prostor, dokler ga ne odpeljejo v mrtvašnico. Prav tako so upoštevali tudi priporočilo, naj odpustnic z zdravljenja ne pošiljajo več v ovojnica s štampiljko bolnišnice.

Complaints procedures

Collection boxes for complaints are installed in the wards at PB Begunje. A registered nurse empties them. We pointed out that the purpose of collection boxes should be more clearly marked. The collection box could easily be confused with a mail box.

There were few complaints in PB Begunje regarding sexual violence. Sometimes, there was verbal harassment, but no physical contact. Recently, a male patient complained of having been raped by a female patient. He called the police, and a criminal investigator came to the hospital and talked to him. The complaint was not genuine; the patient was psychotic. Despite this outcome, we believe that a clinical pathway should be prepared for similar cases, which we emphasised already during the visit. As the hospital did not respond, we do not know whether our recommendations have been implemented. This will be certainly monitored on our next visit. In PB Ormož, we observed with satisfaction that collection boxes marked with 'Complaints, commendations and ideas' were installed in the wards, which enables patients to file anonymous complaints about the hospital.

Other

Concerning religious care in PB Begunje, we were told that none of the patients of other religions expressed a wish for religious care. If anyone were to express such a wish, a representative of their religion would not be prevented from coming. We welcomed the fact that a person (ward nurse) is indicated as the contact person regarding religious care in a nice brochure on PB Begunje which patients receive upon admission. We were also satisfied to learn that PB Ormož has implemented our recommendations from the visit in 2008. A deceased patient no longer lies in the hospital room, but is instead transferred to a room intended for this purpose until taken to the morgue. They also observed the recommendation that treatment discharges are no longer sent in envelopes with the hospital stamp.

Obiski posebnih socialnovarstvenih zavodov

V letu 2011 smo obiskali tri posebne socialnovarstvene zavode (zavod): Dom Lukavci (4. 5. 2011), Socialnovarstveni zavod Hrastovec (SVZ Hrastovec) (28. 7. 2011 in pozneje še 19.10.2011), Dom Prizma Ponikve (27. 10. 2011) in kombinirani zavod Doma upokojencev Podbrdo, Enote Petrovo Brdo (Enota) (24. 11. 2011).

Vsi obiski zavodov so bili nenapovedani, razen prvega obiska SVZ Hrastovec. Pri vseh so sodelovali predstavniki izbranih nevladnih organizacij. Obiski so vključevali pogovor z vodstvom, ogled varovanih in drugih oddelkov ter drugih prostorov Zavoda ter pogovore z naključno izbranimi stanovalci.

O vsakem obisku smo pripravili predhodno poročilo, ki smo ga posredovali obiskanemu zavodu s predlogom, da ga obravnava ter nas obvesti o svojih stališčih do ugotovitev in predlogov DPM. S končnim poročilom, ki je vključevalo tudi odziv Zavoda, pa smo seznanili Ministrstvo za delo, družino in socialne zadeve.

Vse navedene zavode je Varuh obiskal že v letih od 2007 do 2009. Za obisk Zavoda Hrastovec in Lukavci v vlogi DPM smo se odločili, ker smo bili seznanjeni, da stanovalci bivajo tudi na varovanih oddelkih, za druga dva pa smo se odločili za obisk, zato da bi ugotovili, ali so od našega zadnjega obiska morda vzpostavili varovani oddelki oziroma ali se osebam na drug način omejuje svoboda gibanja. V Domu Prizma Ponikve nismo ugotovili, da bi imeli prostore ali izvajali dejavnosti, s katerimi bi bila posameznim stanovalcem omejena svoboda gibanja, zato nadzora v vlogi DPM nismo nadaljevali. V Enoti Petrovo Brdo pa smo ugotovili, da Zavod sicer nima klasičnega varovanega oddelka, vendar po navedbah vodstva nekateri stanovalci Enote ne morejo samostojno zapustiti. Predlagali smo, da bi bilo te stanovalce zato treba ali premestiti na varovani oddelki druge enote Zavoda ali pa o njihovem omejevanju svobode gibanja obvestiti sodišče, skladno z določbami Zakona o duševnem zdravju (ZDZdr). Zavod je v odzivnem poročilu zapisal, da so se o našem predlogu pogovorili z lečičo psihiatrinjo in skupaj z njo ugotovili, da trenutno nihče od stanovalcev ne potrebuje pridržanja na varovanem oddelku. Ob morebitnem poslabšanju duševnih stanj pa nameravajo stanovalcem pojasniti razloge za omejitve gibanja, in če bodo sposobni pojasnila razumeti, pridobiti njihovo soglasje. V nasprotnem primeru pa bodo obveščali sodišče, kakor smo predlagali.

Problematika, ki smo jo zaznali ob obiskih navedenih zavodov

V enem izmed obiskanih zavodov je vodstvo izpostavilo pereče vprašanje nameščanja stanovalcev na varovani oddelki brez privolitve na podlagi sklepa sodišča, čeprav zavod nima prostih zmogljivosti. Varuh je v zvezi s tem že podal mnenje, da je takšna ureditev sprejemov na varovani oddelki pomanjkljiva. Na neprimerno zakonsko ureditev je opozoril tudi Ministrstvo za zdravje in Ministrstvo za delo, družino in socialne zadeve. Zadnje nas je maja 2011 seznanilo, da naj bi bila v pripravi rešitev omenjene problematike z vzpostavitvijo mreže varovanih oddelkov v posebnih socialnovarstvenih zavodih, ki bo enakomerno pokrila celotno območje države in zagotovila zadostno število zmogljivosti za tovrstne namestitve.

Zavodi so nas ob obiskih nadalje seznanili s tem, da se v zadnjih letih povečujejo potrebe po nastanitvi vse starejših ljudi s številnimi zdravstvenimi težavami, na drugi strani pa je čedalje več mlajših stanovalcev s težavami z zasvojenostjo. Nastanitev starejših zahteva več zdravstvenogovalnega kadra, pri mlajših pa pogosteje nastajajo konfliktne situacije zaradi agresivnega vedenja in verbalnega nasilja do zaposlenih. Kjer so slabše še bivalne razmere, je zaradi generacijskih razlik problematika še bolj pereča. Zavodi poskušajo navedene težave reševati tako, da o tem dodatno izobražujejo zaposlene, zanje organizirajo supervizijo in intervizio.

Visits to special social care institutions

Three special social care institutions were visited in 2011: Dom Lukavci institution (4 May 2011), Hrastovec Social Care Institution (SVZ Hrastovec) (28 July 2011 and again on 19 October 2011), Dom Prizma Ponikve institution (27 October 10. 2011) and the combined institution of Podbrdo Nursing Home, the Petrovo Brdo Unit (the Unit) (24 November 2011).

All visits to the institutions were unannounced, except the first one to SVZ Hrastovec. Representatives of the selected non-governmental organisations participated in all visits. The visits included an interview with the management, the inspection of secure and other wards and other rooms of the institution, and interviews with randomly chosen residents.

A preliminary report was prepared after each visit and submitted to the visited institution; we suggested they consider it and notify us on their views of the findings and proposals of the DPM. The final report, including the institution's report, was then submitted to the Ministry of Labour, Family and Social Affairs.

The Ombudsman had already visited all of the above institutions in the period from 2007 to 2009. We decided to visit Hrastovec and Lukavci in the capacity of the DPM because we were informed that the residents were also accommodated in secure wards; and we decided to visit the latter two to learn whether they had established a secure ward since our last visit, or whether there was another method of restricting freedom of movement. In Prizma Ponikve Home, we did not observe rooms or activities aimed at restricting the residents' freedom of movement and therefore did not continue monitoring in the capacity of the DPM. In the Petrovo Brdo Unit, we found that the institution does not have a secure ward in the usual sense, but the management, state that some residents may not leave the Unit unaccompanied. We suggested either moving these residents to a secure ward of another unit of the institution or notifying the court of their restricted freedom of movement, in accordance with the provisions of the Mental Health Act (ZDZdr). In its response report, the institution stated that they had discussed our proposal with the treating psychiatrist, and it had been agreed that none of the residents needed detention in a secure ward. If the mental conditions of a resident deteriorate, they intend to explain to them the reasons for their restricted freedom of movement and, if they are able to understand, obtain their consent. Otherwise, they would notify the court as proposed.

Problems found during visits to the institutions

The management of one of the institutions raised the grave issue of accommodating residents in the secure ward without consent based on a court order, despite the lack of vacancies. The Ombudsman has already given an opinion on this matter, stating that such regulation of admissions to the secure ward is deficient. The Ministry of Health and the Ministry of Labour, Family and Social Affairs have also been notified of the inadequate regulation. In May 2011, the latter informed us that a solution to this problem was being prepared in order to establish a network of secure wards in special social care institutions which would uniformly cover the country and provide sufficient capacity for such accommodation.

During our visits, the institutions informed us of the growing need for the accommodation of increasingly older people with numerous health problems and, on the other hand, of the growing number of younger residents with addiction problems. The accommodation of elderly people requires more health care personnel, while conflict situations arise in regard to younger people due to aggressive behaviour and verbal violence towards personnel. Where the accommodation situation is poor, generational differences exacerbate the problems. The institutions try to resolve these issues by providing additional training for employees, and organise supervision and intervention for them.

V obeh zavodih, ki imata varovane oddelke, smo ugotovili, da še vedno nastajajo zamude pri obveščanju sodišč o namestitvah na teh oddelkih, v enem izmed njiju pa je prišlo ob podaljšanju namestitve do zamude s sodišča. Zavoda smo na pomanjkljivosti opozorili in enemu predlagali, naj sodišče v prihodnje opozori na zamudo in s tem seznaniti tudi Varuha. V enem izmed zavodov smo ob obisku ugotovili, da sredi leta 2011 nima nobenih informacij o zastopnikih pravic oseb na področju duševnega zdravja za njihovo področje, čeprav naj bi ti delovali že od 1. 12. 2010. Pozneje nas je zavod obvestil, da so se z več kot polletno zamudo pri njih oglasili predstavnica MDDSZ in dva zastopnika. Seznanili so jih z delom omenjenih zastopnikov in prinesli informativno gradivo (plakate, zloženke) za stanovalce.

Tako v zavodih, ki imata varovane oddelke, kot v drugih dveh, smo zasledili več nabiralnikov za pritožbe in pohvale. Na varovanih oddelkih so praviloma izobeseni tudi sezname pravic stanovalcev varovanih oddelkov, zloženke o teh pravicah pa smo zasledili le v enem zavodu.

Ob pogovorih z vodstvom enega izmed zavodov so nas ponovno opozorili na težave oziroma negotovost glede uporabe varovalnih ali varnostnih ukrepov, ki so namenjeni predvsem zagotavljanju varnosti stanovalcev (ograjice na posteljah, pasovi, ki preprečujejo zdrs stanovalca z invalidskega vozička ipd.). DPM ob tem tako kot že večkrat znova poudarja, da je omenjeno problematiko treba zakonsko urediti.

DPM je ob obiskih zavodov ugotovil tudi nekatere druge manjše nepravilnosti. Enega od zavodov smo npr. opozorili na neoznačen video nadzor in nedelujoč avdionadzor v sobi za umirjanje, kar je zavod pozneje uredil, kot so nas obvestili v odzivnem poročilu. V drugem zavodu pa smo že drugič opozorili na neprimerno lokacijo kadijnice. Zavod se je glede tega sicer že ob našem obisku v letu 2009 z nami strinjal, tokrat pa je v odzivnem poročilu zatrdil, da bo kadijnicu uredil v tem ali prihodnjem letu, odvisno od finančnih zmožnosti.

Zavodi sicer navajajo, da s svojci praviloma dobro sodelujejo, čeprav poudarjajo, da bi si želeli več obiskov. Zavodi pogosto pripravljajo različna strokovna predavanja, na katere povabijo tudi svojce.

V vseh zavodih smo ugotovili, da je dobro poskrbljeno za duhovno oskrbo stanovalcev in da so dejavnosti verske narave med stanovalci zaželene in dobro obiskane.

Prav tako smo ugotovili, da oba zavoda, ki lahko uporabljata posebne varovalne ukrepe (PVU) po ZDZdr, teh ne uporabljata pogosto. V primerih, ko pa so bili PVU uporabljeni, pri pregledu dokumentacije nismo ugotovili nepravilnosti.

Glede na to, da smo vse zavode obiskali že pred leti, smo pri vseh lahko zaznali prizadevanje za izboljšanje bivalne ravni. Pri tem lahko posebej pohvalimo tehnično opremljenost in urejenost Varovanega oddelka v SVZ Hrastovec, ki deluje od sredine leta 2011. Zavodi ob prenovah starih objektov in z odpiranjem dislociranih bivalnih enot v večjih krajih težijo k odpiranju zavodov v skupnost in s tem k sprejemanju v širši družbi.

In both institutions with secure wards, we found that there were still delays in notifying the courts concerning admission to these wards, and in one of the institutions, there was a delay from the court when the accommodation had to be extended. We pointed out the deficiencies and suggested to one institution that it warn the court of the delay in the future and inform the Ombudsman thereof. In one of the institutions, we learned during the visit that, in the middle of 2011, they had no information concerning representatives of the persons' rights in the field of mental health for their area, although they were supposed to be active since 1 December 2010. Later, the institution informed us that a representative of the Ministry of Labour, Family and Social Affairs and two representatives of persons' rights came after more than a six-month delay. They informed the institution of the work of these representatives and brought informative materials (posters, leaflets) for the residents.

Both in the institutions with secure wards and in the other two, we noticed several collection boxes for complaints and comments. In the secure wards, posters stating the rights of the residents of the secure ward are usually exhibited, but leaflets on these rights were observed in only one institution.

In discussion with the management of one of the institutions, they warned us again of the problems, or the insecurity concerning the safety or protection measures intended for providing safety to residents (rails on beds, belts preventing people from slipping off a wheelchair, etc.). As on several earlier occasions, the DPM again stresses that the above issue should be legally regulated.

During the visits, the DPM also observed several minor irregularities. We warned one of the institutions of unmarked video-surveillance and the non-functioning audio-surveillance in the room for calming down, which the institution later arranged and repaired, as we were notified in the response report. In another institution, we pointed out for the second time that the smoking room is inappropriately located. The institution had agreed during our visit in 2009, and assured in its response report to provide a smoking room this or next year, depending on financial resources.

The institutions state that their cooperation with relatives is good, but they would like relatives to visit more often. The institutions often prepare different expert lectures to which relatives are also invited.

Religious care for the residents is provided in all institutions, and religious activities are welcomed and well-attended by the residents.

We also learned that both institutions which are allowed to use special protection measures (PVU) under ZDZdr do not use them frequently. There were no irregularities found in examining the documentation of cases where a PVU was used.

Considering the fact that all the institutions were visited some years ago, we could see they have made an effort to improve the living conditions. The technical equipment and arrangement of SVZ Hrastovec secure ward, which has been functioning since the middle of 2011, can be particularly commended. By renovating older buildings and opening dislocated accommodation units in larger towns, the institutions try to open their facilities to the community in order to be more widely accepted.

Obiski domov za starejše

Leta 2011 smo obiskali Dom upokojencev Nova Gorica (17. 2. 2011), Dom starejših Laško (16. 3. 2011), Zavod sv. Martina v Srednji vasi v Bohinju (9. 6. 2011), Dom starejših Lambrechtov dom v Slovenskih Konjicah (8. 9. 2011) in Dom pod Gorco Maribor (13. 12. 2011).

Vsi obiski domov za starejše so bili nenapovedani in pri vseh so sodelovali predstavniki izbranih nevladnih organizacij. Obiski so vključevali pogovor z vodstvom, ogled varovanih oddelkov in drugih prostorov zavoda ter pogovore z naključno izbranimi stanovalci, ne glede na to, da je zaradi težav pri izražanju in okrnjenem spominu, ki je značilen za demenco, komunikacija s stanovalci mnogokrat otežena.

O vsakem obisku smo pripravili predhodno poročilo, ki smo ga poslali obiskanemu zavodu s predlogom, da ga obravnava in nas obvesti o svojih stališčih do ugotovitev in predlogov DPM. S končnim poročilom, ki je vključevalo tudi odziv zavoda, smo seznanili Ministrstvo za delo, družino in socialne zadeve. Ugotavljamo, da zavodi skrbno in sproti obravnavajo predhodna poročila DPM in se na ugotovitve in predloge DPM v glavnem ustrezno odzivajo.

Dva od obiskanih domov sta javna zavoda, trije so zasebni zavodi s koncesijo za opravljanje storitve institucionalnega varstva starejših od 65 let.

Obiskani domovi so novejšega datuma gradnje ali pa so bili vsaj delno obnovljeni, tako da so na varovanih oddelkih praviloma dobre bivalne razmere, čeprav smo opazili tudi posebnosti, ki jih omenjamo v nadaljevanju. V enem izmed novejših zavodov smo tako morali kritizirati neprimerne arhitekturne in tehnične rešitve, zaradi katerih je na oddelku v poletnih mesecih nesprejemljivo visoka temperatura prostorov. DPM je zavod podprt pri iskanju rešitev oziroma zavzemajuči za odpravo ugotovljenih napak in pri čimprejšnji ureditvi ustreznega hlajenja prostorov. V drugem zavodu, kjer je varovani oddelek organiziran v prostorih, ki so bili prvotno načrtovani in grajeni za potrebe oskrbovanih stanovanj, pa smo ugotovili, da ni neposrednega dostopa na zunanje površine. Še posebej nas je zmotilo, da sta bila ob tem hodnik in večnamenski prostor, kjer se čez dan zadržujejo stanovalci, manjše kvadrature in sta delovala utesnjujoče. Po mnenju DPM pa sta tudi neustrezna za nemirne stanovalce, še posebej, ker je večino dneva gibanje stanovalcev omejeno na oddelek. Ta zavod sicer načrtuje svojo širitev oziroma dograditev prizidka, v pritličje katerega naj bi selil tudi varovani oddelek.

Vsi varovani oddelki so bili med našim ogledom čisti in brez neprijetnih vonjav.

Zmogljivost varovanih oddelkov v obiskanih zavodih je bila od najmanjšega oddelka z 12 posteljami do največjega s 33 posteljami. Sobe so praviloma eno- ali dvoposteljne, v dveh domovih pa še imajo tudi štiriposteljne sobe.

V domovih smo preverjali delovanje klicnih zvončkov in odzivni čas osebja. Odzivnost je bila dobra. DPM sicer spodbuja zavode, da vzpostavijo tak klicni sistem oziroma računalniško podprtost klicnega sistema, da bi bilo mogoče preverjati, kako hiter je odziv zaposlenih na klic. Glede odzivnosti osebja so nam v enem zavodu pojasnili, da so kot najdaljši reakcijski čas dovolili odziv osebja v 15 minutah. DPM je presodil, da je ta čas predolg, glede na to, da naj bi se zvončki uporabljali tudi kot klic na pomoč. V odzivnem poročilu je zavod pojasnil, da jeupošteval predlog DPM in da je že vzpostavil računalniški sistem, ki omogoča nadzor nad odzivnim časom pri klicih z varovanega oddelka.

Visits to nursing homes

In 2011, we visited Nova Gorica Nursing Home (17 February 2011), Laško Nursing Home (16 March 2011), St. Martin Institution in Srednja vas v Bohinju (9 June 2011), Lambrechtov dom Nursing Home in Slovenske Konjice (8 September 2011) and Dom pod Gorco Maribor Nursing Home (13 December 2011).

All visits to nursing homes were unannounced, and representatives of the selected non-governmental organisations participated in all of them. The visits included an interview with the management, the inspection of secure wards and other rooms of the institution, and interviews with randomly chosen residents, notwithstanding that communication with the residents was often difficult because of their problems with expression and unreliable memory.

A preliminary report was prepared after each visit and sent to the visited institution; we suggested they consider it and notify us of their views on the findings and proposals of the DPM. The final report, including the institution's report, was then submitted to the Ministry of Labour, Family and Social Affairs. We observe that the institutions consider the preliminary reports of the DPM promptly and with due care, and usually respond adequately to the findings and proposals of the DPM.

Two of the homes are public institutions and three are private institutions with a concession to perform the services of institutionalised care of people aged over 65.

The homes were recently constructed or partially renovated, so the secure wards offer good living conditions, although some particularities were noticed, which are mentioned below. In one of the newer institutions, we had to criticise unsuitable architectural and technical solutions, which make the ward unacceptably hot in summer months. The DPM supported the institution in finding a solution or making a commitment to eliminate the established defects and to promptly regulate cooling of the rooms. In another institution, where the secure ward is organised in rooms originally designed and constructed for the needs of sheltered housing, we found that there is no direct access to outdoor areas. We were particularly disturbed by the fact that the hall and multi-purpose room where the residents stay during the day were rather small and rather confining. In the opinion of the DPM, they are not appropriate for restless residents, particularly because the movement of residents is restricted to the ward for most of the day. This institution plans to construct an extension and the secure ward is to be transferred to its ground floor.

All secure wards were clean and without unpleasant odours during our visit.

The capacities of the secure wards in the visited institutions ranged from the smallest, with 12 beds, to the largest, with 33 beds. The rooms have usually one or two beds, and two homes have four-bed rooms.

We checked the functioning of call bells and the response time of personnel. The responsiveness was good. The DPM encourages the institutions to establish such a call system or computer-aided call system to enable verification of the responsiveness of the employees. With respect to the responsiveness of personnel, one of the institutions explained that the maximum reaction time was set to 15 minutes. The DPM considered this too long, as these bells are also intended for calls for help. In its response report, the institution explained that they had implemented the DPM proposal and established a computer system allowing surveillance of reaction times for calls from the secure ward.

V drugem izmed zavodov, kjer so na varovanem oddelku klicni zvonci ob vratih sobe, ne pa vedno tudi ob posteljah, pa smo kritizirali, da ni izdelanega protokola glede nameščanja klicnih zvonov k postelji. DPM namreč meni, da mora biti vsaka odstranitev oziroma nemamestitev klicnega zvonca, predvsem pri nepomičnih stanovalcih (ki ne morejo doseči klicne tipke na steni), ustrezno protokolirana, tako da je omogočen nadzor, na čigavo pobudo in na podlagi čigave presoje je bil klicni zvonec odstranjen ali ni bil nameščen.

V dveh zavodih varovana oddelka nimata neposrednega izhoda na zelene površine urejene okolice, ker sta v nadstropju. Je pa v enem od njiju v sklopu oddelka večji odprt balkon (terasa), kamor pospremijo stanovalce, da so na svežem zraku. Dve stanovalki sta v tej zvezi v pogovoru s predstavniki DPM povedali, da so sprehodi zunaj tega oddelka redkejši, kakor bi si že zelele. DPM meni, da je zadrževanje stanovalcev na svežem zraku izjemno pomembno za njihovo dobro počutje in splošno zdravstveno stanje. Zato je DPM v tem primeru zavodu predlagal, da nameni posebno pozornost izhodom stanovalcev na svež zrak in zapisuje tovrstne izhode, da se ne bi kakšen stanovalec pri takšnih izhodih (ne) namerno izpustil. Drugi zavod pa že načrtuje svojo širitev oziroma dograditev prizidka, v pritličje katerega naj bi selil tudi varovani oddelek.

Ko stanovalcem ni omogočen neposreden dostop do zunanjih površin in so pri zadrževanju na svežem zraku v celoti odvisni od osebja ali svojcev, DPM sicer preverja tudi, kako se omogočajo stanovalcem izhodi na svež zrak in ali jih zapisujejo. V enem izmed obiskanih varovanih oddelkov, kjer stanovalci nimajo neposrednega dostopa na svež zrak, smo tako ugotovili, da vsakemu stanovalcu omogočijo, da v spremstvu zaposlenih vsaj enkrat na dan odide v okolico doma. O sprehodih pa se vodi tudi evidenca.

Najpogosteje ugotovljena nepravilnost pri obiskih domov za starejše se nanaša na postopek sprejema stanovalca na varovani oddelek. Ugotovili smo, da zavodi ne ravnajo po določbah ZDZdr. Glede na pojasnila, ki smo jih dobili od pristojnih, in iz dokumentacije, ki smo jo pregledali, lahko podamo splošno ugotovitev, da večina sprejemov na varovane oddelke še vedno temelji na soglasju svojcev ali skrbnikov za poseben primer, čeprav ZDZdr določa, da se sprejem lahko opravi le na podlagi privolitve stanovalca (če je stanovalcu odvzeta poslovna sposobnost, pa s soglasjem zakonitega zastopnika) ali na podlagi sklepa sodišča.

V enem izmed obiskanih zavodov, kjer so bili vsi sprejemi opravljeni zgolj na podlagi soglasja skrbnikov (za poseben primer), smo zavodu predlagali, da o osebah, nameščenih na varovani oddelek, nemudoma obvesti sodišče, kar je zavod nato tudi storil.

V drugem zavodu so nekateri sprejemi sicer temeljili tudi na privolitvah stanovalcev, vendar se nam je v pogovorih s stanovalci vzbudil dvom, ali so bili ti stanovalci sposobni razumeti svoj položaj in pomen privolitve. Na to smo opozorili zavod, ki je pojasnil, da so nekatere osebe že več let (tudi šest) nastanjene na varovanem oddelku in da se je njihovo zdravstveno stanje šele v zadnjem času toliko poslabšalo, da ne razumejo več svojega položaja in nam zato niso bili sposobni izraziti privolitve. Ker so bile v tem zavodu nekatere osebe sprejete tudi na podlagi soglasja skrbnikov za poseben primer, smo zavodu predlagali, da preveri vse postopke namestitev stanovalcev na varovani oddelek in o namestitvah, ki niso v skladu z ZDZdr, obvesti sodišče. Zavod je nato sporočil, da je predlog DPM upošteval in sodišče obvestil o dveh namestitvah: pri prvi namestitvi je šlo za primer, ko je soglasje za sprejem podpisala le skrbnica za poseben primer, pri drugi pa za stanovalko, ki je z varovanim oddelkom sicer zadovoljna, vendar ga občasno želi zapustiti.

In another institution, where call bells in the secure ward were located next to the door of the room, but not always next to beds, we criticised the absence of a protocol specifying the installation of bells next to beds. In the opinion of the DPM, each removal or non-installation of a call bell, particularly in immobile residents (who cannot reach the bell on the wall), must be specified in a protocol to monitor upon whose initiative and based upon whose assessment the bell was removed or not installed.

Because they are located on the higher floor, the secure wards in two institutions lack a direct exit to the green surfaces of the surrounding arranged area. In one of them, there is a larger balcony (terrace) within the ward where residents are escorted to enjoy the fresh air. In this respect, two residents told the DPM representatives that walks outside the ward are less frequent than they would like. In the opinion of the DPM, being in the fresh air is extremely important for the well-being and general health of the residents. In this case, the DPM suggested to the institution that they dedicate more attention to residents being in the fresh air and keep a record of such periods so that none of the residents is (un)intentionally left out. The second institution plans to construct an extension and the secure ward is to be transferred to its ground floor.

When residents do not have direct access to outdoor areas and are dependent entirely on personnel or relatives in order to go outside, the DPM also verifies how these exits are organised and whether records are kept. In one of the visited secure wards without direct access to outside, we learned that each resident is escorted at least once per day to walk around the institution. Records are kept of the walks.

The most commonly established irregularity observed in nursing homes concerns the procedure for admitting a resident to the secure ward. We found that the institutions do not observe the provisions of ZDZdr. Considering the explanations received by the competent staff and the reviewed documentation, we may make the general observation that the majority of admissions to the secure ward is still based on the consent of relatives, or custodians in special cases, although ZDZdr requires that admission may be carried out only with the resident's consent (or that of their legal representative if their contractual capacity has been discontinued) or based on a court decision.

In one of the institutions we visited, where all admissions were carried out only with the consent of custodians (in special cases), we proposed that they notify the court of the persons accommodated to the secure ward, which the institution later did.

In another institution, some admissions were based on the residents' consent; however, when we talked to the residents, we doubted that they had been able to understand their situation and the meaning of consent. We warned the institution thereof, and they explained that some persons had been accommodated in the secure ward for several (up to six) years and that their health had deteriorated recently so as to prevent them from understanding their situation, and they were thus not able to give consent. Because some persons were admitted to this institution based on the consent of custodians for special cases, we proposed that the institution check all procedures for accommodating residents to the special ward and notify the court of any accommodation not in accordance with ZDZdr. The institution later informed us that it had observed the DPM proposal and notified the court of two accommodations: the first was a case where consent was given only by a custodian for special cases, and the other was a resident who is otherwise satisfied with the secure ward, but who occasionally wants to leave.

V enem izmed zavodov smo nadalje kritizirali predvsem ugotovljene zamude pri pošiljanju predlogov sodišču za podaljšanje zadržanja oseb, ki so nastanjene na varovanem oddelku. Ta zavod pred sprejemom v varovani oddelek navadno pridobi soglasje pooblaščenca/skrbnika za poseben primer in »formalno« tudi privolitev stanovalca, ki pa sicer (kot je zavod sam pojasnil) ni zmožen sodelovati v postopku sprejema. Zato o sprejemu zavod nato obvesti sodišče, ki tudi odloči o dopustnosti zadržanja. Čeprav ima tudi DPM nekatere pomislike glede sedanje zakonske ureditve sprejemov na varovani oddelek, pa smo morali zavod opozoriti, da s takšnim ravnanjem krši trenutno veljavni predpis.

Na varovanih oddelkih smo, razen v enem, pogrešali na vidnem mestu izobešen seznam pravic, ki jih imajo osebe na takem oddelku po ZDZdr. Prav tako nobeden od varovanih oddelkov ni imel izobešenega seznama zastopnikov pravic oseb na področju duševnega zdravja. V enem izmed zavodov so pojasnili, da je bil seznam pravic na oglašni deski, a ga je očitno nekdo odstranil. DPM je zato zavodom predlagal, da poskrbijo za namestitev seznama pravic in zastopnikov.

V kar treh od obiskanih zavodov na varovanih oddelkih ponoči ni zagotovljene stalne navzočnosti osebja. Dogajanje na hodniku varovanega oddelka zaposleni (navadno dva na zavod) spremljajo (zgolj) po videonadzoru v dežurni sobi, ki je zunaj oddelka, po varovanem oddelku pa opravljajo le občasne nočne obhode (na približno dve uri) oziroma se odzivajo na klice. Dva zavoda imata dežurno sobo na varovanem oddelku, kar zagotavlja na tem oddelku večjo navzočnost osebja v nočnem času. V enem izmed obiskanih zavodov, kjer so ponoči trije zaposleni, pa je zagotovljena celo stalna navzočnost vsaj enega zaposlenega na varovanem oddelku. Glede na to, da stanovalci varovanega oddelka praviloma ne znajo uporabljati klicnih zvončkov, je po mnenju DPM stalna navzočnost zaposlenega bistvena za hitro odzivnost zaposlenih in za zagotavljanje varnosti stanovalcev na oddelku.

V vseh obiskanih zavodih so nam zagotovili, da posebnih varovalnih ukrepov (PVU) ne uporabljajo. Smo pa v enem primeru opazili, da ima zavod nastavljeno evidenco »List evidentiranja fiksacije s pasovi Segufix«, kar bi lahko kazalo, da se takšni pasovi vendorle uporabljajo. O izvedenih fiksiranjih na posteljo smo našli tudi zapise, ki so bili sicer zelo pomanjkljivo izpolnjene. Iz evidence ni bilo razvidno, da bi fiksacije odobril zdravnik, koliko časa so dejansko trajale, praviloma ni bilo zapisanih dodatnih opozoril in opažanj ipd. Zavodu smo zato predlagali, naj dosledno upošteva zahteve ZDZdr, tako glede načina odobritve uporabe PVU, obveščanja, časovnih omejitev in vodenja evidenc. Ker so v nekem zavodu fiksacije stanovalcev izvajali kar z rjuho, je DPM zavod opozoril, naj fiksacij ne izvaja z improviziranimi pripomočki, saj je tako izvedena fiksacija lahko neprimerna, neudobna in celo nevarna.

Na vseh varovanih oddelkih so za stanovalce oddelka organizirane dejavnosti, ki se jih stanovalci udeležujejo glede na zmožnosti in interesu. Pogosta je tudi praksa, da se stanovalci varovanega oddelka vključujejo v dejavnosti zunaj oddelka (npr. v delovno terapijo, ki poteka v prostorih delovne terapije; spremljajo jih na prireditve, ki jih organizira zavod ipd.). Takšno ravnanje ocenjujejo kot dobro, saj prispeva h kakovostnejšemu preživljanju časa za stanovalce, ki so sicer omejeni na varovani oddelek in s tem preprečuje tudi njihovo socialno osamo.

Glede pritožbenih poti ugotavljamo podobne pomanjkljivosti kot pri lanskih obiskih. Tako smo opomnili osebje varovanih oddelkov, kjer ni nameščenih nabiralnikov, ki bi omogočali anonimno oddajo pritožb, saj stanovalci nimajo prostega dostopa do nabiralnikov zunaj oddelka. Poleg tega so pritožbene poti nejasne, če zavodi nimajo pravilnika/navodil glede postopka notranjega reševanja pritožb. DPM namreč meni, da je pomembno, da so stanovalci seznanjeni, kako bo njihova pritožba obravnavana in kdo je odgovoren za njeno obravnavo.

Furthermore, in one of the institutions, we criticised the established delays in submitting proposals to the court to renew the detention of persons accommodated in the secure ward. Before admission to the secure ward, this institution normally obtains consent from the representative/custodian for special cases and 'formally' also the resident's consent, who is (according to the institution) unable to participate in the admission procedure. The institution also notifies the court of the admission, which decides on the permissibility of the detention. Although the DPM also has several considerations concerning the valid legal regulation of admissions to the secure ward, we had to warn the institution that such conduct violated the applicable rules.

In all secure wards except one, we noted that there was no list of rights of persons exhibited in a visible place in such wards under ZDZdr. Nor was a list of representatives of the rights of persons in the field of mental health found in any of the secure wards. It was explained in one of the institutions that the list of rights had been posted on the bulletin board, but that someone must have removed it. The DPM suggested that the institutions provide lists of rights and of representatives.

In three of the visited institutions, the personnel are not constantly present in the secure ward at night. The employees (usually two per institution) monitor the halls of the secure ward (only) through video-surveillance in the duty room, which is outside the ward, and perform periodic night rounds (every two hours) in the secure ward or respond to calls. The duty room in two institutions is located in the secure ward, which ensures the greater presence of personnel on this ward at night. In one of the visited institutions, where three employees stay overnight, the constant presence of at least one person in the secure ward is provided. Considering that the residents of the secure ward usually do not know how to use call bells, the constant presence of an employee is, in the opinion of the DPM, essential for a quick response from personnel and for the safety of ward residents.

We were assured at all the visited institutions that special protection measures (PVU) were not used. However, we noticed that one institution had prepared records entitled 'Records of restraint using Segufix belts', which could indicate that such belts were in fact being used. We also found records on bed restraint, which were insufficiently completed. The records did not show whether the restraint had been approved by a doctor, its duration, and usually did not include additional warnings or observations. We proposed that the institution strictly observe the recommendations specified in ZDZdr, both in terms of approving PVU, time limits and record-keeping. Because one institution performed restraint of residents by means of a sheet, the DPM warned them not to use improvised means, as such restraint may be inappropriate, uncomfortable and even dangerous.

Activities are organised in all secure wards which are attended by the residents according to their abilities and interests. It is common practice for the residents of the secure ward to participate in activities outside the ward (e.g. occupational therapy on the premises for occupational therapy; residents are escorted to events organised by the institution, etc.). We consider such conduct good, as it contributes to improving the quality time of residents, who are otherwise restricted to their ward, and prevents their social isolation.

As far as complaints procedures are concerned, we observed similar irregularities as in previous visits. We had to reprimand the personnel of the secure wards, where there are no collection boxes to file complaints anonymously, since the residents do not have free access to collection boxes outside the ward. Moreover, the complaints procedures are not clear if the institutions do not have rules/instructions concerning the internal resolution of complaints of the DPM, it is important for residents to know how their complaints will be treated and who is responsible for that.

Obisk Azilnega doma in Centra za tujce

V letu 2011 smo obiskali tudi Azilni dom (12. 10. 2011) in Center za tujce (18. 11. 2011). Oba sta objekta Ministrstva za notranje zadeve, pri čemer je prvi namenjen predvsem nastanitvi prisilcev za mednarodno zaščito, drugi pa tujcev, ki so nezakonito v Republiki Sloveniji. Podrobnosti v zvezi z vsakim od njiju so zapisane v poročilih o obisku, objavljenih na uradni spletni strani Varuha, v nadaljevanju pa za potrebe tega poročila opisujemo le najpomembnejše ugotovitve.

Oba objekta imata bistveno večje uradne zmogljivosti, kot pa je (že več let) v njiju nastanjene oseb. To je seveda spodbudno. Tudi bivalne razmere v obeh so bile še sprejemljive, in osebe, s katerimi smo se pogovorili, bivalnih razmer niso problematizirale. Nekaj inventarja oziroma opreme bivalnih prostorov sicer kaže na to, da bo prej ali slej potrebna zamenjava.

Ker so v obeh zavodih nastanjeni posamezniki, ki večinoma prihajajo iz zelo različnih, nemalokrat tudi zelo (geografsko, pa tudi sicer) oddaljenih držav oziroma kultur, ne preseneča, da so bile pritožbe čez (pre)hrano zelo pogoste. DPM meni, da će ob izpolnjenih sanitarnih standardih kalorična vrednost obrokov dosega predpisano vrednost in hkrati zadošča tudi morebitnim posebnim zdravstvenim ali verskim potrebam prisilcev, take prehrane ni mogoče označiti drugače kot za ustrezno. Vseeno smo tudi na tem področju lahko izpostavili nekaj smiselnih pripomb. V Azilnem domu smo na primer posebej poudarili mnenje naše izvedenke, da gre pri ponavljajočem se nezadovoljstvu s hrano »za simptom, in ne za bolezen«. Za te osebe ima hrana poseben, simboličen pomen – to je v njihovem trenutnem položaju lahko edino področje, ki ga (ali bi ga lahko) obvladujejo, saj je vse drugo precej negotovo. Poleg tega je njihova domača hrana nekaj, kar jih povezuje z domovino. Na drugi strani pa je to »varno področje«, kjer lahko izražajo nezadovoljstvo z državo gostiteljico. Tako prav ukvarjanje s hrano na dokaj varen način omogoča zadovoljevanje osnovnih psiholoških potreb (uveljavljanje, moč, pripadnost, svoboda), ki so v njihovem trenutnem položaju večinoma zelo slabo zadovoljene. V Centru za tujce smo na primer tudi tokrat predlagali, da poskrbi za prevode jedilnikov v tujcem razumljive jezike, saj samo v slovenskem niso uporabni.

Druga najpogostejša tema pritožb tujcev oziroma prisilcev za mednarodno zaščito se je nanašala na postopke, ki so jih zadevali. Poleg nepoznavanja prava so izstopali predvsem njihovi očitki na račun dolgotrajnosti postopkov. Gre za zelo zapleteno problematiko, kjer se morebitni očitki o ne zadosti hitrem (po)teku lahko hitro izkažejo za neupravičene, saj je vselej treba upoštevati posebnosti posameznega primera in ne prehitro posploševati. Pozabiti tudi ne gre, da je že po sami naravi stvari to zelo posebno področje, ki ga naznamujejo komunikacijske ovire, nezadovoljivo sodelovanje stranke in podobno. Okoliščin, ki bi kazale na to, da bi se s temi postopki namerno zavlačevalo, nismo ugotovili. Smo pa v Azilnem domu izpostavili, da bi se lahko postopek skrajšal, če izvedencem za izdelavo psihiatričnih oziroma psiholoških izvedenskih mnenj (da se ugotovi, ali je prisilec za mednarodno zaščito sposoben zaslisanja) ne bi dovolili roka za opravo izvedenskega dela v 60 dneh. V Centru za tujce smo posebej preverili, kako je urejeno informiranje tujcev, kar ima v tem okviru nedvomno pomembno vlogo. V zvezi z informiranjem pomanjkljivosti nismo ugotovili, saj je poleg ustnega informiranja strokovnih delavcev centra omogočeno tudi pisno informiranje z zloženkami, možnost telefonskih klicev tudi na diplomatsko-konzularno predstavnštvo in na organizacije, na katere se lahko tujci obrnejo po nasvet oziroma pomoč, možnost pridobivanja informacij po svetovnem spletu ...).

Visit to the Asylum Centre and the Aliens Centre

In 2011, we also visited the Asylum Centre (12 October 2011) and the Aliens Centre (18 November 2011). Both are facilities of the Ministry of the Interior; the first is primarily intended for the accommodation of applicants for international protection, and the other is for the accommodation of aliens who are illegally in the Republic of Slovenia. Details related to each of them are noted in the reports on the visits published on the Ombudsman's website; for the needs of this report, only the most important findings are described below.

The official capacities of both facilities are significantly higher than (for several years) the number of persons accommodated, which is encouraging, of course. Living conditions in both were acceptable and the persons to whom we talked did not raise any issues related thereto. Some items of the inventory or equipment of accommodation rooms indicate that replacement will eventually be necessary.

Because both facilities accommodate individuals coming from very different, often very distant (in geographical terms and otherwise) countries or cultures, it is not surprising that complaints regarding food were very common. If the meals meet sanitary standards, contain the prescribed amount of energy and also satisfy any special health or religious needs of the applicants, such food cannot be considered as inappropriate, in the opinion of the DPM. Nonetheless, some reasonable comments could be underlined in this area. In the Asylum Centre, we emphasised the opinion of our expert, who stated that constant dissatisfaction with food was 'a symptom and not a disease'. For such people, food has special, symbolic meaning – it might be the only subject that can (or could) be under control in their current situation, since everything else is rather insecure. Moreover, their national food is something that connects them with their home country. On the other hand, it is a subject through which it is 'safe' to express dissatisfaction with the host country. Being concerned with food this satisfies basic psychological needs (establishment, power, sense of belonging, freedom), which in their current situation are mostly poorly satisfied. In the Aliens Centre, we proposed they provide translations of menus into languages comprehensible to aliens, as having them only in Slovenian is pointless.

The second most common cause of complaint from aliens or from applicants for international protection regarded procedures that concern them. Besides being unfamiliar with the law, the most numerous reproaches concerned long-lasting procedures. This is a very complex issue, where any complaints concerning an insufficiently rapid procedure may prove unjustified, as the specifics of a particular case must be taken into account and general conclusions must not be drawn. It should be noted that the nature of this area is very specific, involving communication barriers, insufficient cooperation of the client and similar. There were no circumstances found to indicate intentional delays in procedures. However, we pointed out in the Asylum Centre that the procedure could be faster if the experts for the preparation of psychiatric or psychological expert opinions (to establish whether an applicant for international protection is capable of being questioned) were not given 60 days to perform the expert work. In the Aliens Centre, we specifically checked how the information of aliens is regulated, which undoubtedly plays an important role in this context. There were no deficiencies observed in relation to information, since in addition to oral information provided by the competent workers at the Centre, aliens are informed in writing by means of leaflets, and have the option to make telephone calls to a diplomatic mission or consular post and other organisations for advice, help or information, and may also use the internet for information.

Posebej smo preverjali tudi psihosocialno oskrbo in zagotavljanje organiziranih dejavnosti za tuje oziroma prosilce za mednarodno zaščito. V obeh krajih odvzema prostosti na tem področju pritegnejo predvsem zunanje izvajalce, bodisi na podlagi pogodb bodisi prostovoljno. V Azilnem domu pa smo se spraševali, ali zagotovila vodstva o izvajanju programov res povsem držijo in ali so ti res zadovoljivi. Glede na to, da naj ne bi tako redko prihajalo do trenj predvsem med osebjem in prosilci za mednarodno zaščito (nevljudnost, nasilnost, grožnje, kljubovanje in podobno pri prosilcih za mednarodno zaščito), bi z ustreznimi programi lahko vplivali na to. V Centru za tuje pa že dalj časa opažamo ravnodušnost tujcev oziroma z njim povezanimi možnostmi za organizirane dejavnosti. Vodstvo sicer o tem vselej zastopa stališče, da za dejavno preživljvanje časa nastanitve nista dovolj samo trud in volja strokovnega osebja, to morajo izkoristiti tudi tujci, ki pa so velkokrat pasivni opazovalci dogajanja. Pri DPM menimo, da je prav to razlog več, da bi bilo treba poskušati (po)iskati (nove oziroma še druge) načine, kako (še bolj) motivirati tuje za razne kulturne, rekreativne in druge družabne dejavnosti.

Poleg zgoraj že omenjenega smo zaznali še nekaj drugih pomembnih vidikov življenja v Azilnem domu in Centru za tuje (na primer stiki z odvetniki, zagotavljanje prevodov odločb ...), ki pa so (med pripravo tega poročila) še v obravnavanju pri Varuhu.

We also checked psychosocial care and the provision of organised activities for aliens or applicants for international protection. In both detention facilities, these activities are outsourced, either on a contractual or voluntary basis. In the Asylum Centre, we wondered whether the management's assurances of their implementation of programmes were true, and whether they were satisfactory. Considering that there are frequent conflicts between the personnel and the applicants for international protection (impoliteness, aggression, threats, defiance and similar on the part of applicants for international protection), adequate programmes might positively influence this issue. In the Aliens Centre, we have for some time observed the indifference of the aliens towards organised activities. The management stands on the position that the effort and will of the expert personnel are not sufficient to enable active use of time during detention; the aliens should also use the opportunity, but they are often merely passive observers of events. According to the DPM, this is another reason that (new or other) methods to motivate aliens to take up different cultural, recreational and other social activities should be sought.

In addition to the above, several other important aspects of detention in the Asylum Centre and the Aliens Centre were observed (e.g. contacts with lawyers, providing translations of decisions etc), which are (during the preparation of this report) still under consideration by the Ombudsman.

Obiski zavodov za vzgojo in izobraževanje otrok in mladostnikov s čustvenimi in vedenjskimi motnjami

Splošno

V Sloveniji je dest zavodov za vzgojo in izobraževanje otrok in mladostnikov s čustvenimi in vedenjskimi motnjami (zavodi), za katere je pristojno Ministrstvo za šolstvo in šport (MŠŠ). Za sprejemanje otrok in mladostnikov z motnjami v duševnem razvoju, ki jim je izrečen vzgojni ukrep oddaje v zavod, pa je bil določen en zavod za usposabljanje, za katerega je pristojno Ministrstvo za delo, družino in socialne zadeve (MDDSZ). V zavode se tako vključujejo mladostniki na podlagi odločb centrov za socialno delo (na primer zaradi ogroženosti v družini), odločb sodišč (kot vzgojni ukrep) ali pa z odločbami o usmeritvi (v vzgojni program).

Število obiskov in lokacije

V letu 2011 smo obiskali štiri zavode (Vzgojni zavod Slivnica pri Mariboru pa že v decembru 2010):

- Mladinski dom Maribor,
- Vzgojni zavod Kranj,
- Vzgojno-izobraževalni zavod Višnja Gora,
- Vzgojni zavod Logatec.

Organiziranost

Dva zavoda (Mladinski dom Maribor in Vzgojni zavod Kranj) sta organizirana le v stanovanjskih skupinah – v individualnih hišah oziroma v samostojnih stanovanjih v urbanih naseljih. Stanovanjske skupine delujejo v stavbah na različnih lokacijah in v najetih oziroma kupljenih stanovanjih v večjih mestih (Ljubljana, Maribor, Kranj, Postojna). Glede na normativ je v skupine običajno vključenih do osem mladostnikov. Stanovanjsko skupino strokovno vodijo štirje vzgojitelji. V stanovanjskih skupinah, v katerih so vključeni tudi osnovnošolski otroci, je dodatno zaposlena tudi gospodinja. Iz stanovanjskih skupin vsi mladostniki obiskujejo zunanje osnovne in srednje šole.

Trije zavodi pa so kombinirani. Dejavnost izvajajo v stavbah internatskega tipa s klasičnim modelom vzgoje – v vzgojnih skupinah. Tudi ti zavodi imajo vsaj po eno stanovanjsko skupino, ki je povsem ločena od glavne stavbe in večinoma na drugi lokaciji. V vzgojnih skupinah je po normativih lahko največ 12 mladostnikov. Zavodi s klasičnim modelom vzgoje imajo svoje interne šole (osnovne in srednje poklicne), kar je posledica zahtevnejše populacije, ki se vanje vključuje.

DPM meni, da je življenje in delo z mladostniki s čustvenimi in vedenjskimi motnjami v stanovanjskih skupinah primerna organizacijska oblika. Mladostniki po principu družinske vzgoje v njih neposredno pridobivajo življenjske vzorce ter se navajajo na samostojnost in odgovornost. Za čustveno in vedenjsko najbolj oškodovane pa je ta oblika življenja lahko tudi preveč zahtevna, zato je smiselno vsaj v manjšem obsegu ohraniti klasični model in s tem možnost namestitve v vzgojne skupine.

Visits to institutions for the care and education of children and adolescents with emotional and behavioural disorders

General

In Slovenia, there are ten institutions for the care and education of children and adolescents with emotional and behavioural disorders (“institutions”), which are the responsibility of the Ministry of Education and Sport (MŠŠ). One juvenile institution, for which the Ministry of Labour, Family and Social Affairs (MDDSZ) is responsible, was determined to accept children and adolescents with mental disorders on whom an educational measure of committal to the institution has been imposed. Adolescents are committed to these institutions based on the decisions of social work centres (e.g. because they are endangered in the family), on court decisions (as an educational measure) or on placement decisions (placement in an educational programme).

Number of visits and locations

In 2011, we visited four institutions (and the Slivnica pri Maribor Juvenile Institution already in December 2010):

- Maribor Juvenile Home,
- Kranj Juvenile Institution,
- Višnja Gora Juvenile Institution,
- Logatec Juvenile Institution.

Organisational structure

Two institutions (Maribor Juvenile Home and Kranj Juvenile Institution) are organised as residential groups only – in individual houses or independent apartments in urban settlements. The residential groups function in buildings in various locations and in rented or purchased apartments in larger cities (Ljubljana, Maribor, Kranj, Postojna). According to the standards, up to eight adolescents are included in each group. Four childcare workers professionally lead the residential group. A housekeeper is additionally employed in residential groups which include primary school children. All adolescents from residential groups attend external primary and secondary schools.

Three institutions are combined. Their activity is performed in boarding-type buildings through a classic educational model – in educational groups. These institutions also have at least one residential group entirely separate from the main building, usually located elsewhere. According to the standards, up to 12 adolescents may be included in one educational group. The institutions with the classic educational model have internal schools (primary and secondary – vocational), which is a consequence of the more demanding population included there.

In the opinion of the DPM, residential groups are a suitable organisational form where adolescents with emotional and behavioral disorders may live and work. Following the principle of family education, adolescents directly acquire living patterns and become used to independence and responsibility. For adolescents with the greatest emotional and behavioural problems, this type of arrangement may be too demanding; therefore, it is reasonable to preserve the classic model and the option of placement in educational groups at least to a smaller extent.

DPM je zaradi vseh posebnosti življenja in dela v zavodih MŠŠ predlagal premislek o posebnem zakonu ali o samostojnih določbah v okviru obstoječe zakonodaje, ki bi posebej urejale področje organiziranosti in delovanja zavodov. MŠŠ je sprejelo pobudo za pripravo posebnega zakona, ki bi urejal področje vzgojnih zavodov. V odzivnem poročilu je sporocilo, da je tako pobudo dal tudi aktiv ravnateljev vzgojnih zavodov. Dogovorjeno naj bi bilo, da ravnatelji opredelijo področja, ki so po njihovem slabo določena ali v obstoječi zakonodaji manjkajo in bi jih tak zakon urejal.

Kadrovske in prostorske razmere

Ob upoštevanju standardov in normativov za delo z mladostniki s čustvenimi in vedenjskimi motnjami je število strokovnega osebja primerno, prav tako tudi njihova vrsta in stopnja izobrazbe. Gre za strokovnjake z univerzitetno izobrazbo s področij socialne pedagogike, psihologije, socialnega dela in drugih, ki so še dodatno usposobljeni za delo s to populacijo.

Prostorske razmere in oprema so v dveh zavodih primerne (Vzgojni zavod Slivnica in Mladinski dom Maribor), v enem zelo dobre (Vzgojni zavod Kranj), slabše pa v Vzgojno-izobraževalnem zavodu Višnja Gora (za dve stanovanjski skupini), precej slabe (potrebna je temeljita adaptacija, dograditev telovadnice, posodobitev učnih delavnic, zamenjava opreme) pa v Vzgojnem zavodu Logatec, na kar je DPM opozoril MŠŠ, ki izvaja ustanoviteljske dolžnosti.

MŠŠ je v sprejelo naša priporočila in dalo obljubo, da bo poskušalo zagotoviti finančna sredstva za zavode, v katerih so potrebne manjše naložbe. Ni pa se opredelilo do vseh predlogov DPM za izboljšanje prostorskih razmer v Vzgojnem zavodu Logatec (dograditev telovadnice, posodobitev učnih delavnic), ampak je zapisalo, da so bila že predvidena finančna sredstva za adaptacijo prostorov za dve vzgojni skupini. Posega ni bilo mogoče izvesti zaradi rebalansov državnega proračuna in lani sprejetih omejitev na področju naložb.

Izvajanje dejavnosti: pohvale in priporočila DPM

Da bi se zmanjšal strah pred institucionalnim življenjem v zavodih, mladostnikom in staršem pred namestitvijo predstavijo posamezen zavod oziroma stanovanjsko skupino. Vsi obiskani zavodi imajo zgledno izdelane publikacije z osnovnimi informacijami. To in še drugo gradivo je objavljeno tudi na spletnih straneh posameznega zavoda.

DPM je zavodom predlagal interdisciplinarno razpravo o potrebnosti ustanovitve triažnega diagnostičnega centra (v preteklosti je bil to 'prehodni mladinski dom'), v katerega bi se v prvem obdobju oddaje v zavod nameščali mladostniki za krajše obdobje – od treh do štirih mesecev. Po tem obdobju bo odločitev, v kateri zavod bi posameznik sodil, lažja in strokovnejša. Odziva na ta predlog DPM ni bilo niti od zavodov niti od MŠŠ. Za vsakega mladostnika praviloma v mesecu dni po sprejemu vzgojni zavod pripravi individualni vzgojno-izobraževalni načrt s konkretnimi dejavnostmi za uspešen osebnostni razvoj. Na podlagi naključno pregledanih osebnih spisov mladostnikov je DPM ugotovil, da zavodi zgledno vodijo njihovo osebno dokumentacijo. V zvezi z individualnim načrtom je DPM zavodom priporočil, da ga poleg ravnatelja podpiše tudi mladostnik, saj sta mu s tem dani primerna veljava in večja odgovornost za sodelovanje v učno-vzgojnem procesu.

Posebno pozornost namenjajo sodelovanju s starši ali skrbniki. Starši se prek Sveta staršev in Sveta zavoda tudi uradno vključujejo v življenje in delo posameznega zavoda.

Because of all the specific features of living and working in the institutions, the DPM has suggested that MŠŠ consider introducing a special act or separate provisions within the existing legislation to regulate the organisational structure and operation of the institutions. MŠŠ adopted an initiative to prepare a special act governing juvenile institutions. In their response report, they informed us that such an initiative had also been submitted by the working group of juvenile institutions' principals. It was agreed that the principals would define those areas which they believe are poorly regulated or absent from the existing legislation and which would be regulated by this act.

Personnel and residential conditions

Taking into account the standards specifying work with adolescents with emotional and behavioural disorders, the number of expert personnel is adequate, as well as their type and level of education. They are experts with a university education in the fields of social pedagogy, psychology, social work and others, with additional training for work with this population.

Residential conditions and equipment in two institutions are suitable (Slivnica Juvenile Institution and Maribor Juvenile Home), in one very good (Kranj Juvenile Institution), poorer in Višnja Gora Juvenile Institution (for two residential groups) and rather bad (thorough renovation, construction of a gym, modernisation of teaching workshops, replacement of equipment are needed) in Logatec Juvenile Institution, of which the DPM warned MŠŠ, which performs funding responsibilities.

MŠŠ accepted our recommendations and promised to try to provide financial resources for the institutions in which minor investments are necessary. However, they did not take a position on all the proposals of the DPM to improve residential conditions in Logatec Juvenile Institution (construction of a gym, modernisation of teaching workshops) but wrote that financial resources for the adaptation of the rooms for two educational groups had been earmarked. The work could not be carried out because of the amended national budget and limitations in the field of investments adopted in the previous year.

Activity performance: praise and recommendations from the DPM

In order to reduce the fear of institutionalised life in the institutions, each institution or residential group is presented to the adolescents and their parents prior to committal. All institutions visited have exemplary publications with basic information. This and other materials are also published on the website of each institution.

The DPM proposed to the institutions that they conduct an interdisciplinary discussion on the need to establish a triage diagnostic centre (in the past, this was called a 'transitory juvenile facility') in which adolescents would be placed in the first period of committal to an institution – for three or four months. After this period, the decision as to which institution an individual should be placed in would be easier and more professional. There has been no response to this proposal of the DPM from either the institutions or MŠŠ. For each adolescent, the juvenile institution usually prepares an individual educational plan within a month after admission, including concrete activities needed for successful personality development. Based on the randomly reviewed personal files of adolescents, the DPM found that the institutions kept their personal documentation in an exemplary way. As far as the individual plan is concerned, the DPM recommended to the institutions that, in addition to the principal, the plan should also be signed by the adolescent, as this would give them recognition and responsibility for participating in the educational process.

Special attention is dedicated to cooperation with parents or guardians, who are, through the Parents Council and the Institution Council, officially involved in the life and work of a particular institution.

Izobraževanje je temeljna vrednota vsakega zavoda. Mladostniki se lahko vključijo v različne programe izobraževanja in poklicnega usposabljanja neposredno v zavodih ali vključeni v zunanje šole. Za sodelovanje zavodov s srednjimi šolami v izvajanju učnih procesov je DPM priporočil, da vsak zavod posebej sklene ustrezne pogodbe o sodelovanju in opredeli pravice in obveznosti zunanjih izvajalcev učno-vzgojnih programov.

Na priporočilo DPM se je odzvalo MŠŠ. Pristojni so sporočili, da bo s srednjimi šolami, s katerimi vzgojni zavodi sodelujejo, v kratkem sklenjen dogovor o sodelovanju. V njem bodo opredeljene pravice in obveznosti srednjih šol. Na MŠŠ usklajujejo besedilo, da bo poenoteno.

Mladostnikespodbuja jok dejavnem preživljjanju prostegačasa. Vsizavodi organizirajo številne prostočasne dejavnosti, v katerih mladostniki lahko odkrivajo in razvijajo svojo nadarjenost.

Težave z nedovoljenimi mamilji, alkoholom in kajenjem so v nekaterih zavodih bolj, v drugih pa manj navzoče. Različni so tudi načini obravnave teh pojavov, zato DPM zavodom predлага razmislek o izdelavi enotne strategije obravnave zasvojenosti z nedovoljenimi mamilji, alkoholom in kajenjem.

DPM zavodom priporoča, da pripravijo sistematično izobraževanje mladostnikov o učinkih in posledicah uživanja nedovoljenih mamilj, alkohola, kajenja ter o posledicah tveganih vedenj, preprečevanju okužb z virusi HIV, s hepatitisom in o odvajanju od škodljivih razvodov oziroma zasvojenosti.

Na priporočilo se je odzval le Mladinski dom Maribor. Strokovni delavci so izrazili dvom o tovrstnem sistematičnem izobraževanju mladostnikov, saj po njihovem mnenju ni vedno smiselno. Menijo, da bi lahko z njim dosegli tudi nasprotni učinek, saj lahko pretiran poudarek takšnih izobraževanj doseže učinek v smislu popularizacije neželenih pojavov. Zato težave in nevarnosti, ki pretijo mladostniku, učinkoviteje rešujejo individualno z vsakim posameznikom, saj se vsi mladostniki ne srečujejo z enakimi težavami.

DPM je pri institucionalnih oblikah namestitve mladostnikov posebej pozoren na pravila bivanja v njih, na hišni red in morebitne sankcije, ki sledijo, če stanovalci institucij pravil ne upoštevajo. Glede na različnost vzgojnega ukrepanja po posameznih zavodih ob kršitvah pravil DPM predлага, da socialno-pedagoška stroka prouči možnosti za pripravo smernic za izdelavo vzgojnega načrta (kot je predviden za osnovne šole v skladu z Zakonom o osnovni šoli) in iz njega izhajajoča pravila prebivanja v zavodu, vključno s pritožbenimi možnostmi in potmi. MŠŠ je podprlo to priporočilo DPM in zagotovilo, da bo pobudo za izdelavo smernic za vzgojni načrt v vzgojnih zavodih in s tem jasnejših pravil prebivanja v njih predstavilo na aktivu ravnateljev vzgojnih zavodov.

DPM prav tako priporoča, da zavodi v letne delovne načrte na vzgojnem področju vključijo tudi poglavje o vrednotah, ki so jim zavezani vsi v zavodih.

Stanovanjske skupine običajno prebivajo v individualnih hišah sredi urbanih naselij in navzven ne dajejo vtisa institucionalnega življenja. Glede na to, da so državne ustanove opremljene z napisi, DPM zavodom priporoča, da posamezne lokacije, v katerih zavodi opravljajo svojo dejavnost, opremijo z ustrezнимi napisi.

Education is the basic value of each institution. The adolescents may be included in various programmes of educational and vocational training, either directly in the institutions or at external schools. As far as cooperation between the institutions and secondary schools in the education process is concerned, the DPM recommended that each institution concludes contracts on cooperation and defines the rights and obligations of contractors for external educational programmes.

MŠŠ responded to the DPM recommendation. The responsible persons indicated that a cooperation agreement would soon be concluded with the secondary schools with which the juvenile institutions cooperate. The agreements will set out the rights and obligations of the secondary schools. MŠŠ is harmonising the text.

The adolescents are encouraged to spend their leisure time actively; all institutions organise numerous free-time activities for them to discover and develop their talents.

Problems with illicit drugs, alcohol and smoking are more present in some institutions than others. Institutions also deal differently with these issues; therefore, the DPM suggests that institutions consider preparing a uniform strategy for treating addiction to illicit drugs, alcohol and smoking.

The DPM recommends that institutions prepare systematic education to teach adolescents about the effects and consequences of using illicit drugs, alcohol, smoking and on the consequences of risky behaviour, the prevention of HIV infections, hepatitis and the treatment of bad habits or addiction.

Only Maribor Juvenile Home responded to the recommendation. The expert workers expressed doubts on such systematic education for the adolescents, as they believe this is not always reasonable. Their view is that this could lead to the opposite effect, since excessive emphasis of such education may popularise undesirable behaviour. Institutions solve problems and deal with the dangers threatening adolescents more efficiently on an individual basis, as not all adolescents encounter the same issues.

In institutionalised forms of adolescent accommodation, the DPM pays particular attention to the rules related to residing there, the house rules and any sanctions arising from a failure to observe the rules. Considering the fact that each institution has distinct correctional measures for dealing with violations of the rules, the DPM suggests that experts in social and pedagogic science consider the options to prepare guidelines for an educational plan (as provided for primary schools in accordance with the Elementary School Act) and associated house rules in an institution, including possibilities and procedures for complaints. MŠŠ supported this DPM recommendation and assured they would present the initiative for preparing guidelines for the educational plan in juvenile institutions and clearer house rules at the working group of the juvenile institutions' principals.

The DPM also recommends that, in their annual operational plans in the educational field, the institutions include a chapter on the values to which all the people in the institutions are bound.

The residential groups usually stay in individual houses in the middle of urban settlements and do not present an impression of institutionalised life to the outside world. Considering that state institutions are fitted with signboards, the DPM recommends the institutions fit each location where they perform their activity with corresponding signboards.

Na priporočilo se je odzval Mladinski dom Maribor, ki priporočila ne sprejema. Strokovni delavci menijo, da dolgoletna praksa kaže, da neoznačevanje ustanove ni moteče niti za okolje niti zanje in da do zdaj niso imeli nobenih težav. Prepričani so, da je tudi to prispevek k normalizaciji in destigmatizaciji mladostnikov kakor tudi ustanove, v kateri prebivajo.

Sklep

DPM meni, da obiskani zavodi delujejo dobro in izpolnjujejo svoje poslanstvo. V pogovorih z mladostniki je bilo le malo pritožb zoper ravnanje zaposlenih v zavodih in zatrjevanja kršitev človekovih pravic.

DPM predlaga interdisciplinarno razpravo in strokovni razmislek o organiziraju večine zavodov po načelu stanovanjskih skupin. Obvladovanje zahtevnejše populacije je lažje v manjših skupinah. To bi zahtevalo več organizacijskih sprememb in drugih prilagoditev, ki pa bi bile lahko zahtevne z vidika varnosti mladostnikov in doseganja namena oddaje v zavod (gre predvsem za mladostnike, ki jim je izrečen vzgojni ukrep namestitve v zavod).

Maribor Juvenile Home responded to the recommendation, but did not accept it. The expert workers believe that long practice shows that not indicating the nature of the institution does not disturb the environment or the institution, and that there have never been any problems. They are convinced that this contributes to the normalisation and destigmatisation of the adolescents and the institution in which they live.

Conclusion

It is the DPM's opinion that the visited institutions function well and fulfil their mission. When talking to the adolescents, there were only a few complaints regarding the conduct of employees in the institutions and reported violations of human rights.

The DPM proposes an interdisciplinary discussion and professional reflection on organising the majority of institutions according to the principle of residential groups. The management of a more demanding population is easier in smaller groups. This would require several organisational changes and other adaptations, which would be demanding primarily from the perspective of the safety of the adolescents and achieving the objective of committal to an institution (this specifically concerns adolescents on whom the educational measure of committal to the institution has been imposed).

The States Parties to this Convention,

Considering that, in accordance with the principles proclaimed in the Charter of the United Nations, recognition of the equal and inalienable rights of all members of the human family is the foundation of freedom, justice and peace in the world,

Recognizing that those rights derive from the inherent dignity of the human person,

Considering the obligation of States under the Charter, in particular Article 55, to promote universal respect for, and observance of, human rights and fundamental freedoms,

Desiring to make more effective the struggle against torture and other cruel, inhuman or degrading treatment or punishment throughout the world,

Have agreed as follows:**PART I****Article 1**

1. For the purposes of this Convention, the term "torture" means any act by which severe pain or suffering, whether physical or mental, is intentionally inflicted on a person for such purposes as obtaining from him or a third person information or a confession, punishing him for an act he or a third person has committed or is suspected of having committed, or intimidating or coercing him or a third person, or for any reason based on discrimination of any kind, when such pain or suffering is inflicted by or at the instigation of or with the consent or acquiescence of a public official or other person acting in an official capacity. It does not include pain or suffering arising only from, inherent in or incidental to lawful sanctions.

2. Ta člen ne vpliva na noben mednarodni instrument ali nacionalni zakon, ki vsebuje ali utegne vsebovati določbe širšega pomena.

2. člen

1. Vsaka država članica izvaja zakonske, upravne, sodne ali druge učinkovite ukrepe, da bi na ozemlju pod svojo jurisdikcijo preprečila mučenje.
2. Kot opravičilo za mučenje se ne more navesti nikakršna izredna okoliščina – bodisi da gre zavojno stanje ali vojno nevarnost, notranjo politično nestabilnost ali kako drugo izredno stanje.
3. Kot opravičilo za mučenje se ne more navesti odredba kake nadrejene osebe ali organa oblasti.

3. člen

1. Nobena država članica ne bo pregnala, izgnala in ne izročila osebe drugi državi, če so resni razlogi za sum, da utegne biti mučena.
2. Da bi ugotovili, ali so taki razlogi, bodo pristojni organi upoštevali vse relevantne okoliščine, med drugim tudi to, ali obstaja v zadevni državi vrsta sistematičnih resnih, očitnih ali množičnih kršitev človekovih pravic.

4. člen

1. Vsaka država članica si prizadeva, da se po njenem kazenskem pravu vsa dejanja mučenja štejejo za kazniva dejanja. To velja tudi za poskuse mučenja ali kakega drugega dejanja, ki ga kdo stori, pomeni pa soudeležbo ali udeležbo pri dejanju mučenja.
2. Vsaka država članica določi za ta kazniva dejanja ustrezne kazni, ki upoštevajo njihovo težo.

5. člen

1. Vsaka država članica sprejme potrebne ukrepe, da bi določila svojo pristojnost za kazniva dejanja iz 4. člena v naslednjih primerih:
 - a) kadar je kaznivo dejanje storjeno na ozemlju pod njeno jurisdikcijo ali na letalih ali ladjah, vpisanih v njeni državi;
 - b) kadar je domnevni storilec kaznivega dejanja njen državljan;
 - c) kadar je žrtev njen državljan, če meni, da je to potrebno.
2. Vsaka država članica prav tako sprejme potrebne ukrepe, da bi določila svojo pristojnost za omenjena kazniva dejanja, če je domnevni storilec teh dejanj na ozemlju pod njeno jurisdikcijo in če ga v skladu z 8. členom ne izroči kaki državi iz prvega odstavka tega člena.
3. Ta konvencija ne izključuje nobene kazenske pristojnosti, ki temelji na nacionalni zakonodaji.

2. This article is without prejudice to any international instrument or national legislation which does or may contain provisions of wider application.

Article 2

1. Each State Party shall take effective legislative, administrative, judicial or other measures to prevent acts of torture in any territory under its jurisdiction.
2. No exceptional circumstances whatsoever, whether a state of war or a threat of war, internal political instability or any other public emergency, may be invoked as a justification of torture.
3. An order from a superior officer or a public authority may not be invoked as a justification of torture.

Article 3

1. No State Party shall expel, return ("refoul") or extradite a person to another State where there are substantial grounds for believing that he would be in danger of being subjected to torture.
2. For the purpose of determining whether there are such grounds, the competent authorities shall take into account all relevant considerations including, where applicable, the existence in the State concerned of a consistent pattern of gross, flagrant or mass violations of human rights.

Article 4

1. Each State Party shall ensure that all acts of torture are offences under its criminal law. The same shall apply to an attempt to commit torture and to an act by any person which constitutes complicity or participation in torture.
2. Each State Party shall make these offences punishable by appropriate penalties which take into account their grave nature.

Article 5

1. Each State Party shall take such measures as may be necessary to establish its jurisdiction over the offences referred to in article 4 in the following cases:
 - (a) When the offences are committed in any territory under its jurisdiction or on board a ship or aircraft registered in that State;
 - (b) When the alleged offender is a national of that State;
 - (c) When the victim is a national of that State if that State considers it appropriate.
2. Each State Party shall likewise take such measures as may be necessary to establish its jurisdiction over such offences in cases where the alleged offender is present in any territory under its jurisdiction and it does not extradite him pursuant to article 8 to any of the States mentioned in paragraph I of this article.
3. This Convention does not exclude any criminal jurisdiction exercised in accordance with internal law.

6. člen

1. Če meni, da okoliščine to opravičujejo, in po poprejšnji obravnavi obvestil, s katerimi razpolaga, poskrbi vsaka država članica, na ozemlju katere je oseba, za katero se sumi, da je storila kaznivo dejanje iz 4. člena, da se zadevna oseba aretira, ali pa izvede vse potrebne zakonske ukrepe, da bi zagotovila njen navzočnost. Ta aretacija in ti ukrepi morajo biti v skladu z zakonodajo omenjene države, toda izvajajo se lahko samo toliko časa, kolikor je potrebno za začetek kazenskega pregona ali postopka za izročitev.

2. Omenjena država takoj opravi predhodno preiskavo, da bi ugotovila dejstva.

3. Vsaka oseba, aretirana v skladu s prvim odstavkom tega člena, lahko takoj stopi v stik z najbližnjim pooblaščenim predstavnikom države, katere državljanstvo ima, ali, če gre za apatrida, s predstavnikom države, v kateri ima običajno prebivališče.

4. Če je kaka država aretirala osebo v skladu s tem členom, mora o tej aretaciji in okoliščinah, ki jo opravičujejo, takoj obvestiti države iz prvega odstavka 5. člena. Država, ki izvaja predhodno preiskavo iz drugega odstavka tega člena, mora svoje ugotovitve takoj sporočiti omenjenim državam in jih obvestiti, ali namerava izvršiti jurisdikcijo.

7. člen

1. Država članica, na katere ozemlju pod njeno jurisdikcijo je odkrit domnevni storilec kaznivega dejanja iz 4. člena, če ga ne izroči, predloži v primerih iz 5. člena zadevo pristojnim organom, da bi izvedli kazenski postopek.

2. Ti organi odločajo pod enakimi pogoji kot za vsako hudo kaznivo dejanje splošnega prava v skladu s pravnimi predpisi zadevne države. V primerih iz drugega odstavka 5. člena dokazna pravila, ki se uporabljajo za pregon in obsodbo, nikakor ne smejo biti manj stroga od pravil, ki se uporabljajo v primerih iz prvega odstavka 5. člena.

3. Vsaki osebi, ki se preganja za katerokoli kaznivo dejanje iz 4. člena, je zajamčeno pravično ravnanje v vseh fazah postopka.

8. člen

1. Kazniva dejanja iz 4. člena so avtomatično vključena v vsako pogodbo o izročitvi, že sklenjeno med državami članicami. Države članice prevzemajo obveznost, da bodo omenjena kazniva dejanja vključile v vsako pogodbo o izročitvi, ki jo bodo sklenile med seboj.

2. Če dobi država članica, ki za izročitev postavlja kot pogoj pogodbo, od druge države članice, s katero ni vezana s pogodbo o izročitvi, zahtevo za izročitev, lahko šteje to konvencijo kot pravno podlago za izročitev glede omenjenih kaznivih dejanj. Izročitev je odvisna od drugih pogojev, določenih s pravom zaprošene države.

3. Države članice, ki za izročitev ne postavljajo kot pogoj pogodbe, medsebojno priznavajo omenjena kazniva dejanja kot primere za izročitev pod pogoj, predvidenimi s pravom zaprošene države.

Article 6

1. Upon being satisfied, after an examination of information available to it, that the circumstances so warrant, any State Party in whose territory a person alleged to have committed any offence referred to in article 4 is present shall take him into custody or take other legal measures to ensure his presence. The custody and other legal measures shall be as provided in the law of that State but may be continued only for such time as is necessary to enable any criminal or extradition proceedings to be instituted.

2. Such State shall immediately make a preliminary inquiry into the facts.

3. Any person in custody pursuant to paragraph 1 of this article shall be assisted in communicating immediately with the nearest appropriate representative of the State of which he is a national, or, if he is a stateless person, with the representative of the State where he usually resides.

4. When a State, pursuant to this article, has taken a person into custody, it shall immediately notify the States referred to in article 5, paragraph 1, of the fact that such person is in custody and of the circumstances which warrant his detention. The State which makes the preliminary inquiry contemplated in paragraph 2 of this article shall promptly report its findings to the said States and shall indicate whether it intends to exercise jurisdiction.

Article 7

1. The State Party in the territory under whose jurisdiction a person alleged to have committed any offence referred to in article 4 is found shall in the cases contemplated in article 5, if it does not extradite him, submit the case to its competent authorities for the purpose of prosecution.

2. These authorities shall take their decision in the same manner as in the case of any ordinary offence of a serious nature under the law of that State. In the cases referred to in article 5, paragraph 2, the standards of evidence required for prosecution and conviction shall in no way be less stringent than those which apply in the cases referred to in article 5, paragraph 1.

3. Any person regarding whom proceedings are brought in connection with any of the offences referred to in article 4 shall be guaranteed fair treatment at all stages of the proceedings.

Article 8

1. The offences referred to in article 4 shall be deemed to be included as extraditable offences in any extradition treaty existing between States Parties. States Parties undertake to include such offences as extraditable offences in every extradition treaty to be concluded between them.

2. If a State Party which makes extradition conditional on the existence of a treaty receives a request for extradition from another State Party with which it has no extradition treaty, it may consider this Convention as the legal basis for extradition in respect of such offences. Extradition shall be subject to the other conditions provided by the law of the requested State.

3. States Parties which do not make extradition conditional on the existence of a treaty shall recognize such offences as extraditable offences between themselves subject to the conditions provided by the law of the requested State.

4. Med državami članicami se za omenjena kazniva dejanja za namene izročitve šteje, kot da so bila storjena ne le v kraju, kjer so se zgodila, temveč tudi na ozemljih držav, ki morajo določiti svojo pristojnost po prvem odstavku 5. člena.

9. člen

1. Države članice dajejo druga drugi kar največjo pravno pomoč v vsakem kazenskem postopku v zvezi s kaznivimi dejanji iz 4. člena, vštevši tudi pošiljanje vseh razpoložljivih dokaznih elementov, ki so potrebni za postopek.

2. Države članice izpolnjujejo svoje obveznosti v skladu s prvim odstavkom tega člena smiselno vsaki morebitni medsebojni pogodbi o pravni pomoči.

10. člen

2. Vsaka država članica vključi omenjeno prepoved v pravila ali navodila v zvezi z obveznostmi in dolžnostmi teh oseb.

11. člen

Vsaka država članica sistematično nadzoruje pravila, navodila, metode in prakso zasliševanja ter določbe v zvezi s straženjem kakorkoli aretiranih, priprtih ali zaprtih oseb na kakem ozemlju pod njeno jurisdikcijo ter ravnanjem z njimi, da bi preprečila kakršnokoli mučenje.

12. člen

Vsaka država članica skrbi za to, da pristojni organi takoj opravijo nepristransko preiskavo vsakič, ko so upravičeni razlogi za sum, da je bilo dejanje mučenja storjeno, na kakem ozemlju pod njeno jurisdikcijo.

13. člen

Vsaka država članica zagotovi vsaki osebi, ki trdi, da je bila mučena na kakem ozemlju pod njeno jurisdikcijo, pravico, da se pritoži pristojnim organom omenjene države, ki takoj in nepristransko preučijo primer. Sprejeti bodo ukrepi, da se oseba, ki se je pritožila, in priče zavarujejo pred kakršnimkoli grdim ravnanjem ali ustrahovanjem zaradi vložene pritožbe ali dane izjave.

14. člen

1. Vsaka država članica v svojem pravnem sistemu jamči žrtvi dejanja mučenja odstranitev krivice ter pravico do pravične in ustrezne odškodnine, vštevši sredstva, potrebna za njeno čim popolnejšo rehabilitacijo. V primeru smrti žrtve dejanja mučenja imajo imetniki pravic te žrtve pravico do odškodnine.

2. Ta člen ne izključuje nobene pravice do odškodnine, ki bi jo imela žrtev ali kdo drug v skladu z nacionalno zakonodajo.

4. Such offences shall be treated, for the purpose of extradition between States Parties, as if they had been committed not only in the place in which they occurred but also in the territories of the States required to establish their jurisdiction in accordance with article 5, paragraph 1.

Article 9

1. States Parties shall afford one another the greatest measure of assistance in connection with criminal proceedings brought in respect of any of the offences referred to in article 4, including the supply of all evidence at their disposal necessary for the proceedings.

2. Nothing in this article shall affect any right of the victim or other persons to compensation which may exist under national law.

15. člen

Vsaka država članica skrbi za to, da se izjava, za katero se dokaže, da je bila dobljena z mučenjem, ne more navesti kot dokazni element v kakem postopku, razen zoper osebo, obtoženo za mučenje, da bi se ugotovilo, da je bila izjava dana.

Zlasti obveznosti, navedene v 10., 11., 12. in 13. členu, se uporabljajo s tem, da se pojmom mučenja nadomesti s pojmom drugih oblik krutih, nečloveških ali poniževalnih kazni ali ravnana.

2. Določbe te konvencije ne vplivajo na določbe kateregakoli mednarodnega instrumenta ali nacionalnega zakona, ki prepoveduje krute, nečloveške ali poniževalne kazni ali ravnana ali ki se nanaša na izročitev ali izgon.

II. DEL**17. člen**

1. Ustanovi se komite proti mučenju (v nadalnjem besedilu: komite), katerega funkcije so tu določene. Komite sestavlja deset izvedencev z visokimi moralnimi kvalitetami, katerih kompetentnost na področju človekovih pravic je priznana in ki zasedajo v osebnem statusu. Izvedence volijo države članice, pri tem pa upoštevajo pravično zemljepisno zastopanost in da je pomembno, da pri delu komiteja sodelujejo osebe s pravnimi izkušnjami.

2. Člani komiteja se volijo s tajnim glasovanjem z liste kandidatov, ki jih določijo države članice. Vsaka država članica določi enega kandidata izmed svojih državljanov. Države članice upoštevajo, kako pomembno je, da so določeni kandidati hkrati člani komiteja za človekove pravice, ustanovljenega v skladu z mednarodnim paktom o državljanskih in političnih pravicah, in da so pripravljeni biti Člani komiteja proti mučenju.

3. Člani komiteja se volijo na sestanku držav članic, ki ga sklicuje generalni sekretar Organizacije združenih narodov in ki je vsako drugo leto. Na tem sestanku, ki je sklepčen, če so navzoči predstavniki dveh tretjin držav članic, so za člane komiteja izvoljeni kandidati, ki dobijo največ glasov in absolutno večino glasov predstavnikov držav članic, ki so navzoči in glasujejo.

4. Prve volitve se izvedejo najpozneje šest mesecev po uveljavitvi te konvencije. Najmanj štiri meseca pred vsakimi volitvami pošlje generalni sekretar Organizacije združenih narodov pismo državam članicam in jih pozove, naj predložijo svoje kandidature v treh mesecih. Generalni sekretar sestavi abecedni seznam vseh tako določenih kandidatov z navedbo držav članic, ki so jih določile, in ga pošlje državam članicam.

5. Člani komiteja se volijo za štiri leta. Lahko so ponovno izvoljeni, če so znova kandidirani. Vendar mandat petih članov, izvoljenih na prvih volitvah, preneha po dveh letih. Nekosredno po prvih volitvah izzreba imena teh petih članov predsednik sestanka, navedenega v tretjem odstavku tega člena.

Article 15

Each State Party shall ensure that any statement which is established to have been made as a result of torture shall not be invoked as evidence in any proceedings, except against a person accused of torture as evidence that the statement was made.

Article 16

1. Each State Party shall undertake to prevent in any territory under its jurisdiction other acts of cruel, inhuman or degrading treatment or punishment which do not amount to torture as defined in article I, when such acts are committed by or at the instigation of or with the consent or acquiescence of a public official or other person acting in an official capacity. In particular, the obligations contained in articles 10, 11, 12 and 13 shall apply with the substitution for references to torture of references to other forms of cruel, inhuman or degrading treatment or punishment.

2. The provisions of this Convention are without prejudice to the provisions of any other international instrument or national law which prohibits cruel, inhuman or degrading treatment or punishment or which relates to extradition or expulsion.

PART II**Article 17**

1. There shall be established a Committee against Torture (hereinafter referred to as the Committee) which shall carry out the functions hereinafter provided. The Committee shall consist of ten experts of high moral standing and recognized competence in the field of human rights, who shall serve in their personal capacity. The experts shall be elected by the States Parties, consideration being given to equitable geographical distribution and to the usefulness of the participation of some persons having legal experience.

2. The members of the Committee shall be elected by secret ballot from a list of persons nominated by States Parties. Each State Party may nominate one person from among its own nationals. States Parties shall bear in mind the usefulness of nominating persons who are also members of the Human Rights Committee established under the International Covenant on Civil and Political Rights and who are willing to serve on the Committee against Torture.

3. Elections of the members of the Committee shall be held at biennial meetings of States Parties convened by the Secretary-General of the United Nations. At those meetings, for which two thirds of the States Parties shall constitute a quorum, the persons elected to the Committee shall be those who obtain the largest number of votes and an absolute majority of the votes of the representatives of States Parties present and voting.

4. The initial election shall be held no later than six months after the date of the entry into force of this Convention. At least four months before the date of each election, the Secretary-General of the United Nations shall address a letter to the States Parties inviting them to submit their nominations within three months. The Secretary-General shall prepare a list in alphabetical order of all persons thus nominated, indicating the States Parties which have nominated them, and shall submit it to the States Parties.

5. The members of the Committee shall be elected for a term of four years. They shall be eligible for re-election if renominated. Izjava se lahko umakne kadarkoli s sporočilom, poslanim generalnemu sekretarju. Ta umik ne vpliva na obravnavo kakršnegakoli vprašanja, ki je predmet že poslanega sporočila v skladu s tem členom: nobeno nadaljnje sporočilo katerekoli države članice ne bo sprejet v skladu s tem členom, ko generalni sekretar prejme sporočilo o umiku izjave, razen če zainteresirana država članica ne da nove izjave.

22. člen

1. Država članica te konvencije lahko v skladu s tem členom kadarkoli izjavi, da prizna, da je komite pristojen sprejemati in obravnavati sporočila, ki jih dobi od posameznikov ali v imenu posameznikov, ki so pod njeno jurisdikcijo in trdijo, da so žrtev kršenja določb konvencije s strani kakšne države članice. (c) The Committee shall deal with a matter referred to it under this article only after it has ascertained that all domestic remedies have been invoked and exhausted in the matter, in conformity with the generally recognized principles of international law. This shall not be the rule where the application of the remedies is unreasonably prolonged or is unlikely to bring effective relief to the person who is the victim of the violation of this Convention;

(d) The Committee shall hold closed meetings when examining communications under this article;

(e) Subject to the provisions of subparagraph (c), the Committee shall make available its good offices to the States Parties concerned with a view to a friendly solution of the matter on the basis of respect for the obligations provided for in this Convention. (h) The Committee shall, within twelve months after the date of receipt of notice under subparagraph (b), submit a report;

In every matter, the report shall be communicated to the States Parties concerned.

2. The provisions of this article shall come into force when five States Parties to this Convention have made declarations under paragraph 1 of this article. Such declarations shall be deposited by the States Parties with the Secretary-General of the United Nations, who shall transmit copies thereof to the other States Parties. A declaration may be withdrawn at any time by notification to the Secretary-General. Such a withdrawal shall not prejudice the consideration of any matter which is the subject of a communication already transmitted under this article; no further communication by any State Party shall be received under this article after the notification of withdrawal of the declaration has been received by the Secretary-General, unless the State Party concerned has made a new declaration.

Article 22

1. A State Party to this Convention may at any time declare under this article that it recognizes the competence of the Committee to receive and consider communications from or on behalf of individuals subject to its jurisdiction who claim to be victims of a violation by a State Party of the provisions of the Convention. No communication shall be received by the Committee if it concerns a State Party which has not made such a declaration.

2. The Committee shall consider inadmissible any communication under this article which is anonymous or which it considers to be an abuse of the right of submission of such communications or to be incompatible with the provisions of this Convention.

3. Ob pridržku drugega odstavka pošlje komite vsako sporočilo, dano v skladu s tem členom, državi članici te konvencije, ki je dala izjavo v skladu s prvim odstavkom in se zanjo trdi, da je kršila katerokoli določbo konvencije. 4. Komite obravnava sporočila, ki jih je prejel v skladu s tem členom, ob upoštevanju vseh informacij, ki jih je dobil od posameznikov ali v njihovem imenu in od zainteresirane države članice.

5. Komite ne obravnava nobenega sporočila posameznika v skladu s tem členom, ne da bi se poprej prepričal o naslednjem:

a) da navedeno vprašanje ni bilo obravnavano in ni v obravnavi pred kakšno drugo mednarodno instanco, pristojno za preiskavo ali reševanje spora;

b) da je posameznik izkoristili vsa interna razpoložljiva sredstva. To pravilo se ne uporablja, če pritožbeni postopki presegajo razumne roke ali ni pričakovati, da bodo dejansko učinkoviti za posameznika, ki je žrtev kršenja te konvencije.

6. Komite obravnava sporočila, predvidena v tem členu, na zaprtih sejah.

7. Komite sporoči svoje ugotovitve zainteresirani državi članici in posamezniku.

8. Določbe tega člena začnejo veljati, ko pet držav članic te konvencije da izjavo, predvideno v prvem odstavku tega člena. Država članica deponira to izjavo pri generalnem sekretarju Organizacije združenih narodov, ki pošlje kopijo drugim državam članicam. Izjava se lahko kadarkoli umakne s sporočilom, poslanim generalnemu sekretarju. Ta umik ne vpliva na obravnavo kakršnegakoli vprašanja, ki je predmet že poslanega sporočila v skladu s tem členom; nobeno nadaljnje sporočilo, ki ga je postal posameznik ali je bilo poslano zanj, ne bo sprejeto v skladu s tem členom, ko generalni sekretar prejme sporočilo o umiku izjave, razen če zainteresirana država članica ni dala nove izjave.

23. člen

Člani komiteja in člani ad hoc spravne komisije, ki utegnejo biti imenovani v skladu s prvim odstavkom pod e) 21. člena, imajo pravico do olajšav, privilegijev in imunitet, ki so priznane izvedencem v službi Organizacije združenih narodov tako, kot so navedene v ustreznih delih konvencije o privilegijsih in imunitetah Združenih narodov.

3. Subject to the provisions of paragraph 2, the Committee shall bring any communications submitted to it under this article to the attention of the State Party to this Convention which has made a declaration under paragraph 1 and is alleged to be violating any provisions of the Convention. Within six months, the receiving State shall submit to the Committee written explanations or statements clarifying the matter and the remedy, if any, that may have been taken by that State.

4. The Committee shall consider communications received under this article in the light of all information made available to it by or on behalf of the individual and by the State Party concerned.

5. The Committee shall not consider any communications from an individual under this article unless it has ascertained that:

(a) The same matter has not been, and is not being, examined under another procedure of international investigation or settlement;

(b) The individual has exhausted all available domestic remedies; this shall not be the rule where the application of the remedies is unreasonably prolonged or is unlikely to bring effective relief to the person who is the victim of the violation of this Convention.

6. The Committee shall hold closed meetings when examining communications under this article.

7. The Committee shall forward its views to the State Party concerned and to the individual.

8. The provisions of this article shall come into force when five States Parties to this Convention have made declarations under paragraph 1 of this article. Such declarations shall be deposited by the States Parties with the Secretary-General of the United Nations, who shall transmit copies thereof to the other States Parties. A declaration may be withdrawn at any time by notification to the Secretary-General. Such a withdrawal shall not prejudice the consideration of any matter which is the subject of a communication already transmitted under this article; no further communication by or on behalf of an individual shall be received under this article after the notification of withdrawal of the declaration has been received by the Secretary-General, unless the State Party has made a new declaration.

Article 23

The members of the Committee and of the ad hoc conciliation commissions which may be appointed under article 21, paragraph 1 (e), shall be entitled to the facilities, privileges and immunities of experts on mission for the United Nations as laid down in the relevant sections of the Convention on the Privileges and Immunities of the United Nations.

RESOLUTION ADOPTED BY THE GENERAL ASSEMBLY

[on the report of the Third Committee (A/66/462/Add.1)]

66/150. TORTURE AND OTHER CRUEL, INHUMAN OR DEGRADING TREATMENT OR PUNISHMENT*The General Assembly,*

Reaffirming that no one shall be subjected to torture or other cruel, inhuman or degrading treatment or punishment,

Recalling that freedom from torture and other cruel, inhuman or degrading treatment or punishment is a non-derogable right under international law, including international human rights law and international humanitarian law, that must be respected and protected under all circumstances, including in times of international or internal armed conflict or disturbance or any other public emergency, that the absolute prohibition of torture and other cruel, inhuman or degrading treatment or punishment is affirmed in relevant international instruments and that legal and procedural safeguards against such acts must not be subject to measures that would circumvent this right,

Recalling also that the prohibition of torture is a peremptory norm of international law and that international, regional and domestic courts have held the prohibition of cruel, inhuman or degrading treatment or punishment to be customary international law,

Recalling further the definition of torture contained in article 1 of the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment¹, without prejudice to any international instrument or national legislation which contains or may contain provisions of wider application,

Emphasizing the importance of properly interpreting and implementing the obligations of States with respect to torture and other cruel, inhuman or degrading treatment or punishment and of abiding strictly by the definition of torture contained in article 1 of the Convention,

¹ Zbirka pogodb Združenih narodov, zv. 1465, št. 24841.

¹ United Nations, Treaty Series, vol. 1465, No. 24841.

ob ugotovitvi, da sta po ženevski konvenciji iz leta 1949² mučenje in nečloveško ravnanje huda kršitev ter da je po statutu mednarodnega sodišča za sodni pregon oseb, odgovornih za hujše kršitve mednarodnega humanitarnega prava, storjene na območju nekdanje Jugoslavije od leta 1991, po statutu mednarodnega kazenskega sodišča za sodni pregon oseb, odgovornih za genocid in druge hujše kršitve mednarodnega humanitarnega prava, storjene na območju Ruande, in državljanov Ruande, odgovornih za genocid in druge takšne kršitve, storjene na območju sosednjih držav med 1. januarjem 1994 in 31. decembrom 1994, ter po rimskem statutu mednarodnega kazenskega sodišča³ mučenje lahko kaznivo dejanje zoper človečnost in, če je storjeno v oboroženem spopadu, vojno hudodelstvo,

*ob odobravanju začetka veljavnosti Mednarodne konvencije za zaščito vseh oseb pred prisilnim izginotjem*⁴, ker bo njeno izvajanje znatno prispevalo k preprečevanju in prepovedi mučenja, tudi s prepovedjo tajnih krajev odvezema prostoti in spodbujanjem držav, ki tega še niso storile, da podpišejo ali ratificirajo konvencijo ali pristopijo k njej,

ob izrekanju priznanja za dolgotrajno prizadevanje organizacij civilne družbe, tudi nevladnih organizacij, državnih institucij za človekove pravice, državnih preventivnih mehanizmov in obsežne mreže centrov za rehabilitacijo žrtev mučenja, za preprečevanje mučenja in boj proti njemu ter za lajšanje trpljenja žrtev mučenja,

zaradi hude zaskrbjenosti nad dejanji, ki lahko pomenijo mučenje in drugo kruto, nečloveško ali poniževalno ravnanje ali kaznovanje, storjenih zoper osebe in njihove pravice do mirnega zbiranja in svobode izražanja v vseh delih sveta,

1. *Obsoja* vse oblike mučenja in drugega krutega, nečloveškega ali poniževalnega ravnanja ali kaznovanja, tudi ustrahovanje, ki so in bodo ostale prepovedane vedno in povsod in zato nikoli ne morejo biti upravičene, ter poziva vse države k celovitemu izvajanju popolne in neodtujljive prepovedi mučenja in drugega krutega, nečloveškega ali poniževalnega ravnanja ali kaznovanja;
2. *Poudarja*, da morajo države sprejeti trajne, odločne in učinkovite ukrepe za preprečevanje mučenja in drugega krutega, nečloveškega ali poniževalnega ravnanja ali kaznovanja ter za boj proti vsemu temu, poudarja, da naj v notranji kazenski zakonodaji opredelijo mučenje kot kaznivo dejanje, in jih spodbuja, da z notranjo zakonodajo prepovejo dejanja krutega, nečloveškega ali poniževalnega ravnanja ali kaznovanja;
3. *Pozdravlja* vzpostavitev državnih mehanizmov za preprečevanje mučenja, nečloveškega ali poniževalnega ravnanja ali kaznovanja, poziva države, da vzpostavijo, določijo, vzdržujejo ali krepijo samostojne in učinkovite mehanizme s potrebnim znanjem za opravljanje nadzornih obiskov krajev odvezema prostoti, med drugim zaradi preprečevanja mučenja ali drugega krutega, nečloveškega ali poniževalnega ravnanja ali kaznovanja, in poziva države pogodbenice Opcijskega protokola h Konvenciji proti mučenju in drugim krutim, nečloveškim ali poniževalnim kaznim ali ravnjanju⁵, da izpolnijo obveznost glede določitve ali vzpostavite resnično neodvisnih in učinkovitih državnih preventivnih mehanizmov;

Noting that, under the Geneva Conventions of 1949², torture and inhuman treatment are a grave breach and that, under the statute of the International Tribunal for the Prosecution of Persons Responsible for Serious Violations of International Humanitarian Law Committed in the Territory of the Former Yugoslavia since 1991, the statute of the International Criminal Tribunal for the Prosecution of Persons Responsible for Genocide and Other Serious Violations of International Humanitarian Law Committed in the Territory of Rwanda and Rwandan Citizens Responsible for Genocide and Other Such Violations Committed in the Territory of Neighbouring States between 1 January and 31 December 1994 and the Rome Statute of the International Criminal Court³, acts of torture can constitute crimes against humanity and, when committed in a situation of armed conflict, constitute war crimes,

Welcoming the entry into force of the International Convention for the Protection of All Persons from Enforced Disappearance⁴, the implementation of which will make a significant contribution to the prevention and prohibition of torture, including by prohibiting secret places of detention, and encouraging all States that have not done so to consider signing, ratifying or acceding to the Convention,

Commending the persistent efforts of civil society organizations, including non-governmental organizations, national human rights institutions and national preventive mechanisms, and the considerable network of centres for the rehabilitation of victims of torture, to prevent and combat torture and to alleviate the suffering of victims of torture,

Deeply concerned with all acts which can amount to torture and other cruel, inhuman or degrading treatment or punishment committed against persons exercising their rights of peaceful assembly and freedom of expression in all regions of the world,

1. *Condemns* all forms of torture and other cruel, inhuman or degrading treatment or punishment, including through intimidation, which are and shall remain prohibited at any time and in any place whatsoever and can thus never be justified, and calls upon all States to implement fully the absolute and non-derogable prohibition of torture and other cruel, inhuman or degrading treatment or punishment;
2. *Emphasizes* that States must take persistent, determined and effective measures to prevent and combat all acts of torture and other cruel, inhuman or degrading treatment or punishment, stresses that all acts of torture must be made offences under domestic criminal law, and encourages States to prohibit under domestic law acts constituting cruel, inhuman or degrading treatment or punishment;
3. *Welcomes* the establishment of national preventive mechanisms to prevent torture and other cruel, inhuman or degrading treatment or punishment, urges States to consider establishing, appointing, maintaining or enhancing independent and effective mechanisms with qualified expertise to undertake monitoring visits to places of detention, inter alia with a view to preventing acts of torture or other cruel, inhuman or degrading treatment or punishment, and calls upon States parties to the Optional Protocol to the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment⁵ to fulfil their obligation to designate or establish truly independent and effective national preventive mechanisms;

5. *Obsoja* vsako dejanje ali poskus držav ali javnih uslužbencev, da bi v kakršnih koli okoliščinah legalizirali, odobrili ali privolili v mučenje in drugo kruto, nečloveško ali poniževalno ravnanje ali kaznovanje, tudi zaradi državne varnosti ali na podlagi sodnih odločb, in poziva države k zagotovitvi, da odgovorni odgovarjajo za taka dejanja;
6. *Spodbuja* države, da vzpostavijo ali ohranijo ustrezne notranje postopke za evidentiranje domnevnega mučenja in drugega krutega, nečloveškega ali poniževalnega ravnanja ali kaznovanja;
7. *Poudarja*, da mora neodvisni pristojni domači organ takoj, učinkovito in nepristransko preiskati vsako domnevno mučenje ali drugo kruto, nečloveško ali poniževalno ravnanje ali kaznovanje in ugotoviti, ali obstaja uteviljen sum, da je bilo tako dejanje storjeno, ter da morajo tisti, ki spodbujajo, odredijo, dopuščajo ali storijo tako dejanje, zanj odgovarjati, da jim je treba zanj soditi in jih kaznovati sorazmerno s težo kaznivega dejanja, tudi uradnike, ki so odgovorni za kraje odvzema prostosti ali druge kraje, kjer so osebe, ki jim je odvzeta prostost, če se ugotovi, da je bilo prepovedano dejanje storjeno;
8. *Opozarja* s tem v zvezi na načela učinkovitega preiskovanja in dokumentiranja mučenja in drugega krutega, nečloveškega ali poniževalnega ravnanja ali kaznovanja (istanbulska načela)⁶, ki so koristno orodje za preprečevanje mučenja in boj proti njemu, ter na dopolnjena načela varovanja in uveljavljanja človekovih pravic z bojem proti nekaznovanju⁷;
9. *Poziva* vse države, da izvajajo učinkovite ukrepe za preprečevanje mučenja in drugega krutega, nečloveškega ali poniževalnega ravnanja ali kaznovanja, predvsem na krajih odvzema prostosti ali drugih krajih, kjer so osebe, ki jim je odvzeta prostost, vključno s pravnimi in postopkovnimi jamstvi, ter zagotavlja izobraževanje in usposabljanje osebja, ki sodeluje pri pridržanju, zasliševanju ali ravnanju s kakor koli priprto, pridržano ali zaprto osebo;
10. *Poziva* države, da kot pomemben del preprečevanja mučenja in drugega krutega, nečloveškega ali poniževalnega ravnanja ali kaznovanja ter boja proti temu zagotovijo, da noben organ ali uradnik ne odredi, uporabi, dovoli ali dopusti nikakrsne sankcije ali oškodovanja osebe ali organizacije zato, ker je v stiku s katerim koli nadzornim ali preventivnim notranjim ali mednarodnim organom, ki deluje na področju preprečevanja mučenja in drugega krutega, nečloveškega ali poniževalnega obravnavanja ali kaznovanja ter boja proti temu;
11. *Poziva* države, da v boju proti mučenju in drugemu krutemu, nečloveškemu ali poniževalnemu ravnanju ali kaznovanju upoštevajo vidik spola in namenjajo posebno pozornost nasilju zaradi spola;
4. *Emphasizes* the importance of States ensuring proper follow-up to the recommendations and conclusions of the relevant treaty bodies and mechanisms, including the Committee against Torture, the Subcommittee on Prevention of Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment and the Special Rapporteur of the Human Rights Council on torture and other cruel, inhuman or degrading treatment or punishment;
5. *Condemns* any action or attempt by States or public officials to legalize, authorize or acquiesce in torture and other cruel, inhuman or degrading treatment or punishment under any circumstances, including on grounds of national security or through judicial decisions, and urges States to ensure accountability of those responsible for all such acts;
6. *Encourages* States to consider establishing or maintaining appropriate national processes to record allegations of torture and other cruel, inhuman or degrading treatment or punishment;
7. *Stresses* that an independent, competent domestic authority must promptly, effectively and impartially investigate all allegations of torture or other cruel, inhuman or degrading treatment or punishment, as well as wherever there is reasonable ground to believe that such an act has been committed, and that those who encourage, order, tolerate or perpetrate such acts must be held responsible, brought to justice and punished in a manner commensurate with the severity of the offence, including the officials in charge of any place of detention, or other place where persons are deprived of their liberty, where the prohibited act is found to have been committed;
8. *Recalls*, in this respect, the Principles on the Effective Investigation and Documentation of Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment (the Istanbul Principles)⁶ as a useful tool in efforts to prevent and combat torture and the updated set of principles for the protection and promotion of human rights through action to combat impunity⁷;
9. *Calls upon* all States to implement effective measures to prevent torture and other cruel, inhuman or degrading treatment or punishment, particularly in places of detention and other places where persons are deprived of their liberty, including legal and procedural safeguards, as well as education and training of personnel who may be involved in the custody, interrogation or treatment of any individual subjected to any form of arrest, detention or imprisonment;
10. *Urges* States, as an important element in preventing and combating torture and other cruel, inhuman or degrading treatment or punishment, to ensure that no authority or official orders, applies, permits or tolerates any sanction or other prejudice against any person or organization for having been in contact with any national or international monitoring or preventive body active in the prevention and combating of torture and other cruel, inhuman or degrading treatment or punishment;
11. *Calls upon* all States to adopt a gender-sensitive approach in the fight against torture and other cruel, inhuman or degrading treatment or punishment, paying special attention to gender-based violence;

12. *Poziva države, da skladno s Konvencijo o pravicah invalidov⁸ zagotovijo celovito vključitev pravic invalidov v preprečevanje mučenja in varovanje pred njim ter pozdravlja prizadevanje posebnega poročevalca na tem področju;*
13. *Spodbuja vse države k zagotavljanju, da osebe, obsojene zaradi mučenja ali drugega krutega, nečloveškega ali poniževalnega ravnanja ali kaznovanja, ne sodelujejo več pri pridržanju ali zasliševanju priprtih, pridržanih, zaprtih ali tistih, ki jim je prostost odvzeta kako drugače, ali ne sodelujejo pri ravnanju z njimi in da osebe, obtožene mučenja ali drugega krutega, nečloveškega ali poniževalnega ravnanja ali kaznovanja, do razsodbe ne sodelujejo pri pridržanju ali zasliševanju priprtih, pridržanih, zaprtih ali tistih, ki jim je prostost odvzeta kako drugače, ali ne sodelujejo pri ravnanju z njimi;*
14. *Poudarja, da je mučenje v oboroženih spopadih huda kršitev mednarodnega humanitarnega prava in pomeni vojno hudodelstvo, da je mučenje lahko kaznivo dejanje zoper človečnost in da je treba storilce teh dejanj preganjati in kaznovati, in v zvezi s tem pozdravlja prizadevanje mednarodnega kazenskega sodišča za prenehanje nekaznovanja z uveljavljanjem odgovornosti in kaznovanjem storilcev takih dejanj v skladu z Rimskim statutom³ ter spodbuja države, ki tega še niso storile, da ratificirajo omenjeni statut ali pristopijo k njemu;*
15. *Poziva države k zagotavljanju, da se nobena izjava, za katero se ugotovi, da je bila dana zaradi mučenja, ne uporabi kot dokaz v nobenem postopku, razen kot dokaz proti osebi, obtoženi mučenja, spodbuja države, da tako prepovedi razširijo na izjave, dane zaradi krutega, nečloveškega ali poniževalnega ravnanja ali kaznovanja, in priznava ustrezno utemeljene izjave, tudi priznanja, ki se uporabijo v postopku, kot eno od varoval za preprečevanje mučenja in drugega krutega, nečloveškega ali poniževalnega ravnanja ali kaznovanja;*
16. *Poudarja, da države ne smejo kaznovati osebja za neizpolnitve ukazov, da morajo storiti ali prikriti dejanja, ki pomenijo mučenje ali drugo kruto, nečloveško ali poniževalno ravnanje ali kaznovanje;*
17. *Poziva države, da prisilno ne odstranijo, vrnejo, izročijo ali kako drugače premestijo osebe v drugo državo, če obstajajo resni razlogi za sum, da bi bila lahko izpostavljena mučenju, poudarja pomen učinkovitih pravnih in postopkovnih jamstev v zvezi s tem ter se zaveda, da diplomatska zagotovila, kadar se uporablajo, držav ne odvezujejo obveznosti po mednarodnem pravu človekovih pravic ter begunske in humanitarnem pravu, predvsem glede načela nevračanja;*
18. *Opozarja, da morajo pristojni organi pri ugotavljanju, ali taki razlogi obstajajo, upoštevati vse pomembne dejavnike, kjer je primerno, tudi to, ali v državi obstaja jasen vzorec velikih, grobih ali množičnih kršitev človekovih pravic;*
19. *Poziva države pogodbenice Konvencije proti mučenju in drugim krutim, nečloveškim ali poniževalnim kaznim ali ravnanju¹, da izpolnijo obveznost glede kazenskega pregona ali izročitve domnevnih storilcev mučenja, in ob upoštevanju potrebe po boju proti nekaznovanju spodbuja druge države, da storijo enako;*

14. *Emphasizes that acts of torture in armed conflict are serious violations of international humanitarian law and in this regard constitute war crimes, that acts of torture can constitute crimes against humanity and that the perpetrators of all acts of torture must be prosecuted and punished, and in this regard notes the efforts of the International Criminal Court to end impunity by seeking to ensure accountability and punishment of perpetrators of such acts, in accordance with the Rome Statute⁹, bearing in mind its principle of complementarity, and encourages States that have not yet done so to consider ratifying or acceding to the Rome Statute;*
15. *Strongly urges States to ensure that no statement that is established to have been made as a result of torture is invoked as evidence in any proceedings, except against a person accused of torture as evidence that the statement was made, encourages States to extend that prohibition to statements made as a result of cruel, inhuman or degrading treatment or punishment, and recognizes that adequate corroboration of statements, including confessions, used as evidence in any proceedings constitutes one safeguard for the prevention of torture and other cruel, inhuman or degrading treatment or punishment;*
16. *Stresses that States must not punish personnel for not obeying orders to commit or conceal acts amounting to torture or other cruel, inhuman or degrading treatment or punishment;*
17. *Urges States not to expel, return (“refouler”), extradite or in any other way transfer a person to another State where there are substantial grounds for believing that the person would be in danger of being subjected to torture, stresses the importance of effective legal and procedural safeguards in this regard, and recognizes that diplomatic assurances, where used, do not release States from their obligations under international human rights, humanitarian and refugee law, in particular the principle of non-refoulement;*
18. *Recalls that, for the purpose of determining whether there are such grounds, the competent authorities shall take into account all relevant considerations, including, where applicable, the existence in the State concerned of a consistent pattern of gross, flagrant or mass violations of human rights;*
19. *Calls upon States parties to the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment¹ to fulfil their obligation to submit for prosecution or extradite those alleged to have committed acts of torture, and encourages other States to do likewise, bearing in mind the need to fight impunity;*

22. *Opozarja* vse države na to, da je mučenje in druga kruta, nečloveška ali poniževalna ravnanja ali kaznovanja laže izvesti, če gre za daljši odvzem prostosti v osamitvi ali na tajnem kraju, kar samo po sebi lahko predstavlja obliko takega ravnanja, in poziva vse države, da upoštevajo zaščito svoboščin, varnosti in dostojanstva oseb ter poskrbijo za odpravo tajnih krajev za pridržanje in zasliševanje;

OSAMITEV ZAPORNIKOV

Uvod

53. Vsak zaporniški režim pozna v neki obliki in na nek način osamitev zapornikov. Odbor za preprečevanje mučenja in nečloveškega ali ponižajočega ravnana ali kaznovanja (CPT) je vedno posvečal posebno pozornost zapornikom, ki prestajajo kazen v samici, saj lahko tako prestajanje kazni izredno škodljivo vpliva na duševno, telesno in socialno zdravje prizadetih¹.

Škodljive posledice so lahko takojšnje in se povečujejo s trajanjem in negotovostjo kazni. Najpomembnejši kazalnik škode, ki jo osamitev lahko povzroči, je bistveno več samomorov med zaporniki, ki prestajajo tako kazen, v primerjavi s splošno populacijo zapornikov. Zato je osamitev nedvomno sama po sebi vprašljiva zaradi prepovedi mučenja in nečloveškega ali ponižajočega ravnana ali kaznovanja. Poleg tega lahko osamitev ustvari priložnost za namerno trpinčenje zapornikov, ki ostane skrito očem drugih zapornikov in osebja zapora. Zato je osamitev osrednja skrb CPT in zato ob vsakem obisku zapornikov predstavniki odbora vztrajajo pri pogovorih z zaporniki v samicah, da bi preučili razmere, v katerih jim je odvzeta prostost, in ravnanje z njimi ter preverili postopke za sprejemanje in pregledovanje takih ukrepov. V tem poglavju splošnega poročila CPT so navedeni kriteriji, ki jih CPT uporablja pri ocenjevanju osamitve. CPT meni, da je bi bilo ob upoštevanju teh kriterijev mogoče zmanjšati uporabo ukrepa osamitve na minimum, zagotoviti omejitev trajanja osamitve – kadar se uporabi – na najkrajše potrebno obdobje, narediti vsak režim osamitve kar najugodnejši za zapornike in zapornikom zagotoviti postopke, ki bi povsem upravičili uporabo tega ukrepa.

54. CPT razlaga izraz »osamitev« kot vsako ločitev zapornika od drugih zapornikov, na primer na podlagi sodne odločbe, kot disciplinski ukrep, izrečen v okviru zaporniškega režima, kot preprečevalni upravni ukrep ali za zaščito samega zapornika. Zapornik, ki mu je izrečen tak ukrep, je običajno zaprt sam. V nekaterih državah sicer lahko namestijo zapornika skupaj s še enim ali dvema zapornikoma, vendar to poglavje enako velja tudi za te primere.

Glede posebnosti osamitve mladoletnikov – prakse, proti kateri ima CPT še posebno hude zadržke – je treba navesti tudi pripombe CPT v njegovem 18. splošnem poročilu². To poglavje ne velja za osamitev zapornikov iz medicinskih razlogov, ker so razlogi za tak ukrep popolnoma drugačne narave.

SOLITARY CONFINEMENT OF PRISONERS

Introduction

53. Solitary confinement of prisoners is found, in some shape or form, in every prison system. The CPT has always paid particular attention to prisoners undergoing solitary confinement, because it can have an extremely damaging effect on the mental, somatic and social health of those concerned¹. This damaging effect can be immediate and increases the longer the measure lasts and the more indeterminate it is. The most significant indicator of the damage which solitary confinement can inflict is the considerably higher rate of suicide among prisoners subjected to it than that among the general prison population.

Clearly, therefore, solitary confinement on its own potentially raises issues in relation to the prohibition of torture and inhuman or degrading treatment or punishment. In addition, it can create an opportunity for deliberate ill-treatment of prisoners, away from the attention of other prisoners and staff. Accordingly, it is central to the concerns of the CPT and, on each visit, delegations make a point of interviewing prisoners in solitary confinement in order to examine their conditions of detention and treatment and to check the procedures for deciding on such placements and reviewing them. In this section of its General Report, the CPT sets out the criteria it uses when assessing solitary confinement. The Committee believes that if these criteria are followed, it should be possible to reduce resort to solitary confinement to an absolute minimum, to ensure that when it is used it is for the shortest necessary period of time, to make each of the solitary confinement regimes as positive as possible, and to guarantee that procedures are in place to render the use of this measure fully accountable.

54. The CPT understands the term "solitary confinement" as meaning whenever a prisoner is ordered to be held separately from other prisoners, for example, as a result of a court decision, as a disciplinary sanction imposed within the prison system, as a preventative administrative measure or for the protection of the prisoner concerned. A prisoner subject to such a measure will usually be held on his/her own; however, in some States he/she may be accommodated together with one or two other prisoners, and this section applies equally to such situations.

As regards more specifically the solitary confinement of juveniles, a practice concerning which the CPT has particularly strong reservations, reference should also be made to the comments made by the Committee in its 18th General Report².

This section does not apply to the isolation of prisoners for medical reasons, as the grounds for such a measure are of a fundamentally different nature.

¹ The research evidence for this is well summarised in Sharon Shalev's "A Sourcebook on Solitary Confinement" (Mannheim Centre for Criminology, London, 2008), available electronically at www.solitaryconfinement.org.

Sprejeta načela

55. Osamitev še bolj omejuje že tako zelo omejene pravice ljudi ki jim je bila odvzeta prostost. Dodatne omejitve, ki jih predstavlja osamitev, niso del zaporne kazni, zato jih je treba posebej upravičiti. Da bi preverili, ali je kateri koli posamezni izrek ukrepa upravičen, je smiselno uporabiti klasična preverjanja, ki so zajeta v določbah Evropske konvencije o človekovih pravicah in ki jih je razvila sodna praksa na Evropskem sodišču za človekove pravice. Načela preverjanja povzema angleška kratica **PLANN** (proportionate—lawful—accountable—necessary—non-discriminatory).

- a) **Načelo sorazmernosti:** vsako nadaljnje omejevanje zapornikovih pravic mora biti povezano z dejansko ali potencialno škodo, ki jo je zapornik povzročil ali jo bo povzročil s svojimi dejanji (ali s potencialno ogroženostjo, ki ji je zapornik izpostavljen) v zaporniškem okolju. Ker je osamitev resna omejitev zapornikovih pravic in pomeni skrite nevarnosti za zapornika, mora biti dejanska ali potencialna škoda vsaj tako velika in izključno primerna za reševanje samo s tem ukrepom. To velja denimo za večino držav, kjer je osamitev ukrep samo za najresnejše disciplinske prekrške, vendar je to načelo treba upoštevati ob kakršni koli uvedbi tega ukrepa. Dlje kot traja ukrep, močnejši mora biti razlog zarj in več je treba storiti za to, da bi ukrep dosegel svoj namen.
- b) **Načelo zakonitosti:** nacionalno pravo mora za vsako vrsto osamitve, ki je dovoljena v državi, vsebovati posebno določbo, ki mora biti razumna. Izražena mora biti v taki obliki, da je razumljiva vsakomur, za kogar lahko velja. Zakon mora določati natančne okoliščine, v katerih je vsak ukrep osamitve lahko izrečen, osebe, ki ga lahko izrečejo, postopke, ki jih morajo te osebe upoštevati, pravico prizadetega zapornika do ustnih/pisnih izjav kot sestavnega dela postopka, zahtevo, da so zaporniku podani kar najcelovitejši razlogi za odločitev (seveda lahko v nekaterih primerih obstaja upravičen razlog, da se posebne podrobnosti ne razkrijejo zaradi varnostnih zadržkov ali zavarovanja interesov tretjih oseb), pogostost in postopek pregledovanja odločitev ter postopke za pritožbo zoper odločitev. Vsaka vrsta osamitve mora biti zakonsko urejena s posebnim režimom in režimi se morajo med seboj jasno razlikovati.
- c) **Načelo odgovornosti:** za vse izrečene ukrepe osamitve in za vse preglede odločb se mora voditi popolna evidenca. Ta mora dokumentirati vse dejavnike, ki so bili upoštevani, in vse podatke, na katerih so temeljili. Zajemati mora tudi zapis zapornikovega mnenja ali njegove odklonitve, da sodeluje pri procesu odločanja. Poleg tega je treba voditi popolno evidenco vseh stikov med osebjem zapora in zapornikom v samici, zapisani morajo biti tudi vsi poskusi osebja, da zapornika ogovorijo, in zapornikov odziv na to.
- d) **Načelo nujnosti:** pravilo, ki določa, da so dovoljene samo omejitve, nujne za varen in urejen odzem zapornikove prostosti ter izpolnitev zakonskih zahtev, velja prav tako za zapornike, ki prestajajo kazen v samici. Zato med prestajanjem kazni v samici zaporniki ne bi smeli samodejno ostati brez pravice do obiskov, telefonskih pogovorov in dopisovanja ali dostopa do virov, ki so običajno zapornikom na voljo (na primer gradivo za branje). Prav tako bi moral biti režim osamitve dovolj prilagodljiv, da bi dovoljeval opustitev katere koli omejitve, ki ni nujna za posameznega zapornika.
- e) **Načelo nerazlikovanja:** pri odločanju o izreku kazni samice je treba ne samo upoštevati vse pomembne zadeve, temveč tudi zagotoviti, da se nepomembne zadeve ne upoštevajo. Uradni organi morajo spremljati uporabo vseh oblik osamitve, zato da se ne uporabljam nesorazmerno, brez cilja in upravičenega razloga zoper posameznega zapornika ali skupino zapornikov.

The principles involved

- 55. Solitary confinement further restricts the already highly limited rights of people deprived of their liberty. The extra restrictions involved are not inherent in the fact of imprisonment and thus have to be separately justified. In order to test whether any particular imposition of the measure is justified, it is appropriate to apply the traditional tests enshrined in the provisions of the European Convention on Human Rights and developed by the case-law of the European Court of Human Rights. The simple mnemonic **PLANN** summarises these tests.
 - a) **Proportionate:** any further restriction of a prisoner's rights must be linked to the actual or potential harm the prisoner has caused or will cause by his or her actions (or the potential harm to which he/she is exposed) in the prison setting. Given that solitary confinement is a serious restriction of a prisoner's rights which involves inherent risks to the prisoner, the level of actual or potential harm must be at least equally serious and uniquely capable of being addressed by this means. This is reflected, for example, in most countries having solitary confinement as a sanction only for the most serious disciplinary offences, but the principle must be respected in all uses of the measure. The longer the measure is continued, the stronger must be the reason for it and the more must be done to ensure that it achieves its purpose.
 - b) **Lawful:** provision must be made in domestic law for each kind of solitary confinement which is permitted in a country, and this provision must be reasonable. It must be communicated in a comprehensible form to everyone who may be subject to it. The law should specify the precise circumstances in which each form of solitary confinement can be imposed, the persons who may impose it, the procedures to be followed by those persons, the right of the prisoner affected to make representations as part of the procedure, the requirement to give the prisoner the fullest possible reasons for the decision (it being understood that there might in certain cases be reasonable justification for withholding specific details on security-related grounds or in order to protect the interests of third parties), the frequency and procedure of reviews of the decision and the procedures for appealing against the decision. The regime for each type of solitary confinement should be established by law, with each of the regimes clearly differentiated from each other.
 - c) **Accountable:** full records should be maintained of all decisions to impose solitary confinement and of all reviews of the decisions. These records should evidence all the factors which have been taken into account and the information on which they were based. There should also be a record of the prisoner's input or refusal to contribute to the decision-making process. Further, full records should be kept of all interactions with staff while the prisoner is in solitary confinement, including attempts by staff to engage with the prisoner and the prisoner's response.
 - d) **Necessary:** the rule that only restrictions necessary for the safe and orderly confinement of the prisoner and the requirements of justice are permitted applies equally to prisoners undergoing solitary confinement. Accordingly, during solitary confinement there should, for example, be no automatic withdrawal of rights to visits, telephone calls and correspondence or of access to resources normally available to prisoners (such as reading materials). Equally, the regime should be flexible enough to permit relaxation of any restriction which is not necessary in individual cases.
 - e) **Non-discriminatory:** not only must all relevant matters be taken into account in deciding to impose solitary confinement, but care must also be taken to ensure that irrelevant matters are not taken into account. Authorities should monitor the use of all forms of solitary confinement to ensure that they are not used disproportionately, without an objective and reasonable justification, against a particular prisoner or particular groups of prisoners.

Vrste osamitve in njihova legitimnost

56. Osamitev se uporablja v glavnem v štirih situacijah. Za vsako obstaja drugačna utemeljitev in vsako bi morali obravnavati drugače:

a) Osamitev na podlagi sodne odločbe

V večini držav so sodišča pooblaščena, da za osebo v priporu (na primer za osebo v priporu v predkazenskem postopku) odredijo prestajanje kazni v samici za določeno obdobje, če je to v interesu kazenske preiskave. V nekaterih državah je obdobje prestajanja kazni v samici samodejno sestavni del nekaterih kazni, opredeljenih z zakonodajo, ali ga odredi sodišče kot del izrečene kazni.

V zvezi z osamitvijo, ki jo odredi sodišče kot del pripora, lahko nedvomno obstaja utemeljen razlog pri posameznem primeru in na podlagi zadostnih dokazov, da je tak pripornik ločen od drugih posameznih pripornikov, ali v še bolj izjemnih okoliščinah od pripornikov na splošno, in da so mu celo prepovedani stiki z zunanjim svetom. Edini namen pri tem je lahko zavarovanje delovanja sodnega sistema pred dejansko nevarnostjo, upoštevani pa morajo biti tudi zaščitni ukrepi, navedeni v 57. točki tega poročila.

CPT je meni, da prestajanje kazni v samici nikoli ne sme biti odrejeno – niti ne sme obstajati možnost za to – po lastni presoji zadevnega sodišča kot sestavni del izrečene kazni. Na tem mestu se spomnimo splošno sprejetega načela, da so storilci kaznivih dejanj poslani v zapor zaradi kazni, in ne zato, da bi bili v zaporu kaznovani. Zaporna kazen je sama po sebi kazen in potencialno nevarne zaostritve zaporne kazni kot sestavni del kazni niso sprejemljive. Lahko se pokaže nujnost, da mora obsojeni zapornik začasno v samico, vendar morajo biti za izrek takega ukrepa pristojne zaporniške oblasti, nikakor ne sme ukrep postati sestavni del seznama kazenskih sankcij.

b) Osamitev kot disciplinski ukrep

Prepoved stikov z drugimi zaporniki je zaporniku lahko izrečena samo v okviru običajnih zakonsko določenih disciplinskih postopkov, in sicer kot najostrejša disciplinska kazen. Države priznavajo skrite nevarnosti tega ukrepa, zato določijo najdaljše trajanje ukrepa: od le nekaj dni do enega meseca ali več. Nekatere države dovoljujejo, da direktorji zaporov izrekajo najdaljše trajanje ukrepa, s tem da sodni organ lahko odredi še daljše. Večina držav – ne pa vse – prepoveduje zaporedno izrekanje kazni samice.

Glede na potencialno zelo škodljive posledice osamitve CPT meni, da je osamitev po načelu sorazmernosti upravičena kot disciplinski ukrep samo izjemoma in kot zadnja možnost, seveda za najkrajše mogoče obdobje. V marsikateri državi članici Sveta Evrope prevladuje težnja po skrajševanju najdaljšega obdobja kazenske osamitve. CPT meni, da trajanje kazenske osamitve ne bi smelo biti daljše od 14 dni za določen prekršek, bolje še manj³. Poleg tega bi morali prepovedati zaporedno izrekanje disciplinskih kazni, ker je zapornik lahko neprekinjeno v samici dlje časa od najdaljšega obdobja, dopustnega za ta ukrep. Vsa zapornikova kazenska dejanja, ki zahtevajo ostrejše ukrepe, spadajo v kazensko pravosodje.

Types of solitary confinement and their legitimacy

56. There are four main situations in which solitary confinement is used. Each has its own rationale and each should be viewed differently:

a) Solitary confinement as the result of a court decision

most countries, courts have the power to order that a person remanded in custody (i.e. placed in pre-trial detention) be held for a certain period in solitary confinement, in the interests of the criminal investigation. Further, in a few countries, a period of solitary confinement is an automatic part of some sentences established by legislation or can be ordered by a court as part of a sentence.

In relation to solitary confinement ordered by a court as part of remand conditions, it is axiomatic that there may be justification, in an individual case and based on sufficient evidence, for keeping a given remand prisoner apart from other particular prisoners or, in even more exceptional circumstances, prisoners in general, and in restricting his/her contact with the outside world. This should only be done to guard against a real risk to the administration of justice and must be subject to the safeguards outlined in paragraph 57 below.

The CPT considers that solitary confinement should never be imposed – or be imposable at the discretion of the court concerned – as part of a sentence. The generally accepted principle that offenders are sent to prison as a punishment, not to receive punishment, should be recalled in this context. Imprisonment is a punishment in its own right and potentially dangerous aggravations of a prison sentence as part of the punishment are not acceptable. It may be necessary for a sentenced prisoner to be subject, for a certain period of time, to a solitary confinement regime; however, the imposition of such a regime should lie with the prison authorities and not be made part of the catalogue of criminal sanctions.

b) Solitary confinement as a disciplinary sanction

Withdrawal of a prisoner from contact with other prisoners may be imposed under the normal disciplinary procedures specified by the law, as the most severe disciplinary punishment. Recognising the inherent dangers of this sanction, countries specify a maximum period for which it may be imposed. This can vary from as little as a few days to as much as a month or more. Some countries allow prison directors to impose a given maximum period, with the possibility for a judicial body to impose a longer period. Most countries – but not all – prohibit sequential sentences of solitary confinement.

Given the potentially very damaging effects of solitary confinement, the CPT considers that the principle of proportionality requires that it be used as a disciplinary punishment only in exceptional cases and as a last resort, and for the shortest possible period of time. The trend in many member States of the Council of

Europe is towards lowering the maximum possible period of solitary confinement as a punishment. The CPT considers that the maximum period should be no higher than 14 days for a given offence, and preferably lower³. Further, there should be a prohibition of sequential disciplinary sentences resulting in an uninterrupted period of solitary confinement in excess of the maximum period. Any offences committed by a prisoner which it is felt call for more severe sanctions should be dealt with through the criminal justice system.

³ Najdaljše obdobje osamitve mora vsekakor biti krajše, če so zaporniki mladostniki.

³ The maximum period should certainly be lower in respect of juveniles.

c) Preprečevalna administrativna osamitev

Zakonodaja v večini evropskih držav dovoljuje sprejetje upravne odločbe za oddajo zapornikov v samico, če so ti resno poškodovali ali bi verjetno lahko resno poškodovali druge, ali če zelo resno potencialno ogrožajo varnost oseb ali zapora. Osamitev lahko traja samo nekaj ur, če gre za osamljen dogodek, ali pa več let, če zaporniki veljajo za zelo nevarne in pomenijo stalno grožnjo.

Gre za osamitev s potencialno najdaljšo dolžino trajanja in pogosto z najmanj zaščitnimi postopki. Zato je bistveno, da obstajajo pravila, ki zagotavljajo, da se administrativni ukrep osamitve ne bi uporabljal prepogosto (na primer kot pripravljena rešitev za vsak obravnavan disciplinski prekršek), preveč na široko in predolgo. Zato se morajo zaščitni ukrepi, navedeni v 57. točki tega poročila, dosledno upoštevati.

d) Osamitev za zaščito zapornika

Vsek zaporniški režim ima zapornike, ki jih je treba zaščititi pred drugimi zaporniki. To je lahko potrebno zaradi narave njihovega kaznivega dejanja, njihovega sodelovanja s kazenskimi sodnimi organi, rivalstva med tolpami, dolgov zunaj zapora ali v njem ali splošne ranljivosti osebe. Večino zapornikov je v takih razmerah mogoče voditi kot splošno zaporniško populacijo, nekateri zaporniki pa so izpostavljeni tako velikemu tveganju, da jim zapor lahko zagotovi varnost samo z individualno oskrbo, ločeno od drugih zapornikov. Zapor lahko uredi samico na zapornikovo prošnjo ali na pobudo vodstva zapora, ki oceni, da je ta ukrep potreben. Ne glede na postopek ostaja dejstvo, da se zapornik zelo težko reši zaščite do konca prestajanja kazni – in morda celo pri naslednjih kaznih.

Obveznost države je, da zagotovi zapornikom v zaporih varno okolje. Za izpolnitve te obveznosti bi morala država dovoljevati čim več socialnih stikov med zaporniki, seveda ob vzdrževanju dobrega reda. Osamitev naj bi bila res zadnji ukrep za zaščito zapornika takrat, kadar ni nobene druge možnosti za zagotovitev varnosti ogroženega zapornika.

Odločitev za samico: postopki in ukrepi

57. Da bi se ukrep osamitve izvajal samo v izrednih razmerah in za najkrajše potrebno obdobje, mora biti za vsako vrsto osamitve določen poseben postopek za izvajanje in pregledovanje ukrepa osamitve. V nadaljevanju so navedeni postopki, ki so po mnenju CPT najustreznejši:

a) Osamitev kot sestavni del pripora

Kot je že nakazano, naj bi osamitev oseb v priporu veljala samo za redke zapornike in takrat, ko za posamezen primer obstajajo neposredni dokazi, da je resno ogroženo delovanje sodnega sistema, če se zapornik druži z določenimi sojetniki ali drugimi osebami na splošno. Take odločitve morajo biti sprejete na javni obravnavi, s kar najširšo obrazložitvijo sodbe in z možnostjo pritožbe na vsako odločitev posebej. Pristojno sodišče bi moral redno pregledovati odločitve in ugotavljati, ali še obstaja potreba po osamitvi.

b) Osamitev kot disciplinski ukrep

Razlog za izrek disciplinskega ukrepa osamitve in dolžina trajanja kazni morata biti v celoti dokumentirana v zapisniku o zaslišanju pred disciplinsko komisijo. Ti zapisniki morajo biti na voljo višjim vodilnim delavcem in nadzornim organom. Na voljo mora biti tudi učinkovit pritožbeni postopek, ki omogoča pravočasno ponovno preučitev potrjene krivde in/ali kazni, da je še mogoče spremeniti izvršitev kazni. Potrebna spremljajoča okoliščina tega postopka je možnost pravnih nasvetov, do katerih so zaporniki v tej situaciji upravičeni.

Zapornike, ki prestajajo tako kazen, mora vsak dan obiskati direktor zapora ali kak drug višji vodilni delavec, odprava osamitve pa mora biti odrejena, kadar to zahteva zapornikovo stanje ali vedenje. Treba je voditi evidenco vseh obiskov in z njimi povezanih odločitev.

c) Administrative solitary confinement for preventative purposes

The law in most European countries allows for an administrative decision to place into solitary confinement prisoners who have caused, or are judged likely to cause, serious harm to others or who present a very serious risk to the safety or security of the prison. This may be for as short as a few hours, in the case of an isolated incident, or for as long as a period of years in cases involving prisoners who are considered as particularly dangerous and to continue to pose an imminent threat.

This is potentially the longest lasting type of solitary confinement and often the one with the fewest procedural safeguards. It is therefore crucial that there be rules to ensure that it is not used too readily (e.g. as an immediate response to every disciplinary infraction pending adjudication), too extensively or for too lengthy periods. Accordingly, the safeguards described in paragraph 57 below must be rigorously followed.

d) Solitary confinement for protection purposes

Every prison system has prisoners who may require protection from other prisoners. This may be because of the nature of their offence, their co-operation with the criminal justice authorities, inter-gang rivalry, debts outside or inside the prison or the general vulnerability of the person. While many prisoners can be managed in the general prison population in these circumstances, the risk to some is such that the prison can only discharge its duty of care to the individuals by keeping them apart from all other prisoners. This may be done at the prisoner's own request or at the instigation of management when it is deemed necessary. Whatever the process, the fact is that it can be very difficult for a prisoner to come off protection for the rest of the sentence – and maybe even for subsequent sentences.

States have an obligation to provide a safe environment for those confined to prison and should attempt to fulfil this obligation by allowing as much social interaction as possible among prisoners, consistent with the maintenance of good order. Resort should be had to solitary confinement for protection purposes only when there is absolutely no other way of ensuring the safety of the prisoner concerned.

The decision of placement in solitary confinement: procedures and safeguards

57. In order to ensure that solitary confinement is only imposed in exceptional circumstances and for the shortest time necessary, each type of solitary confinement should have its own distinct process for applying and reviewing it. The CPT outlines here what it considers to be the appropriate processes:

a) Solitary confinement as part of remand conditions

As already indicated, solitary confinement of persons remanded in custody should only be used sparingly and where there is direct evidence in an individual case that there is a serious risk to the administration of justice if the prisoner concerned associates with particular inmates or others in general. Such decisions should be made in open court, with as fully reasoned a judgment as possible, and be separately appealable. They should also be reviewed by the competent court on a frequent basis to ensure that there is a continuing need for solitary confinement.

b) Solitary confinement as part of punishment

The reason for the imposition of solitary confinement as a punishment, and the length of time for which it is imposed, should be fully documented in the record of the disciplinary hearing. Such records should be available to senior managers and oversight bodies. There should also be an effective appeal process which can reexamine the finding of guilt and/or the sentence in time to make a difference to them in practice. A necessary concomitant of this is the ready availability of legal advice for prisoners in this situation.

Prisoners undergoing this punishment should be visited on a daily basis by the prison director or another member of senior management, and the order given to terminate solitary confinement when this step is called for on account of the prisoner's condition or behaviour. Records should be kept of such visits and of related decisions.

c) Preprečevalna administrativna osamitev

Osamitev zapornika lahko traja zelo dolgo, saj so upravne odločbe pogosto izdane za nedoločen čas, oba ta dejavnika pa lahko zelo poslabšata negativne posledice ukrepa. Zato je nujen strog nadzor. CPT meni, da lahko administrativno osamitev odobrijo samo najvišji člani zaporniškega osebja. Vedno, ko je osamitev izrečena kot ukrep v sili, mora biti o tem takoj obveščen najvišji član prisotnega dežurnega osebja in čim prej tudi direktor zapora. Preden član osebja, ki je izdal odločbo, odide z dela, mora sestaviti popolno poročilo. V poročilu mora navesti razloge za to odločitev, natančen čas, ko je bil ukrep sprejet, in stališča zapornika, če jih je mogoče ugotoviti. Za vse primere osamitve je treba za prvih nekaj ur voditi nepreklenjen dnevniški zapis dogajanja, prizadeta oseba pa mora biti izpuščena iz samice takoj, ko razloga za izrek ukrepa ni več. Vedno kadar ukrep traja več kot 24 ur, mora obstajati popoln pregled nad vsemi okoliščinami primera, da bi lahko ukrep čim prej preklicali.

Če je daljša osamitev zapornika neizogibna, mora biti v odločanje vključen organ zunaj zapora, kjer je zaprt zapornik, na primer višji član uprave. Zapornik mora imeti pravico do pritožbe na neodvisni organ. Po potrditvi odredbe je treba sklicati interdisciplinarni zbor in povabiti zapornika, da temu organu poda pisne in ustne izjave. Glavna naloga revizijske skupine je izdelati načrt za zapornika, ki naj zajema vse zadeve, zaradi katerih je pridržan v samici. Revizijska skupina mora med drugim tudi preveriti, ali so nekatere omejitve, naložene zaporniku, nujno potrebne – zaporniku se morda lahko dovoli omejeno druženje z izbranimi zaporniki.

Zapornik mora od revizijskega organa prejeti pisno in utemeljeno odločbo, ki navaja možnost pritožbe. Ko je izdana prva odločba, morajo biti opravljeni nadaljnji pregledi – najprej čez en mesec in nato vsaj vsake tri mesece. Pri pregledih je treba oceniti, ali je dosežen napredok v skladu z dogovorjenim načrtom, in po potrebi pripraviti nov načrt. Daljše kot je obdobje osamitve, temeljitejši mora biti pregled in več virov, tudi zunanjih, je treba vključiti v poskusu (ponovne) integracije zapornika v zaporniško skupnost. Zapornik mora imeti pravico, da kadar koli vloži zahtevek za pregled in da za tak pregled pridobi neodvisna poročila. Direktor zapora ali višji člani osebja bi morali vztrajati pri obiskovanju teh zapornikov in biti seznanjeni z individualnimi načrti zanje. Tudi medicinsko osebje bi moralo zapornikom v teh razmerah posvetiti posebno pozornost.

d) Osamitev za zaščito zapornika

»Osamitev na prošnjo zapornika« so manj vprašljive kot zaščitne osamitve po odredbi osebja, vendar kljub temu zahtevajo nekaj pozornosti. CPT meni, da je treba najprej preskusiti vse alternativne rešitve, kadar posamezen zapornik potrebuje zaščito ali kadar mu zaporniki povzročajo težave, tudi prenestev v drug zapor, mediacijo in vadbo socialnih veščin; zaporniku je treba pojasniti vse posledice odločitve za zaščitno osamitev. Seveda je treba obravnavati prošnjo vsakega zapornika, ki je v prostovoljni osamitvi, da bi se vrnil med druge zapornike, in prošnjo odobriti, če je vrnitev varna.

Zaporniki, ki so v zaščitni osamitvi proti svoji volji, morajo imeti pravico enakopravno sodelovati v celotni razpravi odločanja in predlagati druge izbirne rešitve.

Upravičeni so do celovite obrazložitve sprejete odločitve in do možnosti pritožbe na višji stopnji. Odločitev se mora pregledovati v predvidenih razmikih, da se osamitev lahko konča takoj, ko ni več potrebna.

c) Administrative solitary confinement for preventative purposes

This can result in very long-term placements under solitary confinement and the administrative decisions involved are often indeterminate; both these elements aggravate the negative effects of the measure. Consequently, there is a need for stringent controls. The CPT considers that placement in administrative solitary confinement should only be authorised by the most senior member of staff in the prison; any imposition of this measure as an emergency should be reported to the most senior member of staff on duty immediately and brought to the attention of the prison director as soon as possible. A full written report should be drawn up before the member of staff who makes the decision goes off-duty. This should record the reasons for the decision and the precise time the measure was adopted as well as the views of the prisoner as far as these can be ascertained. There should be constant, logged, monitoring of all cases for the first few hours and the person should be released from solitary confinement as soon as the reason for the imposition of the measure has been resolved. In all cases where the measure continues for longer than 24 hours, there should be a full review of all aspects of the case with a view to withdrawing the measure at the earliest possible time.

If it becomes clear that solitary confinement is likely to be required for a longer period of time, a body external to the prison holding the prisoner, for example, a senior member of headquarters staff, should become involved. A right of appeal to an independent authority should also be in place. When an order is confirmed, a full interdisciplinary case conference should be convened and the prisoner invited to make representations to this body. A major task for the review team is to establish a plan for the prisoner with a view to addressing the issues which require the prisoner to be kept in solitary confinement. Among other things, the review should also look at whether some of the restrictions imposed on the prisoner are strictly necessary – thus it may be possible to allow some limited association with selected other prisoners. The prisoner should receive a written, reasoned decision from the review body and an indication of how the decision may be appealed. After an initial decision, there should be a further review at least after the first month and thereafter at least every three months, at which progress against the agreed plan can be assessed and if appropriate a new plan developed. The longer a person remains in this situation, the more thorough the review should be and the more resources, including resources external to the prison, made available to attempt to (re)integrate the prisoner into the main prison community. The prisoner should be entitled to require a review at any time and to obtain independent reports for such a review. The prison director or senior members of staff should make a point of visiting such prisoners daily and familiarise themselves with the individual plans. Medical staff should also pay particular attention to prisoners held under these conditions.

d) Solitary confinement for protection purposes

“Own request” protection cases raise fewer questions than those ordered to go on protection by staff, but they still need some consideration. The CPT considers that all the alternatives, including transferring to another prison either the individual prisoner in need of protection or the prisoners causing the problem, mediation and assertiveness training, should be tried first and the full consequences of a decision to go on protection explained to the prisoner. Of course, a request from any prisoner on voluntary protection to return to the mainstream should be considered and granted if this can be safely done.

Those who are placed on protection against their will should have the right to play a full part in the discussion of the decision and to proffer alternative solutions.

They should be given a full explanation of the decision and the opportunity to challenge it at a higher level. The decision should be reviewed on a regular basis so that solitary confinement can be ended as soon as it is no longer necessary.

Materialne razmere zapornikov v samicah

58. Celice, ki se uporabljajo za osamitev, morajo izpolnjevati enake minimalne standarde kot celice drugih zapornikov. To pomeni, da morajo biti enako velike, imeti enako naravno osvetlitev in biti opremljene z umetno osvetlitvijo (v obeh primerih primerno za branje), biti morajo tudi ustrezno ogrevane in prezračevane. Samice morajo imeti tudi opremo za stike z zaporniškim osebjem. Zaporniki morajo imeti v samicah urejeno spodobno opravljanje naravnih potreb in možnost tuširanja vsaj tako pogosto kot zaporniki v običajnem režimu. Zaporniki v samici morajo biti oblečeni v običajna zaporniška oblačila in dobivati običajno zaporniško hrano, tudi posebne diete, če jih potrebujejo. Površina, kjer se zaporniki razgibavajo, mora biti dovolj velika, da jim omogoča pravo razgibavanje, in opremljena tako, da jih ščiti pred naravnimi prvinami.
59. Vse prepogosto delegacije CPT ugotavljajo, da ena ali več teh osnovnih zahtev ni izpolnjene, zlasti pri zapornikih, zaprtih v samicah na podlagi disciplinskega ukrepa. Samice za to vrsto osamitve so na primer včasih v kletnih prostorih, nimajo ustrezne naravne osvetlitve in prezračevanja, pogosto so vlažne. Običajno so premajhne, pogosto merijo le tri do štiri kvadratne metre. V tej zvezi želi CPT poudariti, da naj bi celice s kvadraturo manj kot šest kvadratnih metrov izločili iz zaporniških bivalnih zmogljivosti. Površine za razgibavanje teh zapornikov so pogosto prav tako neustrezne.
60. Običajna praksa za celice, kjer so zaprti zaporniki, kaznovani z osamitvijo, je omejeno število kosov pohištva, pa še ti so pogosto pritrjeni na tla. Kljub temu bi morale samice imeti vsaj mizo, ustrezno sedišče (stol ali klop) za čez dan in ustrezno posteljo s posteljnino za čez noč. CPT meni, da bi morale biti celice, kjer so zaprti zaporniki z drugačnimi režimi osamitve, opremljene popolnoma enako kot celice drugih zapornikov.

Režimi osamitve

61. Kar zadeva vse druge zaporniške režime, je treba upoštevati načelo, ki pravi, da zaporniki, ki prestajajo kazen v samici, ne bi smeli imeti več omejitve, kot je potrebno za njihov varen in urejen odvzem prostosti. Prav tako si je treba posebno prizadevati za izboljšanje režimov za tiste zapornike, ki so daljša obdobja zaprti v samicah in potrebujejo posebno pozornost, da bi bile škodljive posledice osamitve kar najmanjše. Odgovor na to vprašanje ni nujno »vse ali nič. Vsaka posamezna omejitev mora biti uporabljena v skladu z ocenjenim tveganjem za posameznega zapornika. Kot smo že navedli, je treba prav tako jasno razlikovati med režimi, ki veljajo za zapornike, ki prestajajo kazen v samici, in sicer na podlagi posamezne vrste osamitve.
- a) **Z zaporniki, ki so zaprti v samici med priporom v skladu z odredbo sodišča**, je treba ravnavati čim bolj enako kot z drugimi priporniki. Posebne omejitve veljajo samo, če so nujno potrebne za delovanje sodnega sistema.
- b) **Zaporniki, ki so zaprti v samici na podlagi disciplinskega ukrepa**, ne smejo nikoli ostati brez stikov s svojo družino, vse omejitve teh stikov so lahko izrečene samo, če se zapornikov prekršek nanaša na te stike. Zaporniki tudi ne smejo imeti omejene pravice do stika z odvetnikom. Zaporniki morajo imeti pravico, da se vsaj eno uro vsak dan razgibavajo na svežem zraku, in sicer od prvega dne osamitve. Osebje jih mora spodbujati, naj se zunaj razgibavajo. Dovoljen jim mora biti tudi dostop do razumnega obsega branja (na primer brez omejenega dostopa do verskih besedil). Bistveno je, da so zaporniki v samici deležni spodbude, ki jim pomaga vzdrževati dobro duševno počutje.

Material conditions in solitary confinements

58. The cells used for solitary confinement should meet the same minimum standards as those applicable to other prisoner accommodation. Thus, they should be of an adequate size, enjoy access to natural light and be equipped with artificial lighting (in both cases sufficient to read by), and have adequate heating and ventilation. They should also be equipped with a means of communication with prison staff. Proper arrangements should be made for the prisoners to meet the needs of nature in a decent fashion at all times and to shower at least as often as prisoners in normal regime. Prisoners held in solitary confinement should be allowed to wear normal prison clothing and the food provided to them should be the normal prison diet, including special diets when required. As for the exercise area used by such prisoners, it should be sufficiently large to enable them genuinely to exert themselves and should have some means of protection from the elements.
59. All too often, CPT delegations find that one or more of these basic requirements are not met, in particular in respect of prisoners undergoing solitary confinement as a disciplinary sanction. For example, the cells designed for this type of solitary confinement are sometimes located in basement areas, with inadequate access to natural light and ventilation and prone to dampness. And it is not unusual for the cells to be too small, sometimes measuring as little as 3 to 4 metres; in this connection, the CPT wishes to stress that any cell measuring less than 6 metres, should be withdrawn from service as prisoner accommodation. The exercise areas used by the prisoners concerned are also frequently inadequate.
60. It is common practice for cells accommodating prisoners undergoing solitary confinement as a punishment to have a limited amount of furniture, which is often secured to the floor. Nevertheless, such cells should be equipped, as a minimum, with a table, adequate seating for the daytime (i.e. a chair or bench), and a proper bed and bedding at night. As regards the cells used to accommodate prisoners undergoing other types of solitary confinement, the CPT considers that they should be furnished in the same manner as cells used by prisoners on normal location.
- ## Regimes in solitary confinement
61. As with all other regimes applied to prisoners, the principle that prisoners placed in solitary confinement should be subject to no more restrictions than are necessary for their safe and orderly confinement must be followed. Further, special efforts should be made to enhance the regime of those kept in long-term solitary confinement, who need particular attention to minimise the damage that this measure can do to them. It is not necessary to have an "all or nothing" approach to the question. Each particular restriction should only be applied as appropriate to the assessed risk of the individual prisoner. Equally, as already indicated, there should be a clear differentiation between the regimes applied to persons subject to solitary confinement, having regard to the type of solitary confinement involved.
- a) **Prisoners placed in solitary confinement as part of remand conditions ordered by a court** should be treated as far as possible like other remand prisoners, with extra restrictions applied only as strictly required for the administration of justice.
- b) **Prisoners undergoing solitary confinement as a disciplinary sanction** should never be totally deprived of contacts with their families and any restrictions on such contacts should be imposed only where the offence relates to such contacts. And there should be no restriction on their right of access to a lawyer. They should be entitled to at least one hour's outdoor exercise per day, from the very first day of placement in solitary confinement, and be encouraged to take outdoor exercise. They should also be permitted access to a reasonable range of reading material (which, for example, should not be restricted to religious texts). It is crucially important that they have some stimulation to assist in maintaining their mental wellbeing.

- c) **Zaporniki, ki so zaprti v samici na podlagi preprečevalne upravne odločbe**, morajo imeti individualni načrt režima samice, ki obravnava razloge za sprejetje tega ukrepa. Načrt režima samice mora kar najbolj krepiti zapornikove stike z drugimi – na začetku z zaporniškim osebjem, takoj, ko je to izvedljivo, pa tudi z ustreznimi drugimi zaporniki – in zaporniku omogočati kar najbolj razgibane dejavnosti za zapolnitve dni v samici. Osebje mora močno spodbujati sodelovanje zapornika pri dejavnostih in mu omogočiti stik z zunanjim svetom. Skozi vse obdobje administrativne osamitve mora biti glavni cilj prepričati zapornika, da se ponovno vključi v običajni zaporniški režim.
- d) **Glede zapornikov, ki so zaprti v samici zaradi lastne zaščite**, mora zapor nekako najti ravnotežje med potrebo, da zapornikom prepreči preveliko privlačnost prebivanja v samici na eni strani, in potrebo, da zmanjša omejitve osebi, ki ji je bil izrečen ta ukrep, na drugi strani. Seveda je po končani osamitvi treba sprejeti ukrepe za čim prejšnjo ponovno vključitev zapornika. Če se izkaže, da bo potrebna dolgotrajna zaščita zapornika, in če ni nobene druge možnosti, si je treba prizadevati za izboljševanje režima. Posebno si je treba prizadevati in poiskati tiste zapornike, s katerimi bi se zapornik lahko varno družil, in poskrbeti za okoliščine, ki dovoljujejo zaporniku varen izhod iz samice.

Vloga medicinskega osebja pri oskrbi zapornikov v samicah

62. Zdravniki splošne medicine imajo v zaporih vlogo osebnih zdravnikov in njihova skrb je, da vzpostavlja pozitiven odnos med zdravnikom in pacientom, kar je glavni dejavnik pri varovanju zdravja in dobrega počutja zapornikov. Praksa zdravnikov v zaporu, da potrdijo, ali je zapornik sposoben prestajati kazensko osamitev (ali kako drugo vrsto osamitve v nasprotju z zapornikovimi željami), ne pripomore k vzpostavitvi dobrega odnosa. To dejstvo je bilo priznano v Priporočilu št. R(2006)2 Odprora ministrov državam članicam o evropskih zaporniških pravilih; tako je predpis iz prejšnjega pravilnika, ki zahteva, da zdravnik v zaporu potrdi, ali je zapornik sposoben prestajati kazen, zdaj odstranjen iz tega pravilnika. CPT meni, da medicinsko osebje nikoli ne sme sodelovati pri kakršnem koli procesu odločanja o kateri koli vrsti osamitve, razen takrat, kadar je ukrep potreben iz zdravstvenih razlogov.
63. Po drugi strani mora medicinsko osebje zelo pozorno spremljati položaj vseh zapornikov, ki prestajajo kazen v samici. Medicinsko osebje mora biti obveščeno o vsaki prenestivti zapornika v samico in ga obiskati takoj po prihodu v samico, pozneje pa redno vsaj enkrat na dan, in zaporniku po potrebi ponuditi takojšnjo medicinsko pomoč in zdravljenje. Medicinsko osebje mora poročati direktorju zapora, kadar je zdravje zapornika resno ogroženo zaradi prestajanja kazni v samici.

Sklepna beseda

64. CPT si je pri določanju teh standardov zastavil cilj zmanjševanja uporabe osamitve zapornikov v zaporih ne le zaradi škodljivih duševnih, telesnih in socialnih posledic za zapornika, temveč tudi zato, ker lahko osamitev ustvari priložnost za namerno trpinčenje zapornikov. CPT meni, da je ukrep osamitve lahko izrečen samo v izrednih okoliščinah, kot zadnja možnost in za kar najkrajše obdobje. Zaporniki, ki prestajajo kazen v samici, morajo živeti v spodobnih razmerah. Poleg tega mora ukrep zaporniku nalagati najmanjše omejitve v skladu s ciljem ukrepa in zapornikovim vedenjem. Ukrep mora biti vedno povezan z velikim prizadevanjem osebja zapora, da odpravijo vzroke. Z drugimi besedami, režimi osamitve morajo biti kar najbolj pozitivni in se ukvarjati z dejavniki, ki so sprožili ukrep. Poleg tega je treba v procesu odločanja vgraditi zakonske in praktične zaščitne ukrepe v zvezi z izrekanjem in pregledovanjem ukrepov osamitve. Če zagotovimo, da je ukrep osamitve vedno ustrezен odziv na težavne razmere v zaporih, bomo prispevali k pozitivnim medsebojnim odnosom med osebjem zapora in zaporniki in omejili škodljive posledice za osebe, ki so žal pogosto že tako med najhujšimi kršilci med zaporniki.

- c) **Prisoners placed in administrative solitary confinement for preventative purposes** should have an individual regime plan, geared to addressing the reasons for the measure. This plan should attempt to maximise contact with others – staff initially, but as soon as practicable with appropriate other prisoners – and provide as full a range of activities as is possible to fill the days. There should be strong encouragement from staff to partake in activities and contact with the outside world should be facilitated. Throughout the period of administrative solitary confinement, the overall objective should be to persuade the prisoner to re-engage with the normal regime.
- d) **As regards prisoners placed in solitary confinement for protection purposes**, there is a balance to be struck between on the one hand the need to avoid making this kind of solitary confinement too attractive to prisoners and on the other hand minimising the restrictions put on persons to whom the measure is applied. Certainly, at the outset of such a period of solitary confinement, steps should be taken to reintegrate the person as soon as possible; if it becomes clear that there is a need for long-term protection, and no other response is possible, regime enhancement should be pursued. Special efforts should be made to identify other prisoners with whom the prisoner concerned could safely associate and situations where it would be possible to bring the person out of cell.

The role of health-care staff in solitary confinement

62. Medical practitioners in prisons act as the personal doctors of prisoners and ensuring that there is a positive doctor-patient relationship between them is a major factor in safeguarding the health and well-being of prisoners. The practice of prison doctors certifying whether a prisoner is fit to undergo solitary confinement as a punishment (or any other type of solitary confinement imposed against the prisoner's wishes) is scarcely likely to promote that relationship. This point was recognised in the Committee of Ministers' Recommendation Rec (2006) 2 on the Revised Prison Rules; indeed, the rule in the previous version of the Rules obliging prison doctors to certify that prisoners are fit to undergo punishment has now been removed. The CPT considers that medical personnel should never participate in any part of the decision-making process resulting in any type of solitary confinement, except where the measure is applied for medical reasons.
63. On the other hand, health-care staff should be very attentive to the situation of all prisoners placed under solitary confinement. The health-care staff should be informed of every such placement and should visit the prisoner immediately after placement and thereafter, on a regular basis, at least once per day, and provide them with prompt medical assistance and treatment as required. They should report to the prison director whenever a prisoner's health is being put seriously at risk by being held in solitary confinement.

Conclusion

64. The aim of the CPT in setting out these standards is to minimise the use of solitary confinement in prisons, not only because of the mental, somatic and social damage it can do to prisoners but also given the opportunity it can provide for the deliberate infliction of ill-treatment. The CPT considers that solitary confinement should only be imposed in exceptional circumstances, as a last resort and for the shortest possible time. Prisoners undergoing solitary confinement should be accommodated in decent conditions. Further, the measure should involve the minimum restrictions on prisoners consistent with its objective and the prisoner's behaviour, and should always be accompanied by strenuous efforts on the part of staff to resolve the underlying issues. More specifically, regimes in solitary confinement should be as positive as possible and directed at addressing the factors which have made the measure necessary. In addition, legal and practical safeguards need to be built into decision-making processes in relation to the imposition and review of solitary confinement. Ensuring that solitary confinement is always a proportionate response to difficult situations in prisons will promote positive staff-prisoner interaction and limit the damage done to the very persons who are often already among the most disturbed members of the inmate population.
